EXECUTIVE SUMMARY

Pathways Nursing and Rehabilitation Center (Pathways), a 110-bed residential health care facility (RHCF) located at 1805 Providence Avenue, Niskayuna (Schenectady County), New York 12309, is submitting this Administrative Review Certificate of Need (C.O.N.) Application to convert 12 general RHCF beds to 12 ventilator-dependent beds ("vent beds"), with no construction. All of the 12 to-be-converted vent beds are in single-bedded rooms on the same unit as the existing ventilator-dependent beds. The number of certified vent beds will increase from 24 to 36. The number of certified general RHCF beds will decrease from 16 to four (4). There will be no change to the total certified bed capacity of the RHCF. The remaining 70 beds at Pathways will continue to be certified in the Traumatic Brain Injury category.

Pathways receives ventilator referrals from hospitals throughout the Capital District Region (which includes 17 Upstate counties). Of note, Pathways is the only RHCF in the whole of the Region with adult ventilator-dependent beds. As a result, the RHCF's existing 24-bed ventilator-dependent unit is consistently operating at or near 100% occupancy. Overall, Upstate New York is underserved for ventilator-dependent capacity compared to the Downstate region. The 24 vent beds at Pathways translate to 13,252 persons age 65 and over per operational vent bed in the Capital District Region. For comparison, the ratio in New York City is 2,091 persons age 65 and over per operational vent bed. There is no known clinical difference between the populations of these two (2) areas that would account for this gross disparity (greater than 6:1 unfavorable ratio against the Capital District Region).

Pathways currently has a four-(4)-star rating from the Centers of Medicare and Medicaid Services, reflecting the high quality of care provided at the RHCF. In addition, letters of support for this project from St. Peter's Health Partners and Albany Medical Center are included with this Application.

As there is no construction proposed for this application, Pathways expects to be able to commence operation of the converted vent beds quickly upon approval of this Application. Pursuant to previously completed C.O.N. Project No. 131218, the entire second-floor unit where the proposed, converted beds will be located was built to meet current requirements for vent beds. Upon completion of this present Application, Pathways' ventilator-dependent service will consist of 34 single-bedded rooms and one (1) double-bedded room, totaling 36 vent beds.

Under separate cover, Pathways will also submit a Bed Conversion Plan to the Department for the conversion of beds. The conversion of beds will be effective upon completion of this C.O.N. Application and issuance of a revised operating certificate for the RHCF. A draft of the Bed Conversion Plan is included with this submission, along with a Health Equity Impact Assessment.

New York State Department of Health
Health Equity Impact Assessment Requirement Criteria

Effective June 22, 2023, a Health Equity Impact Assessment (HEIA) will be required as part of Certificate of Need (CON) applications submitted by facilities (Applicant), pursuant to Public Health Law (PHL) §2802-b and corresponding regulations at Title 10 New York Codes, Rules and Regulations (NYCRR) §400.26. This form must be used by the Applicant to determine if a HEIA is required as part of a CON application.

Section A. Diagnostic and Treatment Centers (D&TC) – ***This section should only be completed by D&TCs, all other Applicants continue to Section B.***

Table A. ***N/A – Applicant is a nursing home.***

Diagnostic and Treatment Centers for HEIA Requirement	Yes	No
Is the Diagnostic and Treatment Center's patient population less than 50% patients enrolled in Medicaid and/or uninsured (combined)?	☐	☐
Does the Diagnostic and Treatment Center's CON application include a change in controlling person, principal stockholder, or principal member of the facility?	☐	☐

- ***If you checked "no" for both questions in Table A,*** you do not have to complete Section B - this CON application is considered exempt from the HEIA requirement. This form with the completed Section A is the only HEIA-related document the Applicant will submit with this CON application. Submit this form, with the completed Section A, along with the CON application to acknowledge that a HEIA is not required.

- ***If you checked "yes" for either question in Table A,*** proceed to Section B.

Section B. All Article 28 Facilities

Table B.

Construction or equipment	Yes	No
Is the project minor construction or the purchase of equipment, subject to Limited Review, AND will result in one or more of the following: a. Elimination of services or care, and/or; b. Reduction of 10%* or greater in the number of certified beds, certified services, or operating hours, and/or; c. Expansion or addition of 10%* or greater in the number of certified beds, certified services or operating hours? *Per the Limited Review Application Instructions: Pursuant to 10 NYCRR 710.1(c)(5), minor construction projects with a total project cost of less than or equal $15,000,000 for general hospitals and less than or equal to $6,000,000 for all other facilities are eligible for a Limited Review.*	☐	☒

Establishment of an operator (new or change in ownership)	Yes	No
Is the project an establishment of a new operator or change in ownership of an existing operator providing services or care, AND will result in one or more of the following: a. Elimination of services or care, and/or; b. Reduction of 10%* or greater in the number of certified beds, certified services, or operating hours, and/or; c. Change in location of services or care?	☐	☒
Mergers, consolidations, and creation of, or changes in ownership of, an active parent entity	**Yes**	**No**
Is the project a transfer of ownership in the facility that will result in one or more of the following: a. Elimination of services or care, and/or; b. Reduction of 10%* or greater in the number of certified beds, certified services, or operating hours, and/or; c. Change in location of services or care?	☐	☒
Acquisitions	**Yes**	**No**
Is the project to purchase a facility that provides a new or similar range of services or care, that will result in one or more of the following: a. Elimination of services or care, and/or; b. Reduction of 10%* or greater in the number of certified beds, certified services, or operating hours, and/or; c. Change in location of services or care?	☐	☒
All Other Changes to the Operating Certificate	**Yes**	**No**
Is the project a request to amend the operating certificate that will result in one or more of the following: a. Elimination of services or care; b. Reduction of 10%* or greater in the number of certified beds, certified services, or operating hours, and/or; c. Expansion or addition of 10%* or greater in the number of certified beds, certified services or operating hours, and/or; d. Change in location of services or care?	☒	☐

*Calculate the percentage change from the number of certified/authorized beds and/or certified/authorized services (as indicated on the facility's operating certificate) specific to the category of service or care. For example, if a residential health care facility adds two ventilator-dependent beds and the facility had none previously, this would exceed the 10% threshold. If a hospital removes 5 out of 50 maternity certified/authorized beds, this would meet the 10% threshold.

- ***If you checked "yes" for one or more questions in Table B,*** the following HEIA documents are required to be completed and submitted along with the CON application:
  - HEIA Requirement Criteria with Section B completed
  - HEIA Conflict-of-Interest
  - HEIA Contract with Independent Entity
  - HEIA Template
  - HEIA Data Tables
  - Full version of the CON Application with redactions, to be shared publicly

- ***If you checked "no" for all questions in Table B,*** this form with the completed Section B is the only HEIA-related document the Applicant will submit with this CON application. Submit this form, with the completed Section B, along with the CON application to acknowledge that a HEIA is not required.

New York State Department of Health

Health Equity Impact Assessment Template

Refer to the Instructions for Health Equity Impact Assessment Template for detailed instructions on each section.

SECTION A. SUMMARY

1. Title of project	Conversion of Subacute Care Beds to Ventilator-Dependent Beds
2. Name of Applicant	Pathways Nursing and Rehabilitation Center
3. Name of Independent Entity, including lead contact and full names of individual(s) conducting the HEIA	OckhamHealth Strategists Janine Logan, JLogan@ockhamhealth.com Hannah Moore Brooke Oliveri
4. Description of the Independent Entity's qualifications	Suburban Hospital Alliance of New York State, LLC provides health equity independent assessment services through its OckhamHealth Strategists service line. Operating under SHANYS, OckhamHealth Strategists has demonstrated experience in health equity, community health and stakeholder engagement. Our staff directed the state's Population Health Improvement Program for five years, wherein we developed relationships with a broad array of community stakeholders and deployed a collective impact model that incorporated social determinant of health factors, health equity, health literacy, cultural competency, and health disparity reduction. Staff in all projects take into consideration the community context in which a proposed project is found. This translates into a historical scan of structural racism and other discriminatory practices that may affect any one medically underserved group's ability to access fair and equitable care. OckhamHealth Strategists staff members have undergone extensive racial justice training to enhance systemic analysis skills and to implement and sustain actions that advance racial equity in the practice of public health and health policy. We helped develop a community health needs assessment data-driven, turnkey service to assist hospitals and public health departments in fulfilling community assessment and intervention plan requirements. The service draws from our extensive field work in conducting meaningful

	engagement through key informant interviews, focus groups, listening sessions, and town halls and our qualitative analysis capabilities. In addition, we are engaged in local and regional initiatives to improve the health of our communities and strengthen the healthcare workforce. In the Long Island region, SHANYS has a twenty-year history of leadership in providing health insurance enrollment assistance. During the COVID-19 pandemic, we played a key role in coordinating the vaccination program with the region's hospitals, community health centers and health departments, working to ensure that marginalized communities had access to vaccinations. We have administered a variety of DOH and DOL healthcare workforce grants through the years, assisting current hospital employees and others interested in healthcare careers to become certified nursing assistants, surgical techs, and similarly skilled positions. Other grants have helped prepare nurse preceptors and nurse faculty. In all of our projects, we maintain a commitment to diversity and inclusion. SHANYS also helped to bring together hospitals, county health departments and other providers to establish the Mutual Aid Coordinating Entity (MACE) in the Hudson Valley region to ensure regional collaboration and partnership during health emergencies and continues to coordinate regional preparedness activities. For many years, it also served as a federally designated Patient Safety Organization, bringing together clinicians across the region in collaboration around best practices to improve patient safety and healthcare quality. Our lead staff member for HEIA projects is also an assistant professor of community health at a state university and sits on several regional and statewide health equity task forces.
5. Date the Health Equity Impact Assessment (HEIA) started	January 16th, 2026
6. Date the HEIA concluded	March 31st, 2026

7. Executive summary of project (250 words max)

Pathways Nursing and Rehabilitation Center is a 110-bed skilled nursing facility located in Niskayuna, NY. The facility proposes to convert twelve of its subacute beds to ventilator beds in order to provide care for additional ventilator-dependent patients. This project will result in a total of 36 available ventilator beds. Pathways Nursing and Rehabilitation Center is the only skilled nursing facility offering adult ventilator beds in the Capital Region of NY, caring for New Yorkers residing in areas north of Greene County and east of Delaware County.

8. Executive summary of HEIA findings (500 words max)

Based on the findings of this HEIA, this project will enhance access to mechanical ventilation care among all adults living in the Applicant's service area. The Applicant is the only facility offering adult ventilator-dependent beds in the Capital District of New York State. With just 24 beds available, local services are consistently at- or near-capacity. This results in barriers for hospital staff members and caregivers in coordinating ongoing ventilator care for patients. The expansion of ventilator services will increase the ease in which hospitals can identify and arrange post-acute care for patients, ultimately streamlining care processes and enhancing continuity of care. For patients residing in the counties immediately surrounding the Applicant, this enables patients to receive services close to home and enhances the ability of loved ones to visit during their course of care.

The IE also reports that, while this project will require the conversion of subacute care beds to ventilator-dependent beds, this is not expected to substantially or negatively impact medically underserved communities living in the service area who require subacute care. Based on the demonstrated capacity constraints and barriers to identifying ongoing care for ventilator-dependent patients, the IE expects that the benefit of offering additional ventilator services will far outweigh any unintended impacts of the loss of subacute care beds. This is especially true in considering that there are significantly more residential healthcare programs offering subacute care throughout the service area than those with ventilator units.

This project will benefit all patients who require mechanical ventilation services. Still, this is likely to have the greatest impact on groups at increased risk for acute respiratory failure, groups who utilize prolonged ventilation services at greater rates, and/or those that experience disparate access to these services. Accordingly, the groups expected to be most impacted by the proposed project include older adults, people living with a prevalent infectious disease or condition or a disability, people living in rural areas, people with low income, racial and ethnic minorities, and people with public healthcare coverage.

Based on meaningful engagement with community members, patients, employees of the facility, and representatives of local health departments, this project is widely supported by individuals living in the service area.

Overall, it is the Independent Entity's opinion that this project will have a positive impact on the community.

SECTION B: ASSESSMENT

For all questions in Section B, please include sources, data, and information referenced whenever possible. If the Independent Entity determines a question is not applicable to the project, write N/A and provide justification.

STEP 1 – SCOPING

1. Demographics of service area: Complete the "Scoping Table Sheets 1 and 2" in the document "HEIA Data Tables". Refer to the Instructions for more guidance about what each Scoping Table Sheet requires.

This file is complete for the 398 residential zip codes that comprise the program's service area.

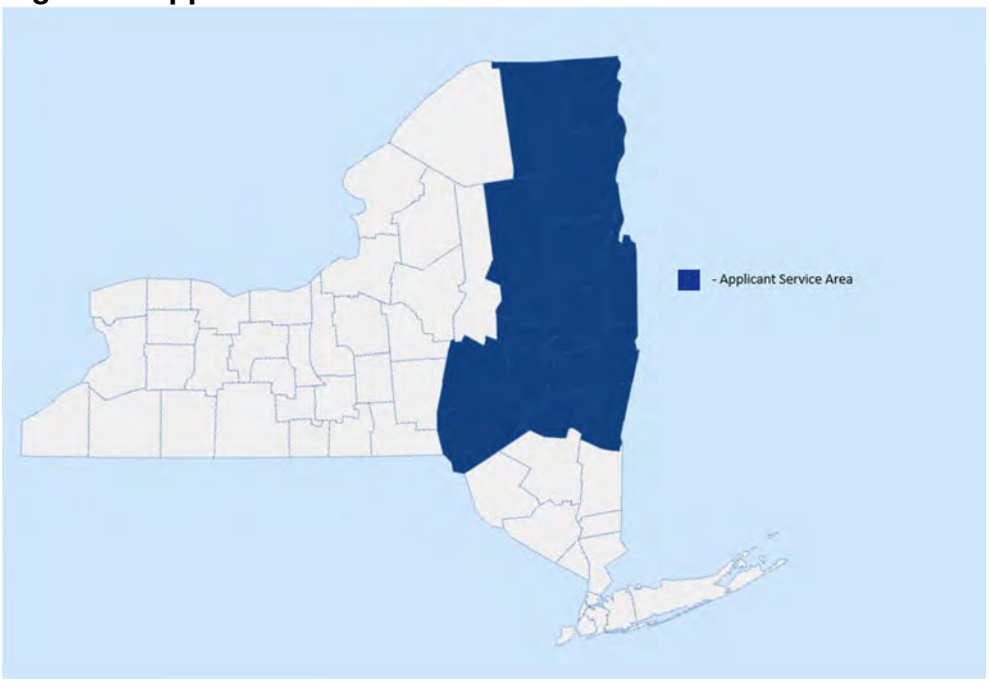

2. Medically underserved groups in the service area: Please select the medically underserved groups in the service area that will be impacted by the project:

   - ❑ Low-income people
   - ❑ Racial and ethnic minorities
   - ❑ Immigrants
   - ❑ Women
   - ❑ Lesbian, gay, bisexual, transgender, or other-than-cisgender people
   - ❑ People with disabilities
   - ❑ Older adults
   - ❑ Persons living with a prevalent infectious disease or condition
   - ❑ Persons living in rural areas
   - ❑ People who are eligible for or receive public health benefits
   - ❑ People who do not have third-party health coverage or have inadequate third-party health coverage
   - ❑ Other people who are unable to obtain health care
   - ❑ Not listed (specify):

The Applicant's service area includes 398 residential zip codes spanning 17 counties in the Capitol District, Mohawk Valley, and North Country of New York State (NYS) as shown by the map below. The total resident population of the service area is 1,504,543.[1] The sociodemographic profile of these residents is outlined below.

[1] American Community Survey 5-Year Data (2019-2023)

Figure 1. Applicant Service Area

Source: MapChart

Sociodemographic Profile of Residents Living in the Applicant Service Area

- **People with low-income** – With such a vast service area, the economic means of residents vary greatly. The proportion of individuals living below the Federal Poverty Level (FPL) sits at 11.2 percent for the entire service area. Franklin County and Delaware County report the highest rates of families living below the FPL, reaching 16.5 percent and 14.9 percent, respectively. Throughout the service area, the proportion of individuals who are unemployed is 2.9 percent and 2.7 percent receive cash public assistance.
- **Gender** – Of the 1.5 million residents living in the service area, 50.2 percent are female, and 49.8 percent are male.
- **Age** – Approximately 19.8 percent of residents living in the service area are older adults aged 65 years or older. This rate is slightly greater than the proportion of older adults living across New York State (17.4 percent). Approximately 21.8 percent of residents are children or adolescents, 31.6 percent are between the ages of 20 and 44 years old, and 26.8 percent are middle-aged adults between the ages of 45 and 64.
- **Race, ethnicity, and immigration status** – Most residents (82.3 percent) living in the service area are white. Residents identifying as Black or African American are the largest (5.8 percent) racial/ethnic group living in the service area, followed then by Asian community members (3.3 percent). Less than one percent of residents identify as American Indian or Alaska Native (0.4 percent). Six percent of community members identify as multiracial and 2.2 identify as another race. Just over five percent of residents living in the service area identify as

Hispanic or Latino (5.6 percent) and 6.7 percent of individuals residing in these regions were not born within the United States. Approximately 8.4 percent of individuals living in the service area report speaking a language other than English in the home, including 3.4 percent of residents who speak another Indo-European language and 2.7 percent who speak Spanish.

- **People with disabilities** – Over 210,000 residents (14.1 percent) living in the service area report living with a disability. Ambulatory difficulties are the most common disability experienced by service area residents (6.5 percent), followed then by cognitive difficulties (5.7 percent), independent living difficulties (5.2 percent), hearing difficulties (3.9 percent), self-care difficulties (2.3 percent), and vision difficulties (2.2 percent).[1]
- **Persons living with a prevalent infectious disease or condition** – Throughout the 17 counties in the service area, 3,075 individuals live with HIV and AIDS.[2] In 2024, there were nine new cases of tuberculosis across these counites, most of which occurred in Albany County.[3] There were also 411 newly reported cases of Hepatitis C and 156 new cases of Hepatitis B in the region.[4]
- **Lesbian, gay, transgender, or other-than-cisgender people** – Throughout the 17 counties, 1.2 percent of residents identify as gender-diverse and 7.1 percent report a sexual orientation other than straight.[5]
- **People living in rural areas** – According to information provided by Rural-Urban Commuting (RUCA) codes, 41.9 percent of the 1.5 million residents living in the service area are considered to reside in a rural area.[6]
- **People who are eligible for or receive public health benefits** – Of the nearly 800,000 households in the service area, 11.1 percent received food assistance in the past twelve months, five percent receive Supplemental Security Income, and 2.7 percent receive cash public assistance income.[1]
- **People who do not have third-party health coverage or have inadequate third-party health coverage** – Approximately 3.5 percent of service area residents do not have health insurance. Of the 1.5 million residents, approximately 40.9 percent utilize public health insurance coverage. Medicaid and Medicare are the most common forms of public health insurance coverage for service area residents, with approximately 22 percent of the population using each insurance coverage alone or in combination.[1]

4. How does the project impact the unique health needs or quality of life of <u>each</u> medically underserved group (identified above)?

The conversion of subacute beds to ventilator-dependent beds proposed by the Applicant will increase access to ventilator care. These beds will service any individual suffering from an injury, disease, or respiratory complication requiring mechanical ventilation. This includes both individuals who may be weaned off of ventilator care to independent breathing or those who face long-term ventilation and require continuous monitoring and/or care rendered by the skilled nursing facility. Ventilator dependency may result from spinal cord injury, lung injury, chronic respiratory diseases, or neurodegenerative and neuromuscular disorders.[7] As a result, the overall patient

[7] Sahetya, S., Allgood, S., Gay, P. C., & Lechtzin, N. (2016). Long-Term Mechanical Ventilation. *Clinics in chest medicine*, *37*(4), 753–763. https://doi.org/10.1016/j.ccm.2016.07.014

population utilizing the proposed beds may be impacted by a vast array of illnesses or injuries resulting in respiratory failure or complication, all of which have unique considerations for various medically underserved groups.

The conversion of beds from subacute care to ventilator-dependent care will benefit all patients who require ventilation. Still, groups at greatest risk for acute respiratory failure, which is recognized as the most common indicator for the initiation of mechanical ventilation, are likely to benefit most markedly from the expansion of ventilator services.[8] Other groups that evidently utilize prolonged ventilation services at greater rates and/or experience disparate access to these services will also benefit more substantially. Overall, the groups expected to be most impacted by the proposed project include older adults, people living with a prevalent infectious disease or condition or a disability, people living in rural areas, people with low income, racial and ethnic minorities, and people with public healthcare coverage. The unique health needs of these groups are discussed below. It is important to note that because this project will impact individuals suffering from a vast array of illnesses and injuries throughout 17 counties, research on the unique health needs of ventilator-dependent, medically underserved individuals was best developed by consulting the existing body of scientific literature, rather than local, granular sources.

Older adults

As detailed further in Scoping Question #5 below, a majority of patients receiving ventilator care in the Applicant service area are 65 years of age and older. While ventilation may occur after trauma or illness impacting individuals of any age, age is strongly associated with the risk of respiratory failure.[9] Accordingly, individuals aged 65 and older are most likely to utilize the converted beds for ventilator services. This group is expected to be most substantially impacted by the expansion of this care at the Applicant facility, especially in considering that this service area has a higher proportion of individuals aged 65 and older than the state overall.

Persons living with a prevalent infectious disease or condition

Mechanical ventilation may occur as a result of a wide variety of prevalent infectious diseases or conditions impacting the brain or spinal cord, the lungs, or airways. This may include common respiratory illnesses such as COVID-19, RSV, or influenza resulting in pneumonia or respiratory distress, chronic pulmonary infections like tuberculosis, and neurological diseases like bacterial meningitis.[9] In cases of severe infectious disease resulting in mechanical ventilation, patients are likely to be cared for in a hospital and referred to a skilled nursing facility when the acute symptoms of illness

[8] Hong, S. B., Oh, B. J., Kim, Y. S., Kang, E. H., Kim, C. H., Park, Y. B., Han, M. S., Shin, C., & Korean study group on respiratory failure (KOSREF) (2008). Characteristics of mechanical ventilation employed in intensive care units: a multicenter survey of hospitals. *Journal of Korean medical science*, *23*(6), 948–953. https://doi.org/10.3346/jkms.2008.23.6.948

[9] NIH. (2022, March 24). Respiratory Failure - Causes and Risk Factors | NHLBI, NIH. Www.nhlbi.nih.gov. https://www.nhlbi.nih.gov/health/respiratory-failure/causes

are managed and the risk for transmission is lessened. As such, patients who are ventilated as a result of an infectious disease will benefit from the expanded ventilator capacities occurring as a result of this project.

Persons living in rural areas

According to an analysis of individuals living in the service area, 41.9 percent of community members serviced by the Applicant facility reside in a rural area. Scoping Question #6 below exemplifies the few facilities in or near the Applicant service area that provide ventilator services. This project will increase access to ventilator services among all residents of the service area. This is especially crucial considering the significant service area population living in a rural area with considerably less access to health care facilities with ventilator capacities.

Women

Available literature reports variable findings on sex-specific differences among patients requiring prolonged mechanical ventilation. Some researchers report no gender differences in patients requiring prolonged ventilation, while others report that men are statistically more likely to require invasive long-term ventilation.[10,11] Accordingly, this project is unlikely to have a differential impact on patients of varying sex or gender-identities. All patients requiring mechanical ventilation will benefit from the expansion of services.

People with low income

Income is associated with numerous factors that influence respiratory health. An evaluation of lung health among individuals of varying socioeconomic standing between 1959 and 2018 showed that, despite sweeping advancements in air quality, tobacco control, occupational safety, and medical care, low-income community members remain subject to worse lung health outcomes.[12] These respiratory conditions may increase the likelihood of individuals requiring mechanical ventilation. Therefore, patients with low income may be at greater risk for requiring the services of the additional ventilator-dependent beds proposed by this project and would benefit more markedly from the expansion of these services at the Applicant facility. This is crucial for enhancing access

Sex-specific differences in risk factors and outcomes for long-term mechanical ventilation: a longitudinal cohort analysis of claims data. Scientific reports, 15(1), 35051. https://doi.org/10.1038/s41598-025-22399-z

[12] Gaffney, A. W., Himmelstein, D. U., Christiani, D. C., & Woolhandler, S. (2021). Socioeconomic Inequality in Respiratory Health in the US From 1959 to 2018. JAMA internal medicine, 181(7), 968–976. https://doi.org/10.1001/jamainternmed.2021.2441

to ventilator services among the 11.2 percent of service area residents living below the FPL.

Racial and ethnic minorities; Immigrants

Existing literature on the incidence of respiratory failure and related health outcomes reveals disparities among racial and ethnic minorities. These disparities are most extensive among individuals identifying as Black or African American. According to researchers, this group experiences increased incidence of respiratory failure and mortality resulting from respiratory failure. Other minority groups, including Asian residents, Native Hawaiian and Pacific Islanders, Indigenous Americans, and individuals identifying as Hispanic or Latino, also face respiratory health disparities, though this varies by respiratory illness and outcome measure.[13] Researchers report that the COVID-19 pandemic significantly contributed to worsening disparities among racial and ethnic minorities with respiratory failure.[14] A study evaluating the risk of severe COVID-19 infection showed that immigrants were more likely to require mechanical ventilation than their native-born counterparts.[15]

The influence of systemic barriers to health, such as long-standing residential segregation, community disinvestment, and income inequality, must be considered in evaluating racial disparities. Adverse health outcomes experienced by communities of color throughout the COVID-19 pandemic were intrinsically related to social determinants of health among these groups.[16] There is also evidence for medical device bias, particularly related to pulse oximetry, among individuals with darker skin tones that may result in undetected hypoxemia and delayed care.[14]

As such, the conversion of these beds to ventilator-dependent care at the Applicant facility will increase access to skilled-nursing care for individuals requiring lifetime mechanical ventilation and those who may be weaned from such. In considering the group's increased risk for respiratory failure and adverse respiratory health outcomes, patients identifying as a racial or ethnic minority and/or immigrant are likely to benefit from this expansion of ventilator services. The Applicant also reports that multilingual staff members and language access services are available on-site to enhance the ability of patients, including those who speak a language other than English, to communicate

Disaster medicine and public health preparedness, 17, e193. https://doi.org/10.1017/dmp.2022.104

with their care team and receive equitable care. These services should mitigate language and cultural barriers and enhance communication with patients.

People living with a disability

As stated above, mechanical ventilation may be needed due to a variety of illnesses and injuries, many of which may result in disability. For example, those with spinal cord injuries or neurodegenerative and neuromuscular disorders are at greater risk for ventilation.[7] Therefore, this project will result in expanded access to ventilator care among individuals living with a disability. The proposed beds may be used by disabled individuals who will be weaned off of the ventilator or as long-term or end-of-life care for individuals with chronic respiratory failure.

Lesbian, gay, bisexual, transgender, or other-than-cisgender people

Ventilator use among individuals identifying as LGBTQIA+ is largely understudied. Still, all patients who are gender-diverse and/or identify with a sexual orientation other than straight who require mechanical ventilation will benefit from increased access to ventilator services.

People who do not have third-party health coverage or have inadequate third-party health coverage; People who are eligible for or receive public health benefits

Research on access to skilled-nursing facilities for prolonged ventilation among individuals with varying insurance statuses is scarce. Still, it is known that Medicaid and Medicare are the main funders for services rendered to ventilator-dependent patients residing in a skilled nursing facility.[17] Accordingly, over 80 percent of patients living in the service area who required mechanical ventilation care between 2018 and 2023 were insured by Medicare and/or Medicaid. Furthermore, most ventilator-dependent patients are first seen in a hospital setting where ventilation is carried out. It is often here that appropriate alternative care settings, such as skilled nursing facilities, are discussed. The decision to transfer a patient to a nursing home must take into consideration the availability of nearby facilities with ventilator services, the availability of ventilator-dependent beds, the level of support at home, and insurance coverage. It is expected that case managers in the hospital will assist in identifying care options for uninsured and underinsured patients. This may include providing support in enrolling an uninsured patient in Medicaid or Medicare for coverage of prolonged ventilation.

It is therefore likely that patients that utilize the converted ventilator-dependent beds will be primarily insured by Medicare and/or Medicaid. These individuals may also be eligible for public health benefits. The facility also accepts private insurance. Ultimately,

[17] Keohane, L. M., Mart, M. F., Ely, E. W., Lai, P., Cheng, A., Makam, A. N., & Stevenson, D. G. (2022). Establishing Medicaid incentives for liberating nursing home patients from ventilators. Journal of the American Geriatrics Society, 70(1), 259–268. https://doi.org/10.1111/jgs.17513

this project will increase the availability of ventilator-dependent beds for individuals with various forms of coverage.

5. To what extent do the medically underserved groups (identified above) currently use the service(s) or care impacted by or as a result of the project? To what extent are the medically underserved groups (identified above) expected to use the service(s) or care impacted by or as a result of the project?

The IE completed an analysis of inpatient claims for mechanical ventilation services rendered between 2018 and 2023 for residents of the service area aged 18 or older. The Primary Diagnosis Related Group (DRG) codes related to this analysis included 003 (ECMO or tracheostomy with mechanical ventilation), 004 (tracheostomy with mechanical ventilation), 207 (respiratory system diagnosis with ventilator support for more than 96 hours), 208 (respiratory system diagnosis with ventilator support for less than or equal to 96 hours), 870 (septicemia or severe sepsis with mechanical ventilation), 871 (septicemia or severe sepsis with mechanical ventilation with major complication or comorbidity), and 872 (septicemia or severe sepsis with mechanical ventilation without major complication or comorbidity). These codes should be representative of individuals at risk for long-term ventilation use at the Applicant facility. The following data reveals pertinent sociodemographic information about those receiving ventilator care:

- Age – Patients receiving mechanical ventilation care were largely 65 years of age or older (63.4 percent). Approximately 10.6 percent of patients were between the ages of 20 and 44 years old, 25.6 percent were between the ages of 45 and 64, 24.8 percent were aged 65 to 74 years old, 24.4 percent were between the ages of 75 and 84, and 14.3 percent were 85 years old or older. Another 0.4 percent of patients were aged 15 to 19 years old.
- Insurance coverage – Throughout 2018 to 2023, 69.3 percent of patients were insured by Medicare and 12.4 percent were insured by Medicaid. Another 15.7 percent of patients utilized commercial insurance and 2.7 percent used other insurance coverage or self-pay.
- Gender – Of the patients receiving mechanical ventilation, 50.6 percent of patients were male, and 49.6 percent were male.
- Race/ethnicity – Throughout 2018 to 2023, a majority of patients were white (86.7 percent). Patients identifying as Black or African American made up 6.6 percent of the patient population. Another 0.9 percent of patients were Asian, 0.4 percent identified as American Indian or Alaska Native, and 0.1 percent reported being Native Hawaiian or other Pacific Islander. Individuals identifying as another

race or ethnicity made up 5.2 percent of these claims. Furthermore, 2.4 percent of these patients reported being Hispanic or Latino.[18]

Projected Utilization of Ventilation Services

The need for mechanical ventilator services is expected to increase over the next decade.[19] This is primarily driven by an aging society and an increase in the prevalence of respiratory illnesses. The Cornell Program on Applied Demographics predicts that the number of older adults aged 65 or older in the Capital Region of New York will increase from 251,504 in 2026 to 275,110 by 2040.[20] Aging is associated with a number of chronic respiratory illnesses, cardiovascular conditions, and neurological diseases as well as increased morbidity and mortality from acute events that may result in critical illness and the need for respiratory support.[21] The number of cases of Chronic Obstructive Pulmonary Disease (COPD), for example, is expected to increase in North America by 2.4 million.[22] As such, the utilization of mechanical ventilation services is expected to increase primarily among older adults. Utilization among other medically underserved groups will mirror shifting population dynamics and trends in the vast array of illnesses or injuries resulting in respiratory failure or complication.

6. What is the availability of similar services or care at other facilities in or near the Applicant's service area?

There are currently 54 nursing homes in New York State which offer ventilator-dependent care. The Applicant facility is the only facility in the Capital Region of New York offering adult ventilator-dependent beds. The nearest facilities to the Applicant are detailed in Table 1 below.

[18] Data Notes: The results shown below use the Statewide Planning and Research Cooperative System (SPARCS) as a data source. The calculated results are derived from inpatient claims for services rendered during calendar years 2018-2023 from patient county origin located in Albany, Clinton, Columbia, Delaware, Essex, Franklin, Fulton, Greene, Hamilton, Montgomery, Otsego, Rensselaer, Saratoga, Schenectady, Schoharie, Warren, and Washington Counties. The report is limited to: Inpatient Claims; Patients: Aged 18+; Primary DRG codes for Mechanical Ventilation: 003, 004, 207, 208, 870, 871, 872

[19] Hill, A. D., Fowler, R. A., Burns, K. E., Rose, L., Pinto, R. L., & Scales, D. C. (2017). Long-Term Outcomes and Health Care Utilization after Prolonged Mechanical Ventilation. Annals of the American Thoracic Society, 14(3), 355–362. https://doi.org/10.1513/AnnalsATS.201610-792OC

Global Burden of Chronic Obstructive Pulmonary Disease Through 2050. *JAMA network open*, *6*(12), e2346598. https://doi.org/10.1001/jamanetworkopen.2023.46598

Table 1. Facilities with Ventilator-Dependent Beds Near the Applicant Service Area

Facility	Number of Ventilator-Dependent Beds	Distance from Applicant
Northeast Center for Rehabilitation and Brain Injury	30	67.8 miles
Oneida Health Rehabilitation and Extended Care	11	104 miles
Taconic Rehabilitation and Nursing at Hopewell	26	106 miles
Bridgewater Center for Rehabilitation & Nursing LLC	12	128 miles
Bishop Rehabilitation and Nursing Center	5	128 miles

Source: NYS Health Profiles

As shown above, the nearest facility that offers ventilator-dependent beds is located nearly 68 miles, or approximately an hour-and-20-minute-drive, from the Applicant facility. Instead, NYS Health Profiles shows that most home facilities with ventilator-dependent beds are located in New York City (26), Long Island (nine), and the Hudson Valley Region (eight). These regions make up 69.6 percent of New York State's population and 85.4 percent of the state's ventilator-dependent beds. The counties served by the Applicant service area are home to 7.6 of the state's population, but just 1.9 percent of ventilator-dependent beds, all of which are located at the Applicant facility. This indicates a significant lack of ventilator-dependent beds in the area. Furthermore, the Applicant reports that these available beds are consistently at or near-capacity. This project will not impact the distribution of beds, but, rather, will increase the bed capacity of an area with a demonstrated need for additional services.

7. What are the historical and projected market shares of providers offering similar services or care in the Applicant's service area?

Mechanical ventilation market share was determined using Statewide Planning and Research Cooperative System (SPARCS) as a data source. The IE's analysis utilized inpatient claims for mechanical ventilation services (for code details, see Scoping Question #5) rendered to residents of the Applicant service area in 2023. This analysis indicates where patients living in the service area were ventilated during care.

Table 2. 2023 Market Share for Inpatient Mechanical Ventilation Services

Facility	% Total
St. Peter's Hospital	20.2%
Albany Medical Center	15.4%
Ellis Hospital	11.5%
Saratoga Hospital	9.2%
Samaritan Hospital	9%
Glen Falls Hospital	7.3%
The University of Vermont Health Network – Champlain Valley Physicians Hospital	5.9%
Mary Imogen Bassett Hospital	4.5%
St. Mary's Healthcare	3.3%
All Others	13.7%
Adult Inpatient Mechanical Ventilation Cases 2023	**100%**

Source: SPARCS (see disclaimer on page 7)

As evidenced by the table above, most patients receiving mechanical ventilation services are seen in Albany, Schenectady, and Saratoga Springs, all of which are located within a 25-mile radius of the Applicant facility. Both St. Peter's Hospital and Albany Medical Center, which hold the greatest market share of mechanical ventilation care in the service area, are located within 35 minutes of the Applicant facility. Representatives from both facilities were contacted for meaningful engagement and supported this expansion of ventilator services. This project will ensure that these hospitals can transition patients out of the Intensive Care Unit (ICU) and into alternate care settings, such as skilled nursing facilities, that better suit the needs of the individual and their family. Hospitals should benefit from the movement of patients to more appropriate care settings as it allows for greater bed capacity and availability of resources for other individuals requiring acute care.

8. Summarize the performance of the Applicant in meeting its obligations, if any, under Public Health Law § 2807-k (General Hospital Indigent Care Pool) and federal regulations requiring the provision of uncompensated care, community services, and/or access by minorities and people with disabilities to programs receiving federal financial assistance. Will these obligations be affected by implementation of the project? If yes, please describe.

N/A

9. Are there any physician and professional staffing issues related to the project or any anticipated staffing issues that might result from implementation of project? If yes, please describe.

According to New York State Department of Health, there is currently no staffing ratio mandated per ventilated patient.[23] Still, as a licensed nursing home operating in New York State, the Applicant facility is required to maintain daily staffing hours equal to 3.5 hours of care per resident per day by a certified nurse aide, licensed practical nurse, or registered nurse, of which at least 2.2 hours of care per resident per day is provided by a CNA and at least 1.1 hour is provided by a licensed nurse.[24] As a higher acuity service, it is likely that the patient utilizing these additional beds may require a greater number of available staff members and/or care time. The Applicant shares that ventilated patients have 24/7 access to nurses and respiratory therapists who work under a pulmonologist. The U.S. Centers for Medicare and Medicaid Services report a

[23] New York State Department of Health. (2011, June). *Questions from Nursing Homes Applying to Enhance Vent Bed Services in New York City*. Ny.gov. https://www.health.ny.gov/facilities/cons/questions_from_nursing_homes.htm

[24] 10 NYCRR §415.13 (2023), https://www.law.cornell.edu/regulations/new-york/10-NYCRR-415.13

higher-than-average number of nurse staff hours per resident per day at the Applicant facility.[25]

This project entails the conversion of current subacute care beds to ventilator-dependent beds. The overall bed count will not change as a result of this project. Still, considering that these beds will be dedicated to servicing patients with higher acuity health needs, it is likely that additional staff members will need to be hired. The IE does not expect that the need for additional staff members will be significant enough to result in a staffing issue but urges the Applicant to monitor ongoing quality and staffing measures to identify potential shortcomings of its staffing level.

10. Are there any civil rights access complaints against the Applicant? If yes, please describe.

The Applicant reports there have been no civil rights access complaints against the Applicant in the last 10 years. This aligns with the IE's search of public databases. According to New York State Department of Health's NYS Health Profiles, this facility consistently received fewer citations than nursing homes statewide on average.

11. Has the Applicant undertaken similar projects/work in the last five years? If yes, describe the outcomes and how medically underserved group(s) were impacted as a result of the project. Explain why the applicant requires another investment in a similar project after recent investments in the past.

No.

STEP 2 – POTENTIAL IMPACTS

1. For each medically underserved group identified in Step 1 Question 2, describe how the project will:
    a. Improve access to services and health care
    b. Improve health equity
    c. Reduce health disparities

The conversion of subacute care beds to ventilator dependent beds will ultimately improve access to mechanical ventilation care among all adults living in the Applicant's service area. As noted above in Scoping Question #6, the Applicant is the only facility offering adult ventilator-dependent beds in the Capital District of New York State. As such, there are just 24 beds available, and according to the Applicant, these beds are consistently at- or near-capacity. Respondents representing local hospitals in the meaningful engagement process reported that case managers regularly encounter barriers in identifying facilities with adequate capacity for ongoing ventilator care. These barriers are driven by a lack of ventilator-dependent beds at alternate care facilities with

[25] U.S. Centers for Medicare and Medicaid Services. (n.d.). Find Healthcare Providers: Compare Care Near You | Medicare. Medicare.gov. Retrieved March 12, 2026, from https://www.medicare.gov/care-compare/details/nursing-home/335701/view-all?state=NY

one respondent stating, “We are a vent poor region in Albany and need more beds.” The expansion of ventilator services will increase the ease in which hospitals can identify and arrange post-acute care for patients. This should ultimately streamline care processes and enhance continuity of care. These beds will also ensure that hospital resources are available for patients with an acute need for ventilation by transitioning patients to more appropriate care settings and freeing up beds, ventilators, and staff.

The additional ventilator-dependent beds will also ensure that more patients can receive this type of care at the Applicant facility. For patients residing in the counties immediately surrounding the Applicant, this enables patients to receive care close to home and enhances the ability of loved ones to visit during their course of care. Of course, patients in farther counties, particularly those residing in the North Country, will still be required to travel long distances to the Applicant facility. This project will not reduce the distance to care or ease in which visitors can access the facility from farther counties. However, this will result in increased regional capacity and potentially reduce the need for residents to travel across state borders for care.

This project may also increase the availability of more affordable care. Little research has been done to identify the exact cost figures of mechanical ventilation in acute care settings compared to that of skilled nursing facilities. Still, it is possible that the transfer of a patient to an alternate care setting may reduce overall healthcare costs when compared to a stay in the ICU or other hospital facilities. An early study on the cost of care for a ventilated patient at a long-term acute-care facility, which provides similar services as skilled nursing facilities with ventilator-dependent beds, found that services in this alternate setting cost approximately $20,000 less than when patients are not transferred out of the hospital. These researchers also identified that hospitals incurred an average of $16,000 in uncompensated care per patient when they are not transferred.[26] While this 2000 study might not be exactly exemplary of the cost savings a patient might experience today when receiving care at a skilled nursing facility, the same logic may apply. This would ultimately reduce costs for both patients and hospitals, particularly if the individual being cared for has low income or is underinsured.

Overall, it is expected that the conversion of beds will have the most substantial impact on groups that utilize prolonged ventilation services at greater rates and/or experience disparate access to these services. In considering the nature of this service, the composition of patients currently utilizing ventilator services in the Applicant service area, and the extensive disparities noted in Scoping Question #4 above, the groups expected to be most impacted by the proposed project include older adults, people living with a prevalent infectious disease or condition or a disability, people living in rural areas, people with low income, racial and ethnic minorities, and people with public

[26] Seneff, M. G., Wagner, D., Thompson, D., Honeycutt, C., & Silver, M. R. (2000). The impact of long-term acute-care facilities on the outcome and cost of care for patients undergoing prolonged mechanical ventilation. *Critical care medicine*, *28*(2), 342–350. https://doi.org/10.1097/00003246-200002000-00009

healthcare coverage. This project may ultimately improve health equity and reduce health disparities for these medically underserved groups.

2. For each medically underserved group identified in Step 1 Question 2, describe any unintended positive and/or negative impacts to health equity that might occur as a result of the project.

In order to complete the proposed project, existing subacute care beds will be converted to ventilator-dependent beds. These beds must be fit with the adequate space for the mechanical ventilator and associated equipment. The Applicant will, therefore, experience a decrease in the availability of beds for subacute care. The conversion of twelve of these beds will result in just four beds available for subacute care. It is possible that the service area will experience a decrease in access to this level of care as a result.

However, subacute care beds are much more widely available in the Applicant service area than ventilator beds. The Applicant is the only facility offering ventilator-dependent care in the 17 counties but is just one of 64 facilities offering residential healthcare, such as subacute care. These facilities are located throughout 15 of the 17 counties of the service area, excluding Hamilton and Schoharie Counties. As such, subacute care beds are expected to be more widely available and more equitably distributed throughout the service area. A representative from one of the local hospitals who participated in the Meaningful Engagement process reported that it is easier to find support for patients requiring residential healthcare when compared with that of ventilator-dependent patients. The individual reported, “We have a pretty good footprint in this region of subacute beds.” Therefore, the decrease in subacute care beds occurring as a result of this project is not expected to drastically impact access to care, health disparities, or health equity for these patients.

Furthermore, the Applicant, which offers pediatric services, traumatic brain injury care, and ventilation for pediatric and adult patients, serves a more medically complex patient population than other residential healthcare programs. The conversion of subacute care beds to ventilator-dependent beds represents the Applicant’s increased specialization and ability to offer quality care to a higher acuity patient population.

Overall, the IE does not believe that the conversion of subacute care beds to ventilator-dependent care beds will substantially or negatively impact medically underserved communities living in the service area who require subacute care. In considering the ventilator-dependent bed capacity constraints evident in the Applicant service area and the demonstrated need for additional ventilator care in these zip codes, it is the IE’s belief that the benefit of offering additional ventilator services will far outweigh any unintended impacts of the loss of subacute beds. Instead, this project is likely to improve access to prolonged mechanical ventilation care for all residents, particularly among those who are considered medically underserved and utilize prolonged ventilation services at greater rates and/or experience disparate access to these

services. This may ultimately improve health equity and reduce health disparities for all medically underserved groups that require ventilation.

3. How will the amount of indigent care, both free and below cost, change (if at all) if the project is implemented? Include the current amount of indigent care, both free and below cost, provided by the Applicant.

According to the CMS Skilled Nursing Facility Cost Report, the Applicant nursing home experienced a net income from service to patients, which considers unreimbursed care, contractual adjustments, and charity discounts, of $1,931,449. As a for-profit nursing home, which is not required to provide a minimum amount of indigent care, the IE is unable to determine if indigent care was provided and if so, how much this amounted to. Still, the amount of indigent care provided by the Applicant is not expected to be impacted by the proposed project, as there will be no net change in bed count or patient volume for the Applicant facility.

4. Describe the access by public or private transportation, including Applicant-sponsored transportation services, to the Applicant's service(s) or care if the project is implemented.

The patients utilizing the affected services will most likely be transferred from a hospital or other acute care facility in the service area. As such, transporting a ventilated patient would most likely be done via ambulance or ambulette to maintain access to appropriate care professionals and equipment and minimize the risks associated with transferring an individual who is ventilator dependent. The referring hospital may arrange transportation through their own fleet of ambulances or ambulettes, if available. If this option is not feasible, transportation for the patient may be arranged through private or public options with the assistance of the referring hospital staff and/or the Applicant facility. The Applicant employs an on-site social work team who may be able to identify transportation options for patients planning to receive care there. Available transportation options are explored below. However, with such a wide service area, this is not intended to be comprehensive.

Transportation Options for Patients

Ambulance/Ambulettes – Patients may utilize Mohawk Ambulance Service which services multiple counties in the service area and offers Specialty Care Transport for ventilator management. Each county in the service area also has multiple ambulance services offering basic or advanced life support, which may assist in transporting a ventilated patient.[27]

Medicaid Transportation – Medicaid patients in need of transportation to a nursing home for ongoing ventilator care may utilize the state's designated Medicaid transportation broker responsible for identifying potential vendors. In the Applicant service area, the

[27] New York State Department of Health (2025): Listing of Ambulance and Advanced Life Support First Response Services in New York

Medicaid transportation broker is Medical Answering Services, LLC, which can be contacted at 866-932-7740.

Transportation Options for Visitors

Ensuring ongoing access to the Applicant facility would be most pertinent for patient visitors and family members traveling to and from the nursing home. However, transportation is a pervasive barrier faced by community members residing in the service area as 41.9 percent of residents live in a rural area. In these areas, public transportation systems are scarce and lack bus and train stops near to residents' homes. Still, approximately 9.4 percent of households in the service area lack access to a vehicle.[1] Additionally, this service area is expansive, spanning a total of 17 counties in the Capital Region, Mohawk Valley, and North Country of NYS. As a result, a proportion of residents will be required to travel far distances to visit a ventilated patient at the Applicant facility. While this project will increase the regional capacity of ventilator-dependent beds, this project will not address transportation barriers or increase the ease in which family members or loved ones living in farther counties can visit the nursing home resident.

Most visitors are likely to arrive via car where they will be able to use on-site parking. This includes ADA accessible parking. Public transportation options to the Applicant nursing home are explored below.

By Bus:

- Capital District Transportation Authority (CDTA) Bus 351 – Services westbound/eastbound to and from Rotterdam Industrial Park to Gerling St. and Sheridan Ave. Stops on Hillside Ave approximately 0.2 miles, or a five-minute walk, from the Applicant facility.
- CDTA Bus 810 – Schenectady Shuttle servicing Schenectady neighborhoods and Schenectady High School. Stops on Hillside Ave approximately 0.4 miles, or a ten-minute walk, from the Applicant facility.
- CTDA offers routes through Albany, Schenectady, Rensselaer, Saratoga, Montogomery, Warren, and Washington. Transfers can be made along these lines to routes local to the Applicant facility.
- Greyhound bus routes reach up into the North County and Mohawk Valley. Transfers would be necessary to arrive for care at the Applicant facility. The nearest Greyhound bus stop is located approximately 3.5 miles, or a twelve-minute drive from the Applicant facility.

By Train:

- Amtrak – The Adirondack, Empire Service, Ethan Allen Express, Lake Shore Limited, and Maple Leaf routes all stop in Schenectady. The nearest Amtrak station to the Applicant facility is located three miles away, or a ten-minute drive.

5. Describe the extent to which implementation of the project will reduce architectural barriers for people with mobility impairments.

This project is not expected to reduce architectural barriers for people with mobility impairments.

6. Describe how implementation of the project will impact the facility's delivery of maternal health care services and comprehensive reproductive health care services, as that term is used in Public Health Law § 2599-aa, including contraception, sterility procedures, and abortion. How will the project impact the availability and provision of reproductive and maternal health care services in the service area? How will the Applicant mitigate any potential disruptions in service availability?

N/A

<u>Meaningful Engagement</u>

7. List the local health department(s) located within the service area that will be impacted by the project.

- Schenectady County Public Health Services
- Albany County Department of Health
- Clinton County Health Department
- Columbia County Health Department
- Delaware County Public Health
- Essex County Health Department
- Franklin County Public Health
- Fulton County Public Health
- Greene County Public Health Department
- Hamilton County Public Health
- Montgomery County Public Health
- Otsego County Health Department
- Rensselaer County Department of Health
- Saratoga County Department of Health
- Schoharie County Public Health
- Warren County Public Health
- Washington County Public Health Service

8. Did the local health department(s) provide information for, or partner with, the Independent Entity for the HEIA of this project?

The IE attempted to contact representatives from all 17 county health departments in the service area. However, just eight individuals from health departments in Columbia, Fulton, Warren, Washington, Green, Delaware, and Ostego Counties provided a

response for the purpose of the HEIA. All health departments were contacted a minimum of three times to provide a response. Of the public health professionals who participated in the meaningful engagement, four individuals were in support of the proposed project and four were unsure. This uncertainty was primarily driven by a lack of data specific to their county's utilization of or need for ventilator-dependent services. The following verbatim quotes were provided:

> *"Without direct knowledge of the need for additional ventilator beds I do not know the specific need. These individuals require specialized care that many families cannot provide in the home. When these beds are needed you want them to be as close to family support as possible. Families have enough of a burden in situations where this level of care is needed without having to drive for a considerable amount of time to advocate for and provide support to their loved one."*
>
> *"There is no way to know if this conversion will help the people of Warren County. We do not have data showing how many people actually need this type of service or what the shortage is in our area. Without this information our agency is unable to support or not support this project."*

9. Meaningful engagement of stakeholders: Complete the "Meaningful Engagement" table in the document titled "HEIA Data Table". Refer to the Instructions for more guidance.

This data table is complete.

10. Based on your findings and expertise, which stakeholders are most affected by the project? Has any group(s) representing these stakeholders expressed concern the project or offered relevant input?

Findings from the meaningful engagement process aligned with the IE's conclusions that any individual living in the Applicant service area may be impacted by the proposed project. This is especially true considering that the individuals utilizing ventilator services may require this type of care due to any number of injuries or illnesses resulting in respiratory failure. An evaluation of disparities faced by medically underserved communities at risk for acute respiratory failure suggests that the groups expected to be most impacted by the proposed project may include older adults, people living with a prevalent infectious disease or condition or a disability, people living in rural areas, people with low income, racial and ethnic minorities, and people with public healthcare coverage.

11. How has the Independent Entity's engagement of community members informed the Health Equity Impact Assessment about who will benefit as well as who will be burdened from the project?

The IE sought the input of facility employees, residents, community leaders, and local health department staff for the purposes of this assessment. Outreach and engagement methods are detailed below. A total of 30 individuals provided a response. Of those

successfully engaged, 25 respondents were in support of the project, and five individuals were unsure about their support.

Meaningful Engagement Methods

The IE developed a survey about the proposed conversion of subacute care beds to ventilator-dependent beds in English and Spanish. Translation of the survey into Spanish was done using a Certified Translation Service. Outreach was carried out on-site at the Applicant facility using physical outreach material such as flyers, posters, and paper surveys in order to capture the insight of the facility's employees, residents, and/or visitors. Patients, visitors, and employees were encouraged to share their perspective on the proposed project through the online survey or by filling out a physical copy. In addition to sociodemographic questions, the survey contained dichotomous and open-ended questions about the respondents' opinion on the proposed project. This helped to identify the level of support for the project, the potential impacts of the project, and the groups most affected. Twenty individuals provided a response to this survey. Survey results are summarized below and in Appendix A.

A similar survey was developed to gather input from community-based organization leaders, healthcare partners, and health department staff. This survey asked identical questions about the respondents' support for the project and how they think this might impact the communities they serve. Other questions from this survey helped to develop a sociodemographic profile of the communities represented by the responding organization. This survey was disseminated among community leaders who were not contacted for an interview or were otherwise unable to provide an interview. With such an expansive service area, the IE prioritized interview and focus group feedback for the engagement of more local organizations, such as referring hospitals, non-profits that support local families, and the Schenectady County Public Health Services.

However, after extensive outreach to 35 different community leaders, only one individual provided an interview, and nine community leaders answered the digital survey. The interview summary and survey responses are explored below. Survey results are summarized in Appendix B. It is important to note that despite repeated outreach, the IE was not successful in obtaining the input of local community-based organizations. This is discussed in Question #12 below.

Survey for Facility Residents, Visitors, and Employees

As stated above, the IE deployed a survey on-site at the Applicant facility to capture the feedback of individuals receiving services, providing services, or loved ones of residents. This allowed the IE to obtain input from individuals who are familiar with the Applicant facility and the services offered there. Twenty individuals provided a response to the survey. Seventeen of these individuals were employees of the facility visitors, one individual was a resident of the facility, and two were visitors or family members. All responses received were in English.

The survey consisted of 12 questions, the majority of which focused on respondent demographics. These questions enabled the IE to develop a socioeconomic profile of the populations served by the Applicant hospital, as well as those likely to be affected

by the proposed project. Respondents were also asked to indicate whether they supported the project, opposed it, or were unsure. The findings are discussed below, and summaries of all survey questions are provided in Appendix A.

Nineteen of the twenty survey respondents were in support of the project. The remaining individual was unsure about their support, though they did not elaborate on this uncertainty. The demographics of the respondents largely reflect the demographics of the service area. These individuals primarily identified as white (80 percent), followed then by Asian (15 percent), and Black or African American (five percent). None of the respondents reported that they were Hispanic or Latino. One person preferred not to share their race or ethnicity. Most respondents (90 percent) identified as female. Of the individuals who knew their healthcare coverage status and were willing to respond, 15 individuals were commercially insured, one individual had low income and was a Medicaid recipient, and one was insured by Medicare. Three people were 65 years of age or older, two individuals live with a disability, and one person identified as an immigrant. The following sentiments, which align with the IE's assessment of the project, were shared by respondents.

> *"It would be beneficial to the community."*
>
> *"Facility would benefit from ventilator beds due more available ventilator beds in the Capital district that are needing long term care. Both parties would benefit from more available beds being closer to loved ones."*
>
> *"My name is Lisa Marotta. I am the mother and Legal Guardian of [Patient Name][28], Vent Patient, Resident of Pathways. Before [Patient Name] was accepted at Pathways, I looked at several facilities in New York with assistance from OPWDD. Several appeared to be poorly run and when going on days scheduled, I was treated poorly. [Patient Name]'s transition counselor recommended Pathways. (Also there weren't many to choose from). My son has been the healthiest he has ever been since admission about 9-10 years ago. The staff are exceptional. The need for more vent beds in this area is crucial. The beds should go to Pathways as they have shown again and again they can handle them with exceptional care."*

Community Leader and Professional Survey

The community leader survey ensured that the feedback of healthcare partners and health department staff could be considered for the purposes of this assessment. These survey questions largely aligned with those asked of patients, visitors, and employees, though additional details regarding the type of services provided by the responding organization and the communities receiving these were asked of respondents. One healthcare partner and eight health department staff members from the 17 surrounding counties provided a response. These organizations engage patients and community

[28] Patient name has been redacted.

members from all sociodemographic backgrounds including individuals of all races and ethnicities, ages, gender identities and sexual orientations, immigration status, and income and insurance status. The needs of these medically underserved groups should therefore be considered in respondents' survey answers. Five individuals were supportive of the proposed project and four were unsure. One healthcare partner, in particular, who regularly refers patients to the Applicant facility for ongoing ventilator care was supportive of the proposed project and provided the following statement. The statement largely aligns with the findings of this HEIA.

> *"The community could certainly use these beds to help with capacity constraints at all area and state hospitals. We are a vent poor region in Albany and need more beds."*

Meanwhile, local health department staff reported their uncertainty regarding their support for the project. This was primarily related to a lack of knowledge surrounding the need for ventilator-dependent beds among community members. Please see Question #8 above for more details about local health department staff's participation in this assessment.

Listening Session

The IE conducted one listening session with a case manager from a healthcare partner which regularly refers patients to the Applicant facility for ventilator services. This individual was in support of the project and stressed that this will help to alleviate capacity constraints and enhance the continuum of care for individuals requiring ongoing ventilator care. This individual noted that they regularly encounter barriers to coordinating care for ventilator-dependent patients due to a lack of available beds. According to the respondent, this often results in sending patients to ventilator-dependent units three or four hours away, such as facilities in New York City, which is inconvenient and burdensome among service area residents. This impacts patients experiencing acute injury and chronic illness alike. Furthermore, this respondent reported that there is a "good footprint in this region of subacute beds," emphasizing that the conversion of subacute care beds to ventilator-dependent beds will not result in an undue capacity constraint for individuals requiring care for injuries or illnesses of lower acuity. Instead, the respondent underscored the importance of enhancing options for patients with high acuity care needs. The respondent noted that "being able to have a strong partner that can work with us to have continuity of care for these patients would be really welcome." This response aligns with the IE's conclusions regarding the potential impact of the proposed project.

12. Did any relevant stakeholders, especially those considered medically underserved, not participate in the meaningful engagement portion of the Health Equity Impact Assessment? If so, list.

Unfortunately, after extensive outreach to eleven different community-based organizations operating in the Applicant service area, the IE was unable to successfully

receive feedback from this group for the purpose of the HEIA. As noted above, the IE follows a standard practice of reaching out numerous times to stakeholders. This is evidenced by the "Unsuccessful Meaningful Engagement Attempts" section on the attached scoping sheets' Meaningful Engagement tab. One community-based organization leader noted that they consulted their facility's board and all members agreed that this was "not an area [they] could make an informed judgement on" and declined to provide feedback. It is very likely, in considering the specialized services impacted by this proposal, that other community-based organizations felt similarly which resulted in not responding to outreach attempts. These outreach efforts are documented in the attached Scoping Sheets.

STEP 3 – MITIGATION

1. If the project is implemented, how does the Applicant plan to foster effective communication about the resulting impact(s) to service or care availability to the following:
    a. People of limited English-speaking ability
    b. People with speech, hearing or visual impairments
    c. If the Applicant does not have plans to foster effective communication, what does the Independent Entity advise?

Mitigation Question #3 below describes how the Applicant can effectively communicate the proposed project to impacted stakeholders. The IE expects that a majority of the communication regarding this project will take place with healthcare partners in the community, rather than directly with potential patients, given the nature of the service. Still, language access services are essential to effectively communicating with patients and community members who speak a language other than English and people with speech, hearing, and/or visual impairments. As explored in Scoping Question #2, approximately 8.4 percent of individuals living in the service area report speaking a language other than English in the home, including 3.4 percent of residents who speak another Indo-European language and 2.7 percent who speak Spanish. Individuals reporting hearing difficulties and vision difficulties make up 3.9 percent and 2.2 percent of the service area, respectively.

The Applicant reports that the facility is equipped with language and communication access services to ensure that all patients and their family members can effectively engage with the patient's care team. The Applicant also reports that the facility is staffed by multilingual professionals who also provide valuable support to individuals who speak a language other than English. These employees and language access services may enhance communication of the impact of the additional ventilator-dependent beds to potential and current patients and family members.

2. What specific changes are suggested so the project better meets the needs of each medically underserved group (identified above)?

Based on the findings of this HEIA, the IE does not believe that additional changes to the proposed project are necessary. As demonstrated by Scoping Question #6 above, the Applicant is the only skilled nursing facility offering ventilator-dependent beds in the Capital District region of New York and these beds service individuals from 398 residential zip codes across 17 counties. The Applicant also reports that the current ventilator-dependent beds available at this facility are regularly at- or near-capacity, which often results in care coordination issues for hospital staff members attempting to identify appropriate care settings for patients requiring ongoing ventilation support. This indicates a clear service gap, which may be ameliorated by increasing the number of ventilator-dependent beds at the Applicant facility.

While this project will require the conversion of subacute care beds to ventilator-dependent beds, the IE does not believe that this will substantially or negatively impact medically underserved communities living in the service area who require subacute care. This is especially true in considering that there are significantly more residential healthcare programs offering subacute care throughout the service area than those with ventilator units. Instead, it is the IE's belief that the benefit of offering additional ventilator services will far outweigh any unintended impacts of the loss of subacute care beds. This will benefit all patients who require mechanical ventilation services but will have the greatest impact on groups at increased risk for acute respiratory failure, groups who utilize prolonged ventilation services at greater rates, and/or those that experience disparate access to these services. Accordingly, the groups expected to be most impacted by the proposed project include older adults, people living with a prevalent infectious disease or condition or a disability, people living in rural areas, people with low income, racial and ethnic minorities, and people with public healthcare coverage.

3. How can the Applicant engage and consult impacted stakeholders on forthcoming changes to the project?

Given the nature of mechanical ventilation, it's unlikely that community members would anticipate the significant health issues or injuries that would necessitate prolonged ventilator care. As such, the IE does not believe extensive dialogue with the general public would be a necessary step to implementing this project. Still, the Applicant may benefit from posting signage in the facility, sending emails to individuals who are currently using or have used the Applicant's services, being present at in-person health events, and disseminating paper advertising to help effectively communicate this project with the public.

The IE believes that communication with surrounding healthcare facilities who interact with patients at greatest risk for requiring mechanical ventilation will be most pertinent for the implementation of this project. The IE encourages the Applicant to communicate this plan with hospitals across the service area, particularly those with trauma centers who may see a greater number of patients requiring ventilation due to injury. Communication to case managers and hospital social work departments charged with

overseeing next steps for ventilated patients will increase awareness of the additional ventilator-dependent bed capacity in the region and may enhance the ease at which patients can access these beds. The IE may also benefit from communication with specialized pulmonologists and/or neurologists who care for patients with progressive and/or chronic illnesses that may require mechanical ventilation. For example, a neurologist may be able to advise a patient and the patient's family on the facilities available for prolonged ventilation use when presenting with a neurodegenerative disorder that typically leads to reliance on a ventilator towards the later stage of illness. Overall, communication with other healthcare partners may also foster greater collaboration between professionals and enhanced continuity of care.

4. How does the project address systemic barriers to equitable access to services or care? If it does not, how can the project be modified?

The proposed project will enhance access to ventilator-dependent beds – a service which has been shown to be severely lacking in the Applicant service area. It is the IE's perspective that the expansion of these services will be an apparent positive for those who require ventilation services in the service area. However, to advance equity for patients requiring ventilation care living in this service area, which covers 17 counties across the Capital Region, Mohawk Valley, and North Country of NYS, progress must be made in increasing the availability of services that are equitably distributed across the 398 residential zip codes. While increasing the capacity of the Applicant facility is undoubtedly beneficial, patients and visitors from farther counties will still be required to travel long distances – including two to three-hour drives – to receive ventilator care here as the only nursing home to offer this level of care in these regions of New York. A care system that promotes equitable access to ventilator-dependent beds would ensure these services are available throughout all regions, including the rural areas of the Applicant service area, to reduce burdensome travel for patients and visitors.

It is not within the scope of the proposed project to suggest that ventilator-dependent units can or should be added to other facilities located throughout the Applicant service area. This, instead, would require the extensive and collaborative efforts of numerous healthcare entities and state agencies to establish a network of facilities that offer ventilator-dependent services to underserved communities. It is the IE's perspective that the Applicant is undertaking appropriate measures to increase access to care within the size and scope of an independent and sole provider of ventilator-dependent beds in the service area.

STEP 4 – MONITORING

1. What are existing mechanisms and measures the Applicant already has in place that can be leveraged to monitor the potential impacts of the project?

- Centers for Medicare and Medicaid Services (CMS) mandatory measures tied to the Skilled Nursing Facility (SNF) Quality Reporting Program (QRP) Public Reporting
- New York State Nursing Home Quality Initiative (NHQI)
- Nursing Home Inspections
- Nursing Home Complaints and Citations

2. What new mechanisms or measures can be created or put in place by the Applicant to ensure that the Applicant addresses the findings of the HEIA?

The Applicant appears to collect crucial census and quality data that would measure the utility of additional ventilator-dependent beds as well as the associated impacts of the reduction in subacute care beds. The Applicant would benefit from stratification of these measures by sociodemographic information in order to identify trends in access by medically underserved groups as well as disparate health outcomes. An additional measure that might offer valuable insight into the impact of this project might include capturing the time between initial contact of a referring hospital to time of patient admission to the Applicant nursing home. This might illustrate the ease of care coordination between the referring and receiving entities, likely improved by the availability of additional ventilator-dependent beds.

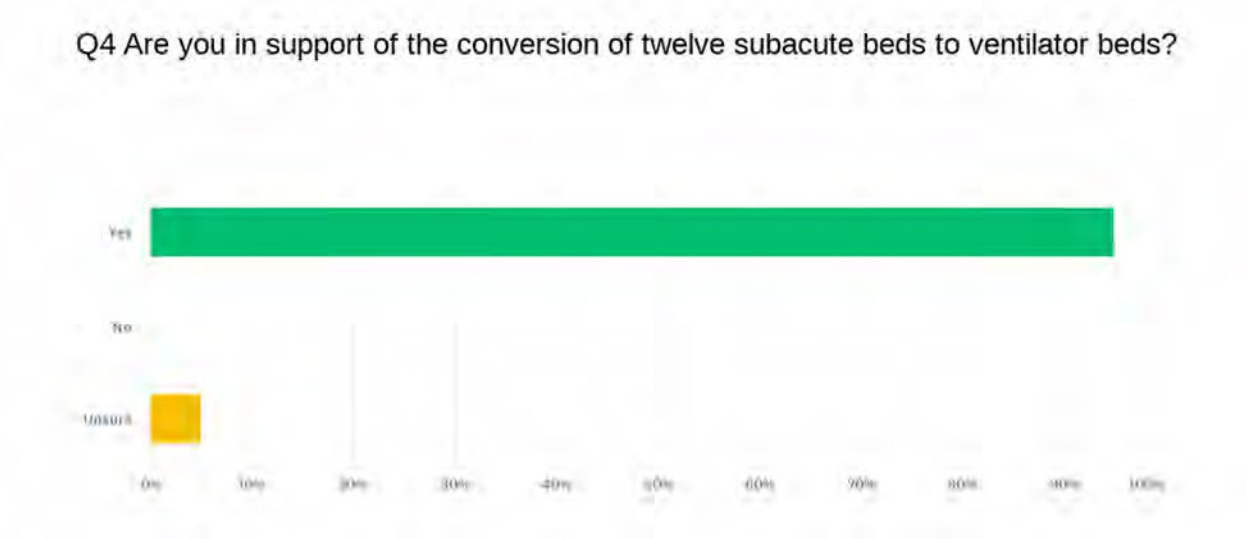

STEP 5 – DISSEMINATION

The Applicant is required to publicly post the CON application and the HEIA on its website within one week of acknowledgement by the Department. The Department will also publicly post the CON application and the HEIA through NYSE-CON within one week of the filing.

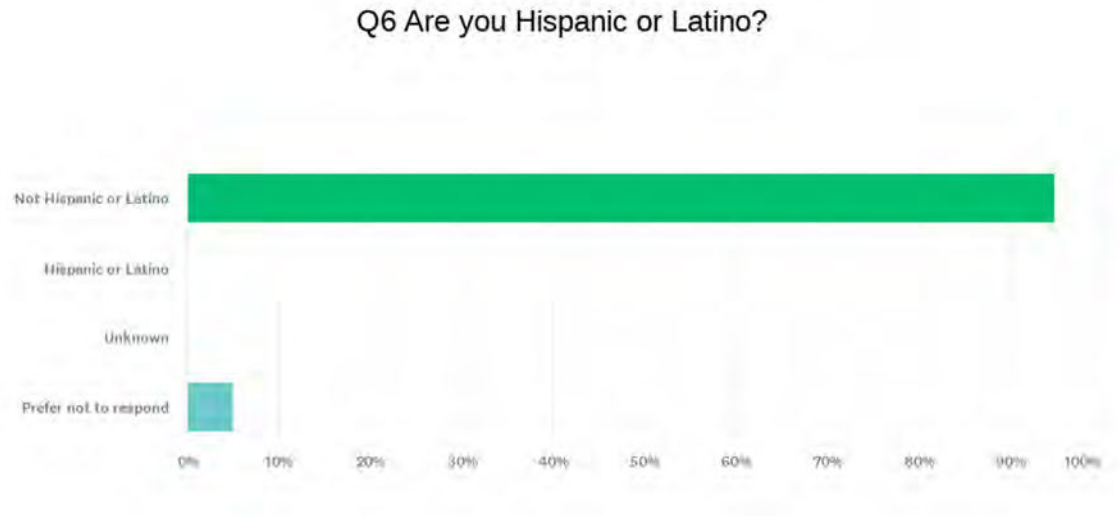

OPTIONAL: Is there anything else you would like to add about the health equity impact of this project that is not found in the above answers? (250 words max)

II. Mitigation Plan

If the project is approved, how has or will the Applicant mitigate any potential negative impacts to medically underserved groups identified in the Health Equity Impact Assessment? (1000 words max)

Please note: this narrative must be made available to the public and posted conspicuously on the Applicant's website until a decision on the application has been made.

New York State Department of Health

Health Equity Impact Assessment

Applicant: Pathways Nursing and Rehabilitation Center

Project Title: Convert 12 subacute care beds to 12 ventilator-dependent beds

Applicant Acknowledgement and Mitigation Plan

Prepared on DATE

The Applicant, Pathways Nursing and Rehabilitation Center (Pathways), hereby acknowledges receipt of the Health Equity Impact Assessment (HEIA) conducted by the Independent Entity (IE), Suburban Hospital Alliance of New York State, LLC , from January 16, 2026 to March 31, 2026, for the project titled above.

Based on the IE's findings of the HEIA, the project is not expected to have an adverse impact on the health equity of the patient population for the hospital. The addition of ventilator care capacity aims to address capacity constraints, and improve access to critical care for all patients, including higher risk populations such as the 65+, the racially and ethnically diverse, both of whom have higher prevalence of chronic conditions and comorbidities.

While this project will require the conversion of subacute care beds to ventilator-dependent beds, the IE does not believe that this will substantially or negatively impact medically underserved communities living in the service area who require subacute care. This is especially true in considering that there are significantly more residential healthcare programs offering subacute care throughout the service area than those with ventilator units. Instead, it is the IE's belief that the benefit of offering additional ventilator services will far outweigh any unintended impacts of the loss of subacute care beds.

Therefore, and at this time, Pathways does not expect to enact a robust mitigation plan to address health equity concerns as a result of this project.

Identifier (i.e., Patient A, Employee B, Respondent 1) or Name (only if requested by stakeholder)	Organization (if applicable)	Date(s) of outreach	What required stakeholder group did they represent? PREPARED FOR
PATHWAYS NURSING AND REHABILITATION

Health Equity Impact Assessment (HEIA) Proposal | January 20, 2026

CHALLENGE STATEMENT

OckhamHealth Strategists will complete an HEIA as required under New York State Public Health Law §2802-b to demonstrate how the project proposed in the client's Certificate of Need (CON) application will affect the accessibility and delivery of healthcare services to enhance health equity and contribute to mitigating health disparities in the client's proposed service area, specifically for medically underserved groups. The assessment is provided under the HEIA Complete℠ service line.

OUR EXPERIENCE

Suburban Hospital Alliance of New York State, LLC provides health equity independent assessment services through its OckhamHealth Strategists service line. Operating under SHANYS, OckhamHealth Strategists has demonstrated experience in health equity, community health and stakeholder engagement. Our staff directed the state's Population Health Improvement Program for five years, wherein we developed relationships with a broad array of community stakeholders and deployed a collective impact model that incorporated social determinant of health factors, health equity, health literacy, cultural competency, and health disparity reduction. Staff in all projects take into consideration the community context in which a proposed project is found. This translates into a historical scan of structural racism and other discriminatory practices that may affect any one medically underserved group's ability to access fair and equitable care. OckhamHealth Strategists staff members have undergone extensive racial justice training to enhance systemic analysis skills and to implement and sustain actions that advance racial equity in the practice of public health and health policy. The many stakeholder relationships we've nurtured continue to this day and continue to multiply. Our staff regularly employs a variety of meaningful engagement tactics and interprets their findings with quantitative and qualitative analyses. Staff is adept at working with and recognizing vulnerable populations in areas such as healthcare workforce, vaccine distribution, and public insurance enrollment.

ABOUT HEIA COMPLETE

HEIA Complete offers clients comprehensive Health Equity Impact Assessments (HEIAs) to accompany their Certificate of Need (CON) applications. Our approach to the HEIA process is exhaustive and complies with all New York State (NYS) Department of Health guidance. OckhamHealth Strategists meets the state-outlined qualifications to serve as an independent entity to perform HEIAs including expertise in health equity, anti-racism, and community stakeholder engagement. Assessors also bring dozens of years of expertise and experience in the study of healthcare access and delivery of healthcare services. This is another subject area preferred by the state to demonstrate an independent entity's qualification to conduct an HEIA. OckhamHealth Strategists employs a dedicated team of experts who work on HEIAs. These individuals are trained in participatory research and ethics and maintain ongoing education about racism, inequities, and disparities. OckhamHealth Strategists' assessors also attest to producing an objectively written assessment that clearly outlines how the facility's proposed project will impact access to and

delivery of health care services, particularly for members of medically underserved groups. A conflict-of-interest statement is signed and submitted with each HEIA.

PROJECT BACKGROUND

**The following project background reflects information communicated by the Applicant to OckhamHealth Strategists during the project's initial project meeting hosted on November 19th, 2025. The potential impacts described here are conveyed from the Applicant's perspective and do not reflect the IE's findings. Any HEIA findings submitted to NYSDOH are pursuant to an objective and thorough assessment of the proposed project's impact on access to and delivery of health care services, particularly for members of medically underserved groups.*

Pathways Nursing and Rehabilitation Center provides specialty care for individuals of all age groups with diverse health needs and medical complexities. The facility offers ventilator care, rehabilitation, and a traumatic brain injury program to adult and pediatric patient populations in the Capital Region of New York State. This Certificate of Need Application and HEIA will be written for the addition of twelve ventilator beds. Pathways Nursing and Rehabilitation Center is currently the only facility in the Capital Region offering adult ventilator beds.

TAILORED HEIA APPROACH

Through data analysis and meaningful engagement of stakeholders, this HEIA seeks to assess the health equity impact the proposed project may have upon the medically underserved populations as defined by the HEIA statute (including patients utilizing maternal and/or reproductive healthcare, if applicable). The following approach is partially informed by the discussions that took place during the initial kick-off meeting with facility leadership and key strategic staff members, held November 19th, 2025.

1. Research/Data Analytics

Please review the attached Data and Narrative Needs Checklist (**Attachment A**) for a list of required information and data needed for the completion of the HEIA.

- Review client's underlying CON application
- Internal meetings between OckhamHealth Strategists and Applicant as frequently as needed to refine messaging and fine-tune details
- Review/analysis of data scoping sheets 1 and 2 and develop a socio-economic profile of project service area using multiple data sources
- Analyze numerous data sources to identify impacted medically underserved groups, as well as past and projected utilization by these groups
- Research client's performance in providing indigent care and anticipated changes in indigent care demand
- Research access to transportation
- Review of providers offering similar services in the client's service area
- Conduct CBO search and list compilation as adjunct to CBO list provided by client
- As discussed at the kick-off meeting, the client is to provide the following project-specific data and information:
    - Similar projects within the last five years
    - Physician and professional staffing issues related to the project, or any anticipated staffing issues that might result from the project
    - History of civil rights access complaints for the past 10 years

- Extent to which project will reduce architectural barriers for people with mobility impairments and, if available, any information about how this will affect patient access
- Client's plan to inform community of project, including to groups of individuals with limited English-speaking ability and people with speech, hearing, or visual impairments
- Client's health equity efforts and monitoring capabilities, existing mechanisms and measures
- Community advisory board members, if applicable, and list of community-based organization leaders
- Data needs
  - Historical and projected utilization of patients using ventilator beds, which will reveal utilization patterns related to diagnoses, age, gender, ethnicity, etc.
  - Service area zip codes (Must match CON application)
  - Completed data scoping sheets 1 and 2.
  - Historical market share analysis and methodology.

2. Meaningful Engagement of Stakeholders

The following meaningful engagement tactics may be employed to engage community advisory board members, department of health commissioners and/or representatives, local government representatives, facility representatives, client employees that will be impacted by project, local community-based organizations, and consumers/residents of project's service area. This may include:

A. Community Resident Survey:
   - Target audience: Families and community members residing in the Applicant service area.
   - Execution: On-site using surveys (flyers and/or posters with QR codes containing a link to a digital survey) and physical surveys. Applicant will place the outreach material in visible spaces in their facility. Staff members may encourage patients and patient family members to complete the survey using a script provided by the IE. IE and Applicant to communicate on response rate and completion of engagement process. Physical surveys will be collected by an on-site staff member and emailed/mailed to IE at the conclusion of the engagement period.
   - Translation of physical outreach material into languages other than English to be done according to service area and patient population.

B. Key Informant Interviews via Zoom or Phone Call with Community Leaders and Professionals:
   - Target audience: Community leaders who are actively involved in similar care or address social determinants of health in the Applicant service area.
   - Applicant and IE to identify relevant partners through organizational partnerships and online resources.
   - Execution: The primary ME tactic for this group will be interviews and/or focus groups. Interviews will be completed via Zoom or phone call, recorded, transcribed, and qualitatively analyzed for key themes and focus areas with review by two coders to ensure inter-coder reliability; accessibility accommodations made upon request. *A digital survey will also be created for use among stakeholders that are, for any reason, unable to complete an interview.* A minimum of three outreach attempts will be made for all identified stakeholders.

C. Key Informant Interviews via Zoom or Phone Call with Employees or Organizations Representing Employees ME:

- Target audience: Professionals working in or with the facility. This may include clinical staff members and frontline providers, patient experience staff, and/or union representatives.
- Execution: Interviews completed via Zoom or phone call, recorded, transcribed, and qualitatively analyzed for key themes and focus areas with review by two coders to ensure inter-coder reliability.

D. Key Informant Interviews via Zoom or Phone Call with local Department of Health (DOH) staff:
   - Target audience: Department of Health (DOH) staff from county or counties serviced by the Applicant facility or program.
   - Execution: Interview completed via Zoom or phone call, recorded, transcribed, and qualitatively analyzed for key themes and focus areas with review by two coders to ensure inter-coder reliability. *A digital survey will also be created for use among stakeholders that are, for any reason, unable to complete an interview.*

3. Report Development and Revisions

- Development of independent assessment report, including recommendations for mitigation and monitoring
- Completion of meaningful engagement scoping sheet
- Report preparation, writing, editing, and client executive review

4. Post-Submission Revisions

- Included in the project price are five hours of consultant labor for any revisions that may be required by the Department of Health, post-submission. Any consultant time beyond those five hours will be billed at an hourly rate of $165.

TIMELINE

- Week 1-2: Review materials received from client; develop survey and key informant interview questions; develop script for interviews; compile list of relevant CBOs and stakeholders to interview
- Week 3: Develop surveys and order printed materials; plan key informant interviews
- Week 4: Disseminate community survey; Conduct key informant interview(s) and focus group(s); continue outreach for other interviews; launch social media boosting
- Week 5: Review interview transcript and prepare for qualitative analysis; perform qualitative analysis; download and analyze digital surveys; quantitatively analyze survey responses
- Week 6-7: Tie up loose ends; write report and review

**Timeline subject to change based on receipt of required items from client, any outstanding logistical issues, the client's timely approval of materials and the number of key informant interviews that may be required.*

PROJECT PRICE/BILLING SCHEDULE:

Terms of Payment: Client will be invoiced for 50% of the project cost upon executing the Work Order and invoiced the remaining 50% when the completed HEIA and all schedules have been submitted. Payment due within 30 days of receipt.

Acceptance of this Proposal: $26,930

Health Equity Impact Assessment Conflict-of-Interest

This Conflict-of-Interest form must be completed in full, signed by the Independent Entity, and submitted with the Health Equity Impact Assessment.

Section 1 – Definitions

Independent Entity means individual or organization with demonstrated expertise and experience in the study of health equity, anti-racism, and community and stakeholder engagement, and with preferred expertise and experience in the study of health care access or delivery of health care services, able to produce an objective written assessment using a standard format of whether, and if so how, the facility's proposed project will impact access to and delivery of health care services, particularly for members of medically underserved groups.

Conflict of Interest shall mean having a financial interest in the approval of an application or assisting in drafting any part of the application on behalf of the facility, other than the health equity assessment.

Section 2 – Independent Entity

What does it mean for the Independent Entity to have a conflict of interest? For the purpose of the Health Equity Impact Assessment, if one or a combination of the following apply to the Independent Entity, the Independent Entity **HAS** a conflict of interest and must **NOT** perform the Health Equity Impact Assessment:

- The Independent Entity helped compile or write any part of the Certificate of Need (CON) application being submitted for this specific project, other than the Health Equity Impact Assessment (for example, individual(s) hired to compile the Certificate of Need application for the facility's project cannot be the same individual(s) conducting the Health Equity Impact Assessment);
- The Independent Entity has a financial interest in the outcome of this specific project's Certificate of Need application (i.e. individual is a member of the facility's Board of Directors or advisory board); or
- The Independent Entity has accepted or will accept a financial gift or incentive from the Applicant above fair market value for the cost of performing the Health Equity Impact Assessment.

Section 3 – General Information

A. About the Independent Entity

1. Name of Independent Entity: **Suburban Hospital Alliance of New York State, LLC**
2. Is the Independent Entity a division/unit/branch/associate of an organization (Y/N)? **No**
   - ❑ If yes, indicate the name of the organization:

     _____

3. Is the Independent Entity able to produce an objective written Health Equity Impact Assessment on the facility's proposed project (Y/N)? **Yes**
4. Briefly describe the Independent Entity's previous experience working with the Applicant. Has the Independent Entity performed any work for the Applicant in the last 5 years?
   Suburban Hospital Alliance of New York State, LLC provides health equity independent assessment services through its OckhamHealth Strategists service line for all Article 28 facilities that are required to complete an HEIA as part of their CONs. Suburban Hospital Alliance of New York State, LLC has performed no previous work for the applicant.

Section 4 – Attestation

I, Maria Gallina (individual name), having personal knowledge and the authority to execute this Conflict of Interest form on behalf of the Suburban Hospital Alliance of New York State, LLC, (INDEPENDENT ENTITY), do hereby attest that the Health Equity Impact Assessment for the project: Conversion of Subacute Care Beds to Ventilator-Dependent Beds (PROJECT NAME) provided for Pathways Nursing and Rehabilitation Center (APPLICANT) has been conducted in an independent manner and without a conflict of interest as defined in Title 10 NYCRR § 400.26.

I further attest that the information provided by the INDEPENDENT ENTITY in the Health Equity Impact Assessment is true and accurate to the best of my knowledge and fulfills the intent of the Health Equity Impact Assessment requirement.

Signature of Independent Entity: 

Date: April 9, 2026

New York State Department of Health
Certificate of Need Application

Schedule 1

Acknowledgement and Attestation

I hereby certify, under penalty of perjury, that I am duly authorized to subscribe and submit this application on behalf of the applicant: Pathways Nursing and Rehabilitation Center

I further certify that the information contained in this application and its accompanying schedules and attachments are accurate, true and complete in all material respects. I acknowledge and agree that this application will be processed in accordance with the provisions of articles 28, 36 and 40 of the public health law and implementing regulations, as applicable.

Upload as an attachment to Schedule 1, the list of facilities/agencies referenced above, in the format depicted below: ***Not Applicable***

Facility Type	Facility Name	Operating Certificate or License Number	Facility ID (PFI)

Out-of-State Affiliated Facilities/Agencies ***Not Applicable***

In addition to in-state facilities, please upload, as an attachment to Schedule 1, a list of all health care, adult care, behavioral, or mental health facilities, programs or agencies located outside New York State that are affiliated with the applicant legal entity, as well as with parent, member and subsidiary corporations, in the format depicted below.

Facility Type	Name	Address	State/Country	Services Provided

In conjunction with this list, you will need to provide documentation from the regulatory agency in the state(s) where affiliations are noted, reflecting that the facilities/programs/agencies have operated in substantial compliance with applicable codes, rules and regulations for the past ten (10) years (or for the period of the affiliation, whichever is shorter). More information regarding this requirement can be found in Schedule 2D.

Working Capital Financing Plan

1. Working Capital Financing Plan and Pro Forma Balance Sheet:

This section should be completed in conjunction with the monthly Cash Flow. The general guidelines for working capital requirements are two months of first year expenses for changes of ownership and two months' of third year expenses for new establishments, construction projects or when the first year budget indicates a net operating loss. Any deviation from these guidelines must be supported by the monthly cash flow analysis. If working capital is required for the project, all sources of working capital must be indicated clearly. Borrowed funds are limited to 50% of total working capital requirements and cannot be a line of credit. Terms of the borrowing cannot be longer than 5 years or less than 1 year. If borrowed funds are a source of working capital, please summarize the terms below, and attach a letter of interest from the intended source of funds, to include an estimate of the principal, term, interest rate and payout period being considered. Also, describe and document the source(s) of working capital equity.

Titles of Attachments Related to Borrowed Funds	Filenames of Attachments
Example: *First borrowed fund source*	Example*: first_bor_fund.pdf*
Not Applicable	

In the section below, briefly describe and document the source(s) of working capital equity

Working capital will be provided through the ongoing operations of Pathways Nursing and Rehabilitation Center. Please refer to Schedule 9 Attachment for the 2024 audited financial statement of the applicant, as well as a recent internal financial statement. Please also refer to Schedule 5 Attachment for a cash flow analysis for the first year of operation after project completion.

2. Pro Forma Balance Sheet

This section should be completed for all new establishment and change in ownership applications. On a separate attachment identified below, provide a pro forma (opening day) balance sheet. If the operation and real estate are to be owned by separate entities, provide a pro forma balance sheet for each entity. Fully identify all assumptions used in preparation of the pro forma balance sheet. If the pro forma balance sheet(s) is submitted in conjunction with a change in ownership application, on a line-by-line basis, provide a comparison between the submitted pro forma balance sheet(s), the most recently available facility certified financial statements and the transfer agreement. Fully explain and document all assumptions.

Schedule 6
Architectural/Engineering Submission

Contents:

- **Schedule 6 – Architectural/Engineering Submission**

New York State Department of Health Certificate of Need Application

Schedule 6

Architectural Submission Requirements for Contingent Approval and Contingency Satisfaction

Schedule applies to all projects with construction, including Articles 28 & 40, i.e., Hospitals, Diagnostic and Treatment Centers, Residential Health Care Facilities, and Hospices.

Instructions

- Provide Architectural/Engineering Narrative using the format below.
- Provide Architect/Engineer Certification form:
  - Architect's Letter of Certification for Proposed Construction or Renovation for Projects That Will Be Self-Certified. Self-Certification Is Not an Option for Projects over $15 Million, or Projects Requiring a Waiver (PDF)
  - Architect's Letter of Certification for Proposed Construction or Renovation Projects to Be Reviewed by DOH or DASNY. (PDF) (Not to Be Submitted with Self-Certification Projects)
  - Architect's Letter of Certification for Completed Projects (PDF)
  - Architect's or Engineer's Letter of Certification for Inspecting Existing Buildings (PDF)
- Provide FEMA BFE Certificate. Applies only to Hospitals and Nursing Homes.
  - FEMA Elevation Certificate and Instructions.pdf
- Provide Functional Space Program: A list that enumerates project spaces by floor indicating size by gross floor area and clear floor area for the patient and resident spaces.
- For projects with imaging services, provide Physicist's Letter of Certification and Physicist's Report including drawings, details and supporting information at the design development phase.
  - Physicist's Letter of Certification (PDF)
- Provide Architecture/Engineering Drawings in PDF format created from the original electronic files; scans from printed drawings will not be accepted. Drawing files less than 100 MB, and of the same trade, may be uploaded as one file.
  - NYSDOH and DASNY Electronic Drawing Submission Guidance for CON Reviews
  - DSG-1.0 Schematic Design & Design Development Submission Requirements
- Refer to the Required Attachment Table below for the Schematic Design Submission requirements for Contingent Approval and the Design Development Submission requirements for Contingency Satisfaction.
  - Attachments must be labeled accordingly when uploading in NYSE-CON.
  - Do not combine the Narrative, Architectural/Engineering Certification form and FEMA BFE Certificate into one document.
  - If submitted documents require revisions, provide an updated Schedule 6 with the revised information and date within the narrative.

Architecture/Engineering Narrative

Narrative shall include but not limited to the following information. Please address all items in the narrative including items located in the response column. Incomplete responses will not be accepted.

Project Description	
Schedule 6 submission date: 2/13/2026	Revised Schedule 6 submission date: Click to enter a date.
Does this project amend or supersede prior CON approvals or a pending application? Choose an item. If so, what is the original CON number? Click here to enter text.	
Intent/Purpose: Convert 12 existing general residential health care facility (RHCF) beds to 12 Ventilator-dependent beds on an existing second floor unit. There is no construction required for this project.	
Site Location: 1805 Providence Ave, Niskayuna, NY 12309	

Brief description of current facility, including facility type: Current facility is a mix of Ventilator-dependent, TBI and general RHCF beds, consisting of a Type 2 (111) building.	
Brief description of proposed facility: Facility two stories, Construction Type 2 (111) and built with non-combustible materials. Proposed bed conversion units are currently ventilator unit code compliant as part of a previous renovation.	
Location of proposed project space(s) within the building. Note occupancy type for each occupied space. Proposed ventilator unit is on the second floor and adjacent to the current ventilator unit both of Occupancy Type I-2.	
Indicate if mixed occupancies, multiple occupancies and or separated occupancies. Describe the required smoke and fire separations between occupancies: Entire facility is Occupancy Type I-2 and spaces supporting the residents and operations.	
If this is an existing facility, is it currently a licensed Article 28 facility?	Yes
Is the project space being converted from a non-Article 28 space to an Article 28 space?	No
Relationship of spaces conforming with Article 28 space and non-Article 28 space: Proposed space is currently Article 28 licensed and previously constructed as a ventilator compliant unit.	
List exceptions to the NYSDOH referenced standards. If requesting an exception, note each on the Architecture/Engineering Certification form under item #3. N/A	
Does the project involve heating, ventilating, air conditioning, plumbing, electrical, water supply, and fire protection systems that involve modification or alteration of clinical space, services or equipment such as operating rooms, treatment, procedure rooms, and intensive care, cardiac care , other special care units (such as airborne infection isolation rooms and protective environment rooms), laboratories and special procedure rooms, patient or resident rooms and or other spaces used by residents of residential health care facilities on a daily basis? If so, please describe below. Click here to enter text.	No
Provide brief description of the existing building systems within the proposed space and overall building systems, including HVAC systems, electrical, plumbing, etc. Existing HVAC system is for the proposed unit is gas fired roof top units supply heat/AC to each resident room and common spaces. Electrical System was upgraded in 2016 to be Type 1 compliant as required for piped oxygen and vacuum facilities. Proposed beds are currently piped with oxygen and vacuum connections.	
Describe scope of work involved in building system upgrades and or replacements, HVAC systems, electrical, Sprinkler, etc. No work involved as it is currently compliant.	
Describe existing and or new work for fire detection, alarm, and communication systems: No work involved as it is currently compliant and there are no physical building renovations.	
If a hospital or nursing home located in a flood zone, provide a FEMA BFE Certificate from www.fema.gov, and describe the work to mitigate damage and maintain operations during a flood event. N/A	
Does the project contain imaging equipment used for diagnostic or treatment purposes? If yes, describe the equipment to be provided and or replaced. Ensure physicist's letter of certification and report are submitted. Click here to enter text.	
Does the project comply with ADA? If no, list all areas of noncompliance. Complies	
Other pertinent information: Click here to enter text.	

Project Work Area	**Response**
Type of Work	No Construction
Square footages of existing areas, existing floor and or existing building.	7,692 SF
Square footages of the proposed work area or areas. Provide the aggregate sum of the work areas.	No construction

Does the work area exceed more than 50% of the smoke compartment, floor or building?	Less than 50% of the floor
Sprinkler protection per NFPA 101 Life Safety Code	Sprinklered throughout
Construction Type per NFPA 101 Life Safety Code and NFPA 220	Type II (111)
Building Height	24'-4" +/-
Building Number of Stories	2
Which edition of FGI is being used for this project?	2018 Edition of FGI
Is the proposed work area located in a basement or underground building?	Not Applicable
Is the proposed work area within a windowless space or building?	Not Applicable
Is the building a high-rise?	No
If a high-rise, does the building have a generator?	Not Applicable
What is the Occupancy Classification per NFPA 101 Life Safety Code?	Chapter 18 New Health Care Occupancy
Are there other occupancy classifications that are adjacent to or within this facility? If yes, what are the occupancies and identify these on the plans. Click here to enter text.	No
Will the project construction be phased? If yes, how many phases and what is the duration for each phase? Click here to enter text.	No
Does the project contain shell space? If yes, describe proposed shell space and identify Article 28 and non-Article 28 shell space on the plans. Click here to enter text.	No
Will spaces be temporarily relocated during the construction of this project? If yes, where will the temporary space be? Click here to enter text.	No
Does the temporary space meet the current DOH referenced standards? If no, describe in detail how the space does not comply. Click here to enter text.	Not Applicable
Is there a companion CON associated with the project or temporary space? If so, provide the associated CON number. Click here to enter text.	Not Applicable
Will spaces be permanently relocated to allow the construction of this project? If yes, where will this space be? Click here to enter text.	Not Applicable
Changes in bed capacity? If yes, enumerate the existing and proposed bed capacities. Click here to enter text.	No Change
Changes in the number of occupants? If yes, what is the new number of occupants? Click here to enter text.	No
Does the facility have an Essential Electrical System (EES)? If yes, which EES Type? Type 1	Yes
If an existing EES Type 1, does it meet NFPA 99 -2012 standards?	Yes
Does the existing EES system have the capacity for the additional electrical loads? Click here to enter text.	Not Applicable
Does the project involve Operating Room alterations, renovations, or rehabilitation? If yes, provide brief description. Click here to enter text.	No
Does the project involve Bulk Oxygen Systems? If yes, provide brief description. It is an existing System meeting current codes.	Yes
If existing, does the Bulk Oxygen System have the capacity for additional loads without bringing in additional supplemental systems?	Not Applicable
Does the project involve a pool?	No

CONSTRUCTION PROJECT CERTIFICATION LETTER FOR AER REVIEWS ARCHITECTS & ENGINEERS

(For projects not meeting the prerequisites for Self-Certification submission.)

Date: 2/12/26
CON Number: To be assigned
Facility Name: Pathways Nursing and Rehabilitation Center
Facility ID Number: PFI 4092
Facility Address: 1805 Providence Avenue, Niskayuna (Schenectady County), New York 12309

NYS Department of Health/Office of Health Systems Management
Center for Health Care Facility Planning, Licensure, and Finance
Bureau of Architectural and Engineering Review
ESP, Corning Tower, 18th Floor
Albany, New York 12237

To The New York State Department of Health:

I hereby certify that:

1. I have been retained by the aforementioned facility, to provide professional architectural/engineering services related to the design and preparation of construction documents, including drawings and specifications for the aforementioned project. During the course of construction, periodic site observation visits will be performed, and the necessary standard of care, noting progress, quality and ensuring conformance of the work with documents provided for all regulatory approvals associated with the aforementioned project.

2. I have ascertained that, to the best of my knowledge, information and belief, the completed structure will be designed and constructed, in accordance with the functional program for the referenced construction project and in accordance with any project definitions, waivers or revisions approved or required by the New York State Department of Health.

3. The above-referenced construction project will be designed and constructed in compliance with all applicable local codes, statutes, and regulations, and the applicable provisions of the State Hospital Code -- 10 NYCRR Part 711 (General Standards for Construction) and Parts (check all that apply):

   a. __712 (Standards of Construction for General Hospital Facilities)
   b. X 713 (Standards of Construction for Nursing Home Facilities)
   c. __714 (Standards of Construction for Adult Day Health Care Program Facilities)
   d. __715 (Standards of Construction for Freestanding Ambulatory Care Facilities)
   e. __716 (Standards of Construction for Rehabilitation Facilities)
   f. __717 (Standards of Construction for New Hospice Facilities and Units)

   PLEASE NOTE ANY EXCEPTIONS HERE:

   _____

   _____

4. I understand that as the design of this project progresses, if a component of this project is inconsistent with the State Hospital Code (10 NYCRR Parts 711, 712, 713, 714, 715, 716, or 717), I shall bring this to the attention of the Bureau of Architecture and Engineering Review (BAER) of the New York State Department of Health prior to or upon submitting final drawings for compliance resolution.

5. I understand that upon completion of construction, the costs of any subsequent corrections necessary to achieve compliance with applicable requirements of 10 NYCRR Parts 711, 712, 713, 714, 715, 716 and 717, when the prior work was not completed properly as certified herein, may not be considered allowable costs for reimbursement under 10 NYCRR Part 86.

This certification is being submitted to facilitate the CON review and subsequent to formal plan approval by your office. It is understood that an electronic copy of final Construction Documents on CD, meeting the requirements of DSG-05 must be submitted to PMU for all projects, including limited, administrative, full review, self-certification and reviews performed and completed by DASNY.

Project Name: Pathways Nursing and Rehabilitation Center

Location: 1805 Providence Avenue, Niskayuna (Schenectady County), New York 12309

Description: Convert 12 general RHCF bed to 12 ventilator-dependent beds with no construction

Architectural or Engineering Professional

Signature of Architect or Engineer

James R. Glenn
Name of Architect or Engineer (Print)

042533
Professional New York State License Number

30 Essex Street; Albany, NY 12206
Business Address

The undersigned applicant understands and agrees that, notwithstanding this architectural/engineering certification the Department of Health shall have continuing authority to (a) review the plans submitted herewith and/or inspect the work with regard thereto, and (b) withdraw its approval thereto. The applicant shall have a continuing obligation to make any changes required by the Division to comply with the above-mentioned codes and regulations, whether or not physical plant construction or alterations have been completed.

Authorized Signature for Applicant

2/2/2026	William Wohltjen	Administrator
Date	Name (Print)	Title

Notary signing required for the applicant

STATE OF NEW YORK)
) SS:
County of Schenectady)

On the 2nd day of February 20 26, before me personally appeared William Wohltjen, to me known, who being by me duly sworn, did depose and say that he/she is the Administrator of the skilled nursing facility, the facility described herein which executed the foregoing instrument; and that he/she signed his/her name thereto by order of the governing authority of said facility.

Schedule LRA 4/Schedule 7
CON Forms Regarding
Environmental issues

Contents:

Schedule LRA 4/Schedule 7 - Environmental Assessment

Environmental Assessment

Part I.	The following questions help determine whether the project is "significant" from an environmental standpoint.	Yes	No
1.1	If this application involves establishment, will it involve more than a change of name or ownership only, or a transfer of stock or partnership or membership interests only, or the conversion of existing beds to the same or lesser number of a different level of care beds? **N/A**	☐	☒
1.2	Does this plan involve construction and change land use or density?	☐	☒
1.3	Does this plan involve construction and have a permanent effect on the environment if temporary land use is involved?	☐	☒
1.4	Does this plan involve construction and require work related to the disposition of asbestos?	☐	☒
Part II.	If any question in Part I is answered "yes" the project may be significant, and Part II must be completed. If all questions in Part II are answered "no" it is likely that the project is not significant. **N/A**	**Yes**	**No**
2.1	Does the project involve physical alteration of ten acres or more?	☐	☐
2.2	If an expansion of an existing facility, is the area physically altered by the facility expanding by more than 50% and is the total existing and proposed altered area ten acres or more?	☐	☐
2.3	Will the project involve use of ground or surface water or discharge of wastewater to ground or surface water in excess of 2,000,000 gallons per day?	☐	☐
2.4	If an expansion of an existing facility, will use of ground or surface water or discharge of wastewater by the facility increase by more than 50% and exceed 2,000,000 gallons per day?	☐	☐
2.5	Will the project involve parking for 1,000 vehicles or more?	☐	☐
2.6	If an expansion of an existing facility, will the project involve a 50% or greater increase in parking spaces and will total parking exceed 1000 vehicles?	☐	☐
2.7	In a city, town, or village of 150,000 population or fewer, will the project entail more than 100,000 square feet of gross floor area?	☐	☐
2.8	If an expansion of an existing facility in a city, town, or village of 150,000 population or fewer, will the project expand existing floor space by more than 50% so that gross floor area exceeds 100,000 square feet?	☐	☐
2.9	In a city, town or village of more than 150,000 population, will the project entail more than 240,000 square feet of gross floor area?	☐	☐
2.10	If an expansion of an existing facility in a city, town, or village of more than 150,000 population, will the project expand existing floor space by more than 50% so that gross floor area exceeds 240,000 square feet?	☐	☐
2.11	In a locality without any zoning regulation about height, will the project contain any structure exceeding 100 feet above the original ground area?	☐	☐
2.12	Is the project wholly or partially within an agricultural district certified pursuant to Agriculture and Markets Law Article 25, Section 303?	☐	☐
2.13	Will the project significantly affect drainage flow on adjacent sites?	☐	☐

2.14	Will the project affect any threatened or endangered plants or animal species?	☐	☐
2.15	Will the project result in a major adverse effect on air quality?	☐	☐
2.16	Will the project have a major effect on visual character of the community or scenic views or vistas known to be important to the community?	☐	☐
2.17	Will the project result in major traffic problems or have a major effect on existing transportation systems?	☐	☐
2.18	Will the project regularly cause objectionable odors, noise, glare, vibration, or electrical disturbance as a result of the project's operation?	☐	☐
2.19	Will the project have any adverse impact on health or safety?	☐	☐
2.20	Will the project affect the existing community by directly causing a growth in permanent population of more than five percent over a one-year period or have a major negative effect on the character of the community or neighborhood?	☐	☐
2.21	Is the project wholly or partially within, or is it contiguous to any facility or site listed on the National Register of Historic Places, or any historic building, structure, or site, or prehistoric site, that has been proposed by the Committee on the Registers for consideration by the New York State Board on Historic Preservation for recommendation to the State Historic Officer for nomination for inclusion in said National Register?	☐	☐
2.22	Will the project cause a beneficial or adverse effect on property listed on the National or State Register of Historic Places or on property which is determined to be eligible for listing on the State Register of Historic Places by the Commissioner of Parks, Recreation, and Historic Preservation?	☐	☐
2.23	Is this project within the Coastal Zone as defined in Executive Law, Article 42? If Yes, please complete Part IV.	☐	☐
Part III.		**Yes**	**No**
3.1	Are there any other state or local agencies involved in approval of the project? If so, fill in Contact Information to Question 3.1 below.	☐	☒
	Agency Name:		
	Contact Name:		
	Address:		
	State and Zip Code:		
	E-Mail Address:		
	Phone Number:		
	Agency Name:		
	Contact Name:		
	Address:		
	State and Zip Code:		
	E-Mail Address:		
	Phone Number:		
	Agency Name:

	Address:			
	State and Zip Code:			
	E-Mail Address:			
	Phone Number:			
	Agency Name:			
	Contact Name:			
	Address:			
	State and Zip Code:			
	E-Mail Address:			
	Phone Number:			
3.2	Has any other agency made an environmental review of this project? If so, give name, and submit the SEQRA Summary of Findings with the application in the space provided below.		Yes ☐	No ☒
	Agency Name:			
	Contact Name:			
	Address:			
	State and Zip Code:			
	E-Mail Address:			
	Phone Number:			
3.3	Is there a public controversy concerning environmental aspects of this project? If yes, briefly describe the controversy in the space below.		Yes ☐	No ☒
Part IV.	**Storm and Flood Mitigation**			
	Definitions of FEMA Flood Zone Designations			
	Flood zones are geographic areas that the FEMA has defined according to varying levels of flood risk. These zones are depicted on a community's Flood Insurance Rate Map (FIRM) or Flood Hazard Boundary Map. Each zone reflects the severity or type of flooding in the area.			
	Please use the FEMA Flood Designations scale below as a guide to answering all Part IV questions regardless of project location, flood and or evacuation zone.		Yes	No
4.1	Is the proposed site located in a flood plain? If Yes, indicate classification below and provide the Elevation Certificate (FEMA Flood Insurance).		☐	☒
	Moderate to Low Risk Area		Yes	No
	Zone	**Description**	☐	☒
	In communities that participate in the NFIP, flood insurance is available to all property owners and renters in these zones:			
	B and X	Area of moderate flood hazard, usually the area between the limits of the 100-year and 500-year floods. Are also used to designate base floodplains of lesser hazards, such as areas protected by levees from 100-year flood, or shallow flooding areas with average depths of less than one foot or drainage areas less than 1 square mile.	☐	

	C and X	Area of minimal flood hazard, usually depicted on FIRMs as above the 500-year flood level.	☐	
	High Risk Areas		**Yes**	**No**
	Zone	**Description**	☐	☒
	In communities that participate in the NFIP, mandatory flood insurance purchase requirements apply to all these zones:			
	A	Areas with a 1% annual chance of flooding and a 26% chance of flooding over the life of a 30-year mortgage. Because detailed analyses are not performed for such areas; no depths or base flood elevations are shown within these zones.	☐	
	AE	The base floodplain where base flood elevations are provided. AE Zones are now used on new format FIRMs instead of A1-A30.	☐	
	A1-30	These are known as numbered A Zones (e.g., A7 or A14). This is the base floodplain where the FIRM shows a BFE (old format).	☐	
	AH	Areas with a 1% annual chance of shallow flooding, usually in the form of a pond, with an average depth ranging from 1 to 3 feet. These areas have a 26% chance of flooding over the life of a 30-year mortgage. Base flood elevations derived from detailed analyses are shown at selected intervals within these zones.	☐	
	AO	River or stream flood hazard areas, and areas with a 1% or greater chance of shallow flooding each year, usually in the form of sheet flow, with an average depth ranging from 1 to 3 feet. These areas have a 26% chance of flooding over the life of a 30-year mortgage. Average flood depths derived from detailed analyses are shown within these zones.	☐	
	AR	Areas with a temporarily increased flood risk due to the building or restoration of a flood control system (such as a levee or a dam). Mandatory flood insurance purchase requirements will apply, but rates will not exceed the rates for unnumbered A zones if the structure is built or restored in compliance with Zone AR floodplain management regulations.	☐	
	A99	Areas with a 1% annual chance of flooding that will be protected by a Federal flood control system where construction has reached specified legal requirements. No depths or base flood elevations are shown within these zones.	☐	
	High Risk Coastal Area		**Yes**	**No**
	Zone	**Description**		
	In communities that participate in the NFIP, mandatory flood insurance purchase requirements apply to all these zones:			
	Zone V	Coastal areas with a 1% or greater chance of flooding and an additional hazard associated with storm waves. These areas have a 26% chance of flooding over the life of a 30-year mortgage. No base flood elevations are shown within these zones.	☐	☒
	VE, V1 - 30	Coastal areas with a 1% or greater chance of flooding and an additional hazard associated with storm waves. These areas have a 26% chance of flooding over the life of a 30-year mortgage. Base flood elevations derived from detailed analyses are shown at selected intervals within these zones.	☐	
	Undetermined Risk Area		**Yes**	**No**
	Zone	**Description**	☐	☒

	D	Areas with possible but undetermined flood hazards. No flood hazard analysis has been conducted. Flood insurance rates are commensurate with the uncertainty of the flood risk.		
4.2	Are you in a designated evacuation zone?		☐	☒
	If Yes, the Elevation Certificate (FEMA Flood Insurance) shall be submitted with the application.			
	If yes which zone is the site located in?			
4.3	Does this project reflect the post Hurricane Lee, and or Irene, and Superstorm Sandy mitigation standards?		☐	☒
	If Yes, which floodplain?	100 Year	☐	
		500 Year	☐	

The Elevation Certificate provides a way for a community to document compliance with the community's floodplain management ordinance.

Schedule 8A Summarized Project Cost and Construction Dates

This schedule is required for all Establishment Applications and Full or Administrative Review Construction Applications.

1.) Project Cost Summary data:

	Total	Source
Project Description:		
Project Cost	$0	Schedule 8b, column C, line 8
Total Basic Cost of Construction	$0	Schedule 8B, column C, line 6
Total Cost of Moveable Equipment	$0	Schedule 8B, column C, line 5.1
Cost/Per Square Foot for New Construction	N/A	Schedule 10
Cost/Per Square Foot for Renovation Construction	N/A	Schedule10
Total Operating Cost	$28,602,568	Schedule 13C, column B
Amount Financed (as $)	$0	Schedule 9
Percentage Financed as % of Total Cost	0%	Schedule 9
Depreciation Life (in years)	Schedule 13 Attachment	

2) Construction Dates

Anticipated Start Date	N/A	Schedule 8B
Anticipated Completion Date	N/A	

New York State Department of Health
Certificate of Need Application
Schedule 8B - Total Project Cost - For Projects without Subprojects.
For Article 28, 36, and 40 Establishment & Construction Requiring Full, Administrative or Limited Review
For Limited Review, escalation amounts may be entered as "0".

Constants:	Value	Comments:
Design Contingency - New Construction	10.00%	Normally 10%
Construction Contingency - New Construction	5.00%	Normally 5%
Design Contingency - Renovation Work	10.00%	Normally 10%
Construction Contingency - Renovation Work	10.00%	Normally 10%
Construction Start Date:	N/A	as mm/dd/yyyy
Midpoint of Construction Date	N/A	as mm/dd/yyyy
Completion of Construction Date	N/A	as mm/dd/yyyy
Year used to compute Current Dollars:	2026	

Subject of attachment:	Attachment Number	Filename of attachment - PDF
For new construction and addition, at the schematic stage the design contingency will be normally be 10% and the construction contingency will be 5%. If your percentages are otherwise, please explain in an attachment	N/A	N/A
For renovation, the design contingency will normally be 10% and the construction contingency will be 10%. If your percentages are otherwise, please explain in an attachment	N/A	N/A

Application fees: 9.1 Application Fee $2,000. Only applies to Article 28.	$2,000		$2,000
9.2 Additional Processing Fee for projects wiith capital costs. Not applicable to "Establishment Only" projects. See website for applicable fees. (Line 8, multiplied by the appropraiite percentage.). Enter Multiplier, i.e., .25%=0.0025 0.003	$0		$0
10 Total Project Cost with CON fees	$2,000	$0	$2,000

Schedule 9 Proposed Plan for Project Financing:

I. Summary of Proposed Financial plan

Check all that apply and fill in corresponding amounts.

	Type	Amount
☐	A. Lease	
☒	B. Cash	$2,000
☐	C. Mortgage, Notes, or Bonds	
☐	D. Land	
☐	E. Other	
☒	F. Total Project Financing (Sum A to E) (equals line 10, Column C of Sch. 8b)	$2,000

If refinancing is used, please complete area below.

☐	Refinancing	$
☐	Total Mortgage/Notes/Bonds (Sum E + Refinancing)	$

II. Details

A. Leases **N/A**

	N/A	Title of Attachment
1. List each lease with corresponding cost as if purchased each leased item. Breakdown each lease by total project cost and subproject costs, if applicable.	☒	
2. Attach a copy of the proposed lease(s).	☒	
3. Submit an affidavit indicating any business or family relationships between principals of the landlord and tenant.	☒	
4. If applicable, provide a copy of the lease assignment agreement and the Landlord's consent to the proposed lease assignment.	☒	
5. If applicable, identify separately the total square footage to be occupied by the Article 28 facility and the total square footage of the building.	☒	
6. Attach two letters from independent realtors verifying square footage rate.	☒	
7. For all capital leases as defined by FASB Statement No. 13, "Accounting for Leases", provide the net present value of the monthly, quarterly or annual lease payments.	☒	

B. Cash

Type	Amount
Accumulated Funds	$2,000
Sale of Existing Assets	
Gifts (fundraising program)	
Government Grants	
Other –	
TOTAL CASH	$2,000

	N/A	Title of Attachment
1. Provide a breakdown of the sources of cash. See sample table above.	☐	See above table.
2. Attach a copy of the latest certified financial statement and current internal financial reports to cover the balance of time to date. If applicable, address the reason(s) for any operational losses, negative working capital and/or negative equity or net asset position and explain in detail the steps implemented to improve operations. In establishment applications for **Residential Health Care Facilities**, attach a copy of the latest certified financial statement and current internal financial reports to cover the balance of time to date for **the subject facility and all affiliated Residential Health Care Facilities**. If applicable, address the reason(s) for any operational losses, negative working capital and/or negative equity or net asset position and explain in detail the steps implemented (or to be implemented in the case of the subject facility) to improve operations.	☐	Schedule 9 Attachment
3. If amounts are listed in "Accumulated Funds" provide cross-reference to certified financial statement or Schedule 2b, if applicable.	☐	Schedule 9 Attachment
4. Attach a full and complete description of the assets to be sold, if applicable.	☒	
5. If amounts are listed in "Gifts (fundraising program)": • Provide a breakdown of total amount expected, amount already raised, and any terms and conditions affixed to pledges. • If a professional fundraiser has been engaged, submit fundraiser's contract and fundraising plan. • Provide a history of recent fund drives, including amount pledged and amount collected	☒	

	N/A	Title of Attachment
6. If amounts are listed in "Government Grants": • List the grant programs which are to provide the funds with corresponding amounts. Include the date the application was submitted. • Provide documentation of eligibility for the funds. • Attach the name and telephone number of the contact person at the awarding Agency(ies).	☒	
7. If amounts are listed in "Other" attach a description of the source of financial support and documentation of its availability.	☒	
8. Current Department policy expects a minimum equity contribution of 10% of total project cost (Schedule 8b line 10)) for all Article 28 facilities with the exception of Residential Health Care Facilities that require 25% of total project cost (Schedule 8b, line 10). Public facilities require 0% equity.	☐	100% Equity
9. Provide an equity analysis for member equity to be provided. Indicate if a member is providing a disproportionate share of equity. If disproportioned equity shares are provided by any member, check this box ☐	☒	

C. Mortgage, Notes, or Bonds **N/A**

	Total Project	Units
Interest		%
Term		Years
Payout Period		Years
Principal		$

	N/A	Title of Attachment
1. Attach a copy of a letter of interest from the intended source of permanent financing that indicates principal, interest, term, and payout period.	☒	
2. If New York State Dormitory Authority (DASNY) financing, then attach a copy of a letter from a mortgage banker.	☒	
3. Provide details of any DASNY bridge financing to HUD loan.	☒	
4. If the financing of this project becomes part of a larger overall financing, then a new business plan inclusive of a feasibility package for the overall financing will be required for DOH review prior to proceeding with the combined financing.	☒	

D. Land N/A

Provide details for the land including but not limited to; appraised value, historical cost, and purchase price. See sample table below.

	Total Project
Appraised Value	$
Historical Cost	$
Purchase Price	$
Other	

	N/A	Title of Attachment
1. If amounts are listed in "Other", attach documentation and a description as applicable.	☒	
2. Attach a copy of the Appraisal. Supply the appraised date and the name of the appraiser.	☒	
3. Submit a copy of the proposed purchase/option agreement.	☒	
4. Provide an affidavit indicating any and all relationships between seller and the proposed operator/owner.	☒	

E. Other N/A

Provide listing and breakdown of other financing mechanisms.

	Total Project
Notes	
Stock	
Other	

	N/A	Title of Attachment
Attach documentation and a description of the method of financing	☒	

F. Refinancing N/A

	N/A	Title of Attachment
1. Provide a breakdown of the terms of the refinancing, including principal, interest rate, and term remaining.	☒	
2. Attach a description of the mortgage to be refinanced. Provide full details of the existing debt and refinancing plan inclusive of original and current amount, term, assumption date, and refinancing fees. The term of the debt to be refunded may not exceed the remaining average useful life of originally financed assets. If existing mortgage debt will not be refinanced, provide documentation of consent from existing lien holders of the proposed financing plan.	☒

Independent Auditors' Report

Member of
Niskayuna Operating Co., LLC
d/b/a Pathways Nursing and Rehabilitation Center

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Niskayuna Operating Co., LLC, which comprise the balance sheets as of December 31, 2024 and 2023, and the related statements of income and member's equity, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of Niskayuna Operating Co., LLC as of December 31, 2024 and 2023, and the results of its operations and cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Niskayuna Operating Co., LLC and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Niskayuna Operating Co., LLC's ability to continue as a going concern for one year after the date that the financial statements are issued or when applicable, one year after the date that the financial statements are available to be issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Niskayuna Operating Co., LLC's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Niskayuna Operating Co., LLC's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Supplementary Information

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The accompanying supplementary information is presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, except for the effect on the supplementary information of the patient day statistic and resultant cost per patient day, the information is fairly stated in all material respects in relation to the financial statements as a whole.

NOTES TO FINANCIAL STATEMENTS

As of and for the Years Ended December 31, 2024 and 2023

(1) **Nature of Operations** – Niskayuna Operating Co., LLC doing business as Pathways Nursing and Rehabilitation Center ("Pathways" or the "Facility" or the "Operator") is a New York State licensed 112-bed comprised of 16 nursing beds, 34 pediatric beds, 2 pediatric respite beds, 36 traumatic brain injury beds, and 24 vent unit beds. Revenues for services are provided by the Medicaid program, the Medicare program and from private and third-party payor fees. A majority of the Facility's revenues were funded by the Medicaid program.

(2) **Summary of Significant Accounting Policies** - The significant accounting policies followed by the Facility is summarized below:

Basis of Accounting - The Facility utilizes the accrual basis of accounting and reports accordingly.

Use of Estimates - The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Reclassifications - Certain prior period amounts have been reclassified to conform to the current period presentation. These reclassifications have no effect on previously reported net income.

Cash and Cash Equivalents - The Facility considers all highly liquid investments purchased with an original maturity of three months or less to be cash equivalents.

Accounts Receivable and Allowance for Doubtful Accounts - Accounts receivable consist primarily of amounts due from Medicare and Medicaid programs, private payors, and a variety of other third party payors, net of estimates for variable consideration. Accounts receivable are stated at the amount the Facility expects to collect. The Facility provides an allowance for doubtful accounts equal to the estimated uncollectible amounts. The Facility's estimate is based on historical collection experience and a review of the status of patient accounts receivable. It is reasonably possible that the Facility's estimate of the allowance for doubtful accounts will change.

Leasehold Improvements and Equipment - Leasehold Improvements and Equipment is recorded at cost and includes expenditures for additions and improvements that extend the useful lives of the building and equipment. Expenditures for maintenance and repairs are charged to expense as incurred. Upon retirement or disposal, the related costs and accumulated depreciation are reduced by the carrying amounts. Gains or losses on these transactions are included in income or expense as incurred. Major movable equipment is depreciated using the straight-line method over their estimated useful lives. Leasehold improvements are amortized using the straight-line method over the shorter of the estimated useful life of the asset or the term of the lease.

Goodwill – The Facility has classified as goodwill the excess of the purchase price over the fair value of the assets acquired. Goodwill is not amortized, rather it is tested for impairment on an annual basis. There were no impairments recorded during the years ended December 31, 2024 and 2023.

(2) Summary of Significant Accounting Policies (continued)

Long-Lived Assets – Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. If the sum of the future cash flows (undiscounted and without interest charges) expected to result from the use of the intangible asset and its eventual disposition is less than the carrying amount of the asset, an impairment loss is recognized to the extent the carrying amount of the asset exceeds its fair value.

Patient Funds – The Facility acts as a fiduciary for the funds of patients in the institution. These funds are kept in a separate interest-bearing account.

Revenue Recognition - The Facility's revenue is derived primarily from providing healthcare services to its patients. Revenues are recognized when control of the promised services are provided to the patients at the amount that reflects the consideration to which the Facility expects to be entitled from patients and third-party payors, including Medicaid, Medicare, private payors, and a variety of other third party payors, in exchange for providing patient care.

Performance obligations are determined based on the nature of the services provided. The healthcare services in skilled patient contracts include routine services in exchange for a contractual agreed-upon amount or rate. Routine services are treated as a single performance obligation satisfied over time as services are rendered. As such, patient care services represent a bundle of services that are not capable of being distinct. Additionally, there may be ancillary services which are not included in the daily rates for routine services, but instead are treated as separate performance obligations satisfied over time, if and when those services are rendered.

Revenue recognized from healthcare services are adjusted for estimates of variable consideration (implicit price concessions) to arrive at the transaction price. The Facility determines the transaction price based on contractually agreed-upon amounts as determined by Medicaid and Medicare programs rules and regulations or rate on a per day basis, adjusted for estimates of variable consideration. The Facility uses the expected value method in determining the variable component that should be used to arrive at the transaction price, using contractual agreements and historical reimbursement experience within each payor type. The amount of variable consideration which is included in the transaction price may be constrained, and is included in net revenue only to the extent that it is probable that a significant reversal in the amount of the cumulative revenue recognized will not occur in a future period. If actual amounts of consideration ultimately received differ from the Facility's estimates, the Facility adjusts these estimates, which would affect net patient revenues in the period such variances become known. Adjustments arising from a change in the transaction price were not significant for the years ended December 31, 2024 and 2023.

(2) Summary of Significant Accounting Policies (continued)

Revenue Recognition (continued)

The Facility disaggregates revenue from contracts with its patients by payors to depict how the nature, amount, timing and uncertainty of revenue and cash flows are affected by economic factors. Settlement with Medicare and Medicaid payors for retroactive adjustments due to audits and reviews are considered variable consideration and are included in the determination of the estimated transaction price. These settlements are estimated based on the terms of the payment agreement with the payor, correspondence from the payor and the Facility's historical settlement activity. Any changes to these revenue estimates are recorded in the period the change or adjustment becomes known based on final settlement. The Facility recorded adjustments to net patient revenues which were not material to the Facility's revenue or financial statements for the years ended December 31, 2024 and 2023.

Leases – Effective January 1, 2022, the Facility adopted the new lease accounting guidance in Accounting Standards Update No. 2016-02, *Leases (Topic 842)*. The Facility has elected the package of practical expedients permitted in ASC Topic 842. Accordingly, the Facility accounted for its existing operating leases as an operating lease under the new guidance, without reassessing (a) whether the contract contains a lease under ASC Topic 842, (b) whether classification of the operating lease would be different in accordance with ASC Topic 842, or (c) whether the unamortized initial direct costs before transition adjustments (as of December 31, 2021) would have met the definition of initial direct costs in ASC Topic 842 at lease commencement.

The Facility determines if an arrangement is a lease at the inception of the contract. The Facility's operating leases are included in right of use assets, current portion of long-term lease liability, long-term lease liability on the accompanying balance sheet. The operating right of use assets and operating lease liabilities are recognized based on the present value of future minimum lease payments over the lease term at the commencement date. As the Facility's leases do not provide an implicit interest rate, the Facility utilizes an estimated incremental borrowing rate based on information available at the commencement date in determining the estimated present value of future payments.

Fair Value of Financial Instruments - The fair value of current assets and liabilities approximate carrying value because of the short-term nature of these items. The recorded values of loans payable and leases liability approximate their fair values, as interest approximates market rates.

Income Taxes – No provision is made for income taxes in the financial statements. The Facility is a single member limited liability company, and as such the Facility's income or loss is passed through and included in the tax returns of the Facility's member.

Accounting for Uncertainty in Income Taxes – The Facility recognize the effect of income tax position only if those positions are more likely than not to be sustained. Management has determined that the Facility had no uncertain tax positions that would require financial statement recognition and/or disclosure. The Facility is no longer subject to examination by applicable taxing jurisdictions for periods prior to December 31, 2021.

(3) **Leasehold Improvements and Equipment** - Leasehold Improvements and Equipment consists of the following as of December 31:

Depreciation for the years ended December 31, 2024 and 2023 was [redacted] and [redacted], respectively.

(4) **Long Term Debt** – Long Term Debt consists of the following as of December 31:

On November 11, 2024, the Facility secured a loan from CNH Capital for [redacted] to purchase equipment. The loan is payable in 60 monthly installments of [redacted] (principal only), commenced on November 11, 2024. Interest expense for the years ended December 31, 2024 and 2023 was [redacted].

(5) **Related Party Transactions** – The sole member of the Facility also is a member of 1805 Providence Avenue LLC ("Realty"), the realty company that owns the land and building. The Facility is charged rental expense equal to the monthly debt service requirements plus a fixed annual supplemental amount (see note 6).

The Facility receives fiscal and other consulting services provided by Ventura Services, who the sole member of the Facility is also a member of. Fiscal and other consulting services for the years ended December 31, 2024 and 2023 was [redacted] and [redacted], respectively. No amounts were due to this related party as of December 31, 2024 and 2023.

The Facility also receives management services from Highview Management who is owned by the sole member of the Facility. Management services for the years ended December 31, 2024 and 2023 was [redacted]. No amounts were due to this related party as of December 31, 2024 and 2023.

(6) Commitments and Contingencies

Nursing Home Lease – The Facility leases its nursing home from 1805 Providence Avenue LLC (related party) under a 30-year non-cancelable operating lease agreement. The lease expires in July 2040. In the normal course of business, it is expected that this lease will be renewed. The annual rent is equal to the monthly debt service requirements of the Realty and additional monthly supplemental rent above the annual debt service. Also, the Facility is also responsible for the maintenance and repairs to the building at its own expense. Rent expense for the years ended December 31, 2024 and 2023 was [redacted] and [redacted], respectively.

Equipment Lease - The Facility leases office equipment under a 5-year non-cancelable operating lease agreement. The lease expires in September 2027. In the normal course of business, it is expected that this lease will be replaced by a lease on other equipment. Equipment operating lease expense for the years ended December 31, 2024 and 2023 was [redacted].

Included in equipment lease expense are leases that, at the commencement date, have a lease term of 12 months or less, are month-to-month, or are one-time rentals. Accordingly, these leases are not accounted for under ASC Topic 842. Equipment lease expense for these leases for the years ended December 31, 2024 and 2023 was [redacted] and [redacted] respectively.

Future minimum payments of non-cancelable operating leases as of December 31, 2024 are as follows:

	Nursing Home	Equipment	Total
2025	[redacted]		
2026			
2027			
2028			
2029			
Thereafter			
Total Future Minimum Lease Payments			
Less Amounts Representing Interest			
Present Value of Future Minimum Lease Payments			
Less Current Maturities			
Long-Term Portion			
Weighted-Average Remaining Lease Term			
Weighted-Average Discount Rate			

(6) Commitments and Contingencies (continued)

Contingencies - The amounts received from the Medicaid and Medicare Programs for the years ended December 31, 2024 and 2023 are subject to audit by the New York State Department of Health and the Facility's Medicare Intermediary. Amounts due to the Medicaid and Medicare Programs become payable when the audit adjustments, if any, are finalized.

Litigation – From time to time, the Facility may be subject to legal proceedings arising out of the ordinary course of business. Although management cannot predict the outcome of such proceedings, management does not consider such proceedings to result in a material adverse effect on its financial position or its results of operations or its cash flows.

(7) Employee Retention Credit – The Employee Retention Credit is a refundable tax credit against certain employment taxes equal to 50% of the qualified wages an eligible employer pays to employees after March 12, 2020, and before January 1, 2021. Eligible employers can get immediate access to the credit by reducing employment tax deposits they are otherwise required to make. Also, if the employer's employment tax deposits are not sufficient to cover the credit, the employer may get an advance payment from the IRS. For each employee, wages (including certain health plan costs) up to [redacted] can be counted to determine the amount of the 50% credit. Earned credits from the Employee Retention Credit for the years ended December 31, 2024 and 2023 was [redacted]. As of December 31, 2024 and 2023, included in prepaid expenses and other current assets is [redacted] for outstanding employee retention credits expected to be received.

(8) Concentration of Credit Risk - The Facility grants credit without collateral to its residents, most of whom are residents and are insured under third-party payor agreements. The mix of receivables from residents and third-party payors is as follows as of December 31:

	2024	2023
Medicaid	[redacted]	
Medicare		
Private Pay and Others		

For the years ended December 31, 2024 and 2023, the Facility had cash balances in major financial institutions which at times exceeded Federal Depository Insurance limits. These financial institutions have strong credit ratings and management believes that credit risk related to these deposits is minimal.

(9) **Non-Union Retirement Plan** – The Facility has a defined contribution retirement plan for employees not covered by the collective bargain agreement (see note 10). All full time non-union employees are eligible to participate in a retirement plan implemented under IRC Section 401(K). This plan provides for discretionary employer contributions of 50% of the employees' contributions up to a maximum of 3% of the employees' salary. Employer contributions to the non-union retirement plan for the years ended December 31, 2024 and 2023 was [redacted] and [redacted], respectively.

(10) **Union Pension Plan** – The Facility contributes to a multiemployer defined benefit pension plan under the terms of collective-bargaining agreements that cover its union-represented employees. The risks of participating in these multiemployer plans are different from single-employer plans in the following aspects:

a. Assets contributed to the multiemployer plan by one employer may be used to provide benefits to employees of other participating employers.

b. If a participating employer stop contributing to the plan, the unfunded obligations of the plan may be borne by the remaining participating employers.

c. If Entity A chooses to stop participating in some of its multiemployer plans, Entity A may be required to pay those plans an amount based on the underfunded status of the plan, referred to as a withdrawal liability.

The Facility's participation in this plan for the years ended December 31, 2024 and 2023, is outlined in table the below. The "EIN/Pension Plan Number" column provides the Employer Identification Number (EIN) and the three-digit plan number, if applicable. Unless otherwise noted, the most recent Pension Protection Act (PPA) zone status available in 2024 and 2023 is for the plan's year-end at December 31, 2023 and 2022, respectively. The zone status is based on information that the Facility received from the plan and is certified by the plan's actuary. Among other factors, plans in the red zone are generally less than 65 percent funded, plans in the yellow zone are less than 80 percent funded, and plans in the green zone are at least 80 percent funded. The "FIP/RP Status Pending/Implemented" column indicates plans for which a financial improvement plan (FIP) or a rehabilitation plan (RP) is either pending or has been implemented. The last column lists the expiration date of the collective-bargaining agreement to which the plans are subject. There have been no significant changes that affect the comparability of 2024 contributions.

(10) **Union Pension Plan (continued)** – Employer contributions to the union pension plan for the years ended December 31, 2024 and 2023 was [redacted] and [redacted], respectively.

Pension Fund	EIN/Pension Plan Number	Pension Protection Act Zone Status	FIP/RP Status Pending/ Implemented	Surcharge Imposed	Expiration of Collective Bargaining Agreement
1199 SEIU Greater New York Pension Fund	[redacted]				

(11) **Subsequent Events** – Management of the Facility has evaluated subsequent events through March 11, 2025, the date the financial statements were available to be issued. No significant events have been identified that would require adjustment to or disclosure in the accompanying financial statements.

Schedule 13 A. Assurances from Article 28 Applicants

Article 28 applicants seeking combined establishment and construction or construction-only approval must complete this schedule.

The undersigned, as a duly authorized representative of the applicant, hereby gives the following assurances:

a) The applicant has or will have a fee simple or such other estate or interest in the site, including necessary easements and rights-of-way sufficient to assure use and possession for the purpose of the construction and operation of the facility.

b) The applicant will obtain the approval of the Commissioner of Health of all required submissions, which shall conform to the standards of construction and equipment in Subchapter C of Title 10 (Health) of the Official Compilation of Codes, Rules and Regulations of the State of New York.

c) The applicant will submit to the Commissioner of Health final working drawings and specifications, which shall conform to the standards of construction and equipment of Subchapter C of Title 10, prior to contracting for construction, unless otherwise provided for in Title 10.

d) The applicant will cause the project to be completed in accordance with the application and approved plans and specifications.

e) The applicant will provide and maintain competent and adequate architectural and/or engineering inspection at the construction site to ensure that the completed work conforms to the approved plans and specifications.

f) If the project is an addition to a facility already in existence, upon completion of construction all patients shall be removed from areas of the facility that are not in compliance with pertinent provisions of Title 10, unless a waiver is granted by the Commissioner of Health, under Title 10.

g) The facility will be operated and maintained in accordance with the standards prescribed by law.

h) The applicant will comply with the provisions of the Public Health Law and the applicable provisions of Title 10 with respect to the operation of all established, existing medical facilities in which the applicant has a controlling interest.

i) The applicant understands and recognizes that any approval of this application is not to be construed as an approval of, nor does it provide assurance of, reimbursement for any costs identified in the application. Reimbursement for all cost shall be in accordance with and subject to the provisions of Part 86 of Title 10.

Schedule 13 B-3. AMBULATORY SURGERY CENTERS ONLY - Physician Commitments

Upload a spreadsheet or chart as an attachment to this Schedule of all practitioners, including surgeons, dentists, and podiatrists who have expressed an interest in practicing at the Center. The chart must include the information shown in the template below.

Additionally, upload copies of letters from each practitioner showing the number and types of procedures he/she expects to perform at the Center per year.

Practitioner's Name	License Number	Specialty/(s)	Board Certified or Eligible?	Expected Number of Procedures	Hospitals where Physician has Admitting Privileges	Title and File Name of attachment

Schedule 13 C. Annual Operating Costs

See "Schedules Required for Each Type of CON" to determine when this form is required. One schedule must be completed for the total project and one for each of the subprojects. Indicate which one is being reported by checking the appropriate box at the top of the schedule.

Use the below tables or upload a spreadsheet as an attachment to this Schedule that matches the structure of the tables (Attachment Title:) to summarize the first and third full year's total cost for the categories, which are affected by this project. The first full year is defined as the first 12 months of full operation after project completion. Year 1 and 3 should represent projected total budgeted costs expressed in current year dollars. Additionally, you must upload the required attachments indicated below.

Required Attachments

	Title of Attachment	Filename of Attachment
1. In an attachment, provide the basis for determining budgeted expenses, including details for how depreciation and rent / lease expenses were calculated.	Based on actual expenses per the applicant's 2024 cost report.	N/A
2. In a sperate attachment, provide the basis for interest cost. Separately identify, with supporting calculations, interest attributed to mortgages and working capital		N/A

Any approval of this application is not to be construed as an approval of any of the above indicated current or projected operating costs. Reimbursement of any such costs shall be in accordance with and subject to the provisions of Part 86 of 10 NYCRR. Approval of this application does not assure reimbursement of any of the costs indicated therein by payers under Title XIX of the Federal Social Security Act (Medicaid) or Article 43 of The State Insurance Law or by any other payers.

Schedule 13D: Annual Operating Revenues

See "Schedules Required for Each Type of CON" to determine when this form is required. If required, one schedule must be completed for the total project and one for each of the subprojects. Indicate which one is being reported by checking the appropriate box at the top of the schedule.

Use the below tables or upload a spreadsheet as an attachment to this Schedule (Attachment Title:) to summarize the current year's operating revenue, and the first and third year's budgeted operating revenue (after project completion) for the categories that are affected by this project.

Table 1. Enter the current year data in column 1. This should represent the total revenue for the last complete year before submitting the application, using audited data. Project the first and third year's total budgeted revenue in current year dollars.

Tables 2a and 2b. Enter current year data in the appropriate block. This should represent revenue by payer for the last complete year before submitting the application, using audited data.

Indicate in the appropriate blocks total budgeted revenues (i.e., operating revenues by payer to be received during the first and third years of operation after project completion). As an attachment, provide documentation for the rates assumed for each payer. Where the project will result in a rate change, provide supporting calculations. For managed care, include rates and information from which the rates are derived, including payer, enrollees, and utilization assumptions.

The Total of Inpatient and Outpatient Services at the bottom of Tables 13D-2A and13D-2B should equal the totals given on line 10 of Table 13D-1.

Required Attachments

	N/A	Title of Attachment	Filename of Attachment
1. Provide a cash flow analysis for the first year of operations after the changes proposed by the application, which identifies the amount of working capital, if any, needed to implement the project.	☐	Schedule 5 Attachment	N/A
2. Provide the basis and supporting calculations for all utilization and revenues by payor.	☐	Based on the actual experience of the applicant for its existing beds.	N/A
3. Provide the basis for charity care revenue assumptions used in Year 1 and 3 Budgets (Table 13D-2B). If less than 2%, provide a reason why a higher level of charity care cannot be achieved and remedies that will be implemented to increase charity care.	☐		N/A

OASAS										
OMH										
Charity Care										
Bad Debt										
All Other										
Total										

Note: Please refer to Schedule 13 Attachment for more detailed utilization and revenue information.
There is a decrease in revenue from the current year to the first year primarily due to a greater decrease in the revenue for general RHCF beds relative to the increase in revenue from the increase in the number of vent beds. Revenues are projected to rebound close to the current year level by the third year of operation.

Table 13D – 2B

Various outpatient services may be reimbursed as visits or procedures. Applicant should indicate which method applies to this table by choosing the appropriate checkbox.

** Reimbursement rates in the third year are increased 2% per year from the first year.

A. Residential Health Care Facility Program Project Narrative

This section is required for **all** residential health care facility (RHCF) applications. If left incomplete, the application will not be accepted.

- Please provide a Project Narrative. The Project Narrative must be a detailed explanation of the proposal and give the reviewer a clear understanding of the proposal. The Project Narrative should include the following information:
  - Utilization information for the last three years, along with explanations for any decreases over those years. Please note: Utilization numbers should be for RHCF beds only, not specialty beds (i.e. AIDS, vent, pediatrics, TBI, etc.), unless the proposal is for the addition or decertification of specialty RHCF beds or the facility provides only these specific bed types.
  - If utilization is below 97%, reasons for low utilization should be provided, along with details of how the applicant intends to increase utilization over the first three years, including any new or existing programs or services to the facility that would benefit area residents.
  - If the proposal requires decertification of beds, please include a patient displacement form.
  - If the proposal is to add beds and there is no RHCF bed surplus in the county and the county utilization is below 97%, there is a rebuttable presumption there is no need for additional beds in that county. Please explain, in as much detail as possible, how the proposal will benefit the community to be served. (See 10 NYCRR 709.3 (3)(g) for more details.)

- Please cite sources from **any** data provided in the Project Narrative.

Please refer to the Project Narrative under Schedule 18 Attachment.

B. Residential Health Care Facility Program Information

COMMUNITY **Please Refer to Schedule 18 Attachment – Project Narrative**

- How does your program or service proposal fit into the existing array of services available in the health and social services area? How did you determine this?

- Provide an accurate depiction of currently available services and a service gap analysis or marketing study.

- What transportation considerations in your community/service area/catchment area affect consumers or consumers' friends and family access to your program/service? How do you propose to address these? How will you know if you are successful?

- What linkages have you developed with other community service providers that will complement, support and/or supplement the needs, e.g. housing, social, environmental or medical supports of your proposed client base? How will you maintain current information of this nature for consumers? How will you educate program staff on new program initiatives?

- What local planning processes have been required for your proposal?

- What specific population will you serve? How does it match the demographic need in your service area and the desires of consumers?

- How does your program/service fit into the community's long-range plan? Please document the local source for this information. How will you evaluate the continued effectiveness of your program?

- Document the current and projected demand for the proposed service. If the proposed service is covered by an existing DOH need methodology, demonstrate how the proposed service is consistent with the relevant need methodology.

CONSUMER **Please Refer to Schedule 18 Attachment – Project Narrative**

How did you determine this service meets consumer needs in the proposed service area/catchment area? How will you incorporate consumers in planning, implementation and ongoing operation of this program/service?

Will you include active consumer involvement in advisory committees or boards?

- Given the consumer alternatives currently available in your community service area, why would consumers want your proposed program or service?

- Education: how will consumers know about your service? What specific information and referral information will be available to assist consumers in making informed decisions on the services they need?

PROGRAM/SYSTEM **Please Refer to Schedule 18 Attachment – Project Narrative**

- Provide a statement of facility philosophy (whether new or existing).

- Describe in detail the projected resident profile characteristics of the population to be served using the language of the regulations and/or nationally accepted criteria; include any specialty populations. The project must demonstrate an awareness that as many as 70% of residents admitted to residential health care facilities are cognitively impaired and design a therapeutic environment which compensates for these impairments as well as for functional disabilities. Should a facility choose to designate a distinct unit for a subset of residents with dementia, specific descriptors which distinguish this group from the majority of other residents with dementia, admission and discharge criteria for the unit and delivery of services must be addressed.

- Describe resident needs based on the proposed resident population.

- Provide a complete plan for programs and services to meet the needs of the residents. This plan must address all services required by regulation (e.g., specialized rehabilitation, dietary, nursing services and for each service).

  - Goals and objectives of program/service
  - Function and activities involved
  - Unique characteristics of each
  - Relationships between services
  - Location in the facility and rationale for placement
  - Resources needed, e.g., staffing

- How will you evaluate program/service effectiveness? What consumer satisfaction measures will you employ?

- How do you propose to address cultural, rural vs. urban and/or ADA considerations in the design and operation of your program/service?

ENVIRONMENT **Please Refer to Schedule 18 Attachment – Project Narrative**

Provide a floor plan for an overall design that facilitates use of the facility by residents and caregivers. Explain how the proposed floor plan layout will promote planned programs. If an addition, include in the floor plans the area where it attaches to the original building. If the project includes renovation of existing areas, provide a floor plan that shows the areas before and after renovation.

- Provide an enlarged floor plan for each type of resident bedroom. Each bedroom shall be designed to permit:

  - Wheelchair access and a minimum 5’0” diameter turnaround adjacent to at least one side of the bed(s).
  - Access to furniture and equipment intended for resident use by residents confined to a wheelchair.
  - Specialized furniture and equipment as may be needed.
  - Privacy spaces.
  - An area for socialization for residents, family, friends and staff.
  - An outside view.
  - Personalization of the resident’s room: rooms show individualization with personal belongings such as pictures, chairs, and favorite objects.

- Describe how the proposed facility design provides wayfinding and orientation through the use of:

  - Signs: visible, eye level, “eye catchy,” appropriate location, use of cues.
  - Hallways: visually distinct, color, wall treatment, art work appropriate to age and interests, interactive or tactile wall hangings.
  - Individualized resident cues to orient residents to their own rooms.

- Describe how the proposed facility design provides areas for privacy and socialization of residents to include the following items:

  - At intervals along corridors/wandering path(s), the provision of small rest areas to encourage social interaction on a one-to-one or in small groups and enable limited ambulators to progress short distances toward a goal.

  - Dining rooms that provide opportunities for residents to eat in small groups with a minimum of distraction.

  - Chair placement to encourage conversation in resident rooms as well as in public areas.

  - Rooms designed to residential scale.

  - Traffic kept to a minimum.

  - “Watching space”: people like watching life going on around the elevator/nursing station area; windows or sunrooms, porches or verandas overlooking the main entrance, busy streets, etc.

- Describe how the interior design and finishes will be chosen to reduce resident confusion and to contribute to the homelike environment of the facility.

- Strictly limit use of fluorescent lights. Sufficient lighting for general activities without unnecessary glare and adequate individual lighting for visually impaired to read, do handwork, etc.

- Visual contrast between objects and background, between walls and floor.

- Floor colors/patterns that minimize the illusion of steps or varying levels.

- Carpeting: although it lowers noise levels and creates a residential feeling, it may increase the problems of mobility for wheelchair bound residents.

- Aural concerns addressed, i.e., carpeting, wall coverings, curtains, etc., for noise abatement; TV and radio noise controlled or confined.

- Describe how physical outlets for residents will be provided and accessed. Address the following items in this plan:

  - Meaningful wandering circuits.
  - Access to outdoors:
    - Direct to an enclosed or limited access courtyard.
    - Visual access or other monitoring method of area by staff.
    - Chairs and benches.
    - Sunny and shady.
    - Visual objects of interest.

  - Space to place an angry/agitated resident without disturbing others, “quiet area.”

- Identification of space for “unstructured” activities during, evenings, nights and weekends as well as on days.

WORKFORCE **Please Refer to Schedule 18 Attachment – Project Narrative**

- What is the current availability of professional/paraprofessional workers to staff your proposal? Who are the competing employers? What will you do to successfully compete? Include training, recruitment and transportation strategies. How do you coordinate with Department of Labor or any other local workforce initiatives?

- What measures will you adopt to promote retention of specific categories of your workforce?

- What will the impact be of opening/expanding your program on the workforce of other health care providers in the community? How will you minimize any adverse impact?

Not Applicable for this project.

F. RHCF Analysis of Net Patient Revenue:

This section must be completed for

- all RHCF establishment applications
- all establishment and construction RHCF applications which will increase current year total costs by more than 10%.

If neither condition applies, Schedule 13d – Annual Operating Revenue will be sufficient, and the detailed monthly cash flow analysis will not be required.

This schedule consists of two parts:

I. Analysis of Net Patient Revenue. Provide a breakdown of utilization by payor source indicated; provide supporting calculations for the rates assumed for each payor. A separate schedule should be provided for each discrete program. The breakdown must be provided for the current year, as well as the first and third year of the project.

II. Cash Flow Analysis. Provide as an attachment to this schedule a cash flow analysis for the first full year of operation after the changes proposed by the application, which identifies the amount of working capital, if any, needed to implement the project. Please complete Schedule 5, Working Capital Schedule, in conjunction with the cash flow analysis.

PATHWAYS NURSING AND REHABILITATION CENTER

SCHEDULE 18 ATTACHMENT

PROJECT NARRATIVE

PATHWAYS NURSING AND REHABILITATION CENTER

PROJECT NARRATIVE

I. INTRODUCTION

Pathways Nursing and Rehabilitation Center (Pathways), a 110-bed residential health care facility (RHCF) located at 1805 Providence Avenue, Niskayuna (Schenectady County), New York 12309, is submitting this Administrative Review Certificate of Need (C.O.N.) Application to convert 12 general RHCF beds to 12 ventilator-dependent beds ("vent beds"), with no construction. All of the 12 to-be-converted vent beds are in single-bedded rooms on the same unit as the existing ventilator-dependent beds. The number of certified vent beds will increase from 24 to 36. The number of certified general RHCF beds will decrease from 16 to four (4). There will be no change to the total certified bed capacity of the RHCF. The remaining 70 beds at Pathways will continue to be certified in the Traumatic Brain Injury category.

Pathways receives ventilator referrals from hospitals throughout the Capital District Region (which includes 17 Upstate counties). Of note, Pathways is the only RHCF in the whole of the Region with adult ventilator-dependent beds. As a result, the RHCF's existing 24-bed ventilator-dependent unit is consistently operating at or near 100% occupancy. Overall, Upstate New York is underserved for ventilator-dependent capacity compared to the Downstate region, as described in greater detail in the Public Need section of this Project Narrative. The 24 vent beds at Pathways translate to 13,252 persons age 65 and over per operational vent bed in the Capital District Region. For comparison, the ratio in New York City is 2,091 persons age 65 and over per operational vent bed. There is no known clinical difference between the populations of these two (2) areas that would account for this gross disparity (greater than 6:1 unfavorable ratio against the Capital District Region).

The demand for ventilator-dependent beds at Pathways often exceeds existing capacity, resulting in Pathways utilizing some of its Traumatic Brain Injury (TBI) beds for ventilator-dependent patients who also have a TBI diagnosis. Increasing the number of vent beds at Pathways will expand capacity for this needed service, as well as opening up capacity for persons who solely have a TBI diagnosis.

Furthermore, given the particular health status of a majority of ventilator-dependent residents at

Pathways, residents remain in a vent bed for an extended period, meaning there is limited additional capacity for other patients in need of ventilator care, including patients who would require shorter-term rehabilitation and eventual weaning and discharge back to the community. The closest alternative facility to Pathways with adult vent beds is Northeast Center for Rehabilitation and Brain Injury which is located roughly 90 minutes away by car in Ulster County. Expanding ventilator-dependent capacity at Pathways would enable Capital District Region residents in need of a vent bed to access care closer to home.

Pathways currently has a four-(4)-star rating from the Centers of Medicare and Medicaid Services, reflecting the high quality of care provided at the RHCF. In addition, letters of support for this project from St. Peter's Health Partners and Albany Medical Center are included under Appendix A of this Project Narrative.

As there is no construction proposed for this application, Pathways expects to be able to commence operation of the converted vent beds quickly upon approval of this Application. Pursuant to previously completed C.O.N. Project No. 131218, the entire second-floor unit where the proposed, converted ventilator-dependent beds will be located was built to meet current requirements for ventilator-dependent beds. Upon completion of this present Application, Pathways' ventilator-dependent service will consist of 34 single-bedded rooms and one (1) double-bedded room, totaling 36 ventilator-dependent beds.

Under separate cover, Pathways will also submit a Bed Conversion Plan to the Department for the conversion of beds. The conversion of beds will be effective upon completion of this C.O.N. Application and issuance of a revised operating certificate for the RHCF. A draft of the Bed Conversion Plan is included under Appendix B of this Project Narrative. The completed Health Equity Impact Assessment for this project is also included with this Application.

II. PUBLIC NEED

The primary service area for this project includes Schenectady County, where Pathways is located, as well as Albany, Saratoga and Montgomery Counties. The population base for specialty RHCF beds such as ventilator-dependent beds, traumatic brain injury programs and other specialty services should be a broad geographic region with sufficient inhabitants to justify the cost of these specialty services. Of note, Pathways is the only RHCF in the whole of the Capital District Region with adult vent beds.[1] (St. Margaret's Center in Albany County is certified for 36 *pediatric* vent beds.) As a result of this scarcity, Pathways routinely receives referrals from hospitals throughout the Capital District region. Accordingly, the secondary service area for this project includes the whole of the 17-county Capital District Region.

According to data from the U.S. Census Bureau, the total population of the PSA counties is 772,113. As shown in the table below, 74.1% of PSA residents are White, 7.8% are Black/African-American, 5.9% are Asian, 3.9% are some other single race and 8.2% are two (2) or more races. In addition, 7.3% of PSA residents are Hispanic or Latino (of any race). The median household income is $86,197 and 11.2% of residents are living below the Federal Poverty Level (FPL).

	Schenectady	Albany	Saratoga	Montgomery	PSA Total
Population	162,261	319,964	240,360	49,528	772,113
% Under age 18	21.1%	17.7%	18.6%	23.1%	19.0%
% Age 65 and over	17.9%	19.1%	21.3%	19.4%	19.6%
% White	67.0%	67.4%	86.6%	80.6%	74.1%
% Black/African-American	9.0%	12.3%	2.1%	3.1%	7.8%
% Asian	5.3%	9.1%	3.0%	0.9%	5.9%
% Two or more	13.2%	7.0%	6.5%	8.0%	8.2%
% Other single	5.5%	4.2%	1.8%	7.4%	3.9%
% Hispanic/Latino (any race)	8.7%	7.7%	4.2%	15.4%	7.3%
% Below FPL	12.8%	13.0%	7.1%	14.6%	11.2%
Median household income	$80,856	$80,900	$101,235	$64,943	$86,197

Source: U.S. Census 2024 American Community Survey

In the PSA counties, 19.6% of residents are over age 65. According to the Cornell University Program on Applied Demographics, the number of residents age 65 and older in the PSA is projected to grow 25.9% from 140,709 in 2020 to 177,099 in 2030. By comparison, the total population of the

[1] The Capital District Region includes the following counties: Albany, Clinton, Columbia, Delaware, Essex, Franklin, Fulton, Greene, Hamilton, Montgomery, Otsego, Rensselaer, Saratoga, Schenectady, Schoharie, Warren and Washington.

PSA counties is projected to grow by only 3.1% during the same time period. The elderly utilize long-term care services at a level much higher than other groups. This is particularly true for specialized long-term care services such as ventilator-dependent services. Given the projected growth in the elderly population, it is likely that the demand for vent beds in the PSA and in the Capital District Region overall will increase over time. The proposed expansion of the ventilator-dependent unit at Pathways is consistent with the needs of the growing elderly population in the PSA.

Currently Existing Resource

Overall, Upstate regions in New York are underserved for vent beds compared to Downstate. As noted above, Pathways is the only RHCF in the whole of the Capital District Region with adult vent beds. (St. Margaret's Center in Albany County is certified for 36 *pediatric* vent beds.) The 24 vent beds at Pathways translate to 13,252 persons age 65 and over per operational vent bed in the Capital District Region. For comparison, the ratio in New York City is 2,091 persons age 65 and over per operational vent bed. There is no known clinical difference between the populations of these two (2) areas that would account for this gross disparity (greater than 6:1 unfavorable ratio against the Capital District Region).

	Capital District Region	**New York City**
Operational ventilator beds (excluding Pediatric Ventilator beds)	24	711
Population age 65 and over	318,047	1,486,853
Persons age 65 and over per operational bed	13,252	2,091
Population age 85 and over	36,942	180,713
Persons age 85 and over per operational bed	1,539	254

Hospitals in Schenectady County and the Capital District Region have high occupancy rates and need to assess all opportunities to discharge patients in a timely manner. Many of these hospitals have ventilator-dependent patients who could be more appropriately managed in alternative settings. Hospital discharge planners focus on finding alternative, less costly but clinically appropriate settings for many of these patients. For patients who cannot be managed at home, nursing homes can be an appropriate setting provided the staff, equipment and space are available. Pathways has strong referral relationships with hospitals in the surrounding counties, which contributes to the high utilization of its vent beds. Letters of support for this project from referring hospitals are included under Appendix A of this Project Narrative.

Need Methodology

The table below shows the need for ventilator-dependent beds using the New York State Department of Health need methodology calculation as promulgated in 10 NYCRR Section 709.17. As shown in the table, there is currently a need for 43 vent beds in the PSA counties. Minus the 24 existing vent beds at Pathways, this leaves a remaining need for 19 additional vent beds in the PSA Counties. Overall in the Capital District Region, there is a remaining need for 34 additional vent beds.

	PSA Counties	**Capital District Region**
Discharges for DRGs 130, 004 and 005 in 2024	342	456
Add 10% and multiply by 32%	120	161
Multiply by 125-day LOS	15,048	20,064
Divide by 365 days/year	41	55
Divide by 95% occupancy = need for vent beds	**43**	**58**
Existing vent beds	24	24
Remaining need for vent beds	**19**	**34**

Notwithstanding the above calculation, which supports an approval of this proposal, it is the position of the applicant that the need methodology in Section 709.17 still underestimates the true need for ventilator-dependent beds in the following ways:

1) Section 709.17 uses a 95% occupancy criterion. Given the acute nature of many ventilator-dependent patients, these units are often considered the Intensive Care Units of RHCFs. As a result, a 95% occupancy factor may not be applicable for ventilator units. Lowering the occupancy threshold to a more appropriate level for this type of service would result in an increase in the number of beds needed and a more accurate reflection of the field conditions of bed utilization.
2) When the need methodology was first outlined, it used only one (1) DRG (475 – respiratory system diagnosis with ventilator support) as the base population for calculating the need for ventilator-dependent beds. The Federal DRG definitions have changed twice since that time, causing ventilator patients to be reclassified and coded under DRGs 004, 005 and 130, which are the codes now being used by the Department to calculate need. However, based on the experience of existing providers, there are many patients now being admitted to ventilator-dependent units under additional DRGs beyond the ones used above for the need

methodology calculation. Therefore, it is the applicant's belief that DRGs 004, 005 and 130 no longer fully capture the base population for ventilator bed need, resulting in an underestimate of the true need for ventilator-dependent beds.

3) The need methodology allows for a 10% increase from the number of patients admitted under DRG 475 in order to capture patients who require ventilator-dependent care who are admitted under a different DRG. However, as noted above, given that DRG 475 is no longer the sole driver of admissions to ventilator-dependent units, it is the applicant's position that a 10% increase is no longer sufficient to capture the true need for ventilator-dependent beds.
4) The current need methodology also calls for multiplying the number of discharges under DRG 475 by 32%. Similarly, we believe the 32% number should be re-examined given the higher acuity of ventilator patients today, advances in technology and changes in the health care system, as noted above.
5) The final number that needs to be re-examined in the Section 709.17 need methodology is the 125-day average length of stay (ALOS) for ventilator patients. Given the higher acuity of many ventilator patients today, compared to 2003 when the need methodology was being formulated, we believe the ALOS should also be increased. Furthermore, as noted above, given the particular health status of a majority of ventilator-dependent residents at Pathways, residents remain in a vent bed for an extended period often exceeding 125 days.

Current Utilization

Given the lack of vent bed resources in the Capital District Region, Pathways' 24 existing vent beds consistently operates at or near 100% occupancy, as shown in the table below. At the same time, the facility's general RHCF beds are underutilized, with only 68.1% occupancy in 2025. This proposal to convert 12 general RHCF beds to 12 vent beds will enable Pathways to maximize utilization of its resources in order to better serve Capital District Region residents.

		2023		2024		2025	
Bed Type	**# of Beds**	**Days**	**% Occ**	**Days**	**% Occ**	**Days**	**% Occ**
General RHCF	16	5,170	88.5%	4,797	82.1%	3,979	68.1%
TBI/Peds	72[2]	26,257	99.9%	26,448	100.6%	26,287	100.0%
Vent	24	8,797	100.4%	8,778	100.2%	8,735	99.7%
Total	**112**	**40,224**	**98.4%**	**40,023**	**97.9%**	**39,001**	**95.4%**

[2] Pathways is certified for 70 TBI beds, including 36 pediatric beds. Included in the 72-bed count for TBI/Peds beds in the table above are the RHCF's two (2) respite beds.

The demand for vent beds often exceeds existing capacity at the RHCF, resulting in Pathways utilizing some of its Traumatic Brain Injury (TBI) beds for ventilator-dependent patients who also have a TBI diagnosis. As shown in the table above, the TBI unit at Pathways is also consistently operating at or near 100% occupancy. Increasing the number of vent beds at Pathways will expand capacity for this needed service, as well as opening up TBI capacity.

In conclusion, the applicant believes that there is significant need for this proposal at this time. Furthermore, this project will expand vent bed capacity in the Capital District Region without increasing the overall RHCF bed resource. Finally, as there is no construction proposed for this application, Pathways expects to be able to commence operation of the converted vent beds quickly upon approval of this Application.

III. DESCRIPTION OF SERVICES AND OPERATING PHILOSOPHY

Philosophy and Operating Principles

Pathways Nursing and Rehabilitation Center operates with an ongoing set of principles that produce the highest level of care for all residents in the facility. The comfort, dignity and quality of life of each resident are of paramount concern to all staff; resident privacy is maintained at the appropriate levels, consistent with the provision of good health care. This operational philosophy requires the development of a sophisticated plan of care for each ventilator-dependent resident that includes:

- Continuous support to ensure that the resident functions at the highest possible level;
- Implementation of a plan of care that reduces, when possible, the resident's dependence on mechanical ventilation; and
- Diagnosis, care and treatment of all physical and psychological conditions.

Every possible effort is made to create a home-like atmosphere at the facility and to allow each resident to adapt to the environment and experience a high "quality of life." Immediately following admission, an initial care plan is developed. The Minimum Data Set (MDS) is completed within 14 days of admission and an interdisciplinary, comprehensive, individualized plan of care is developed and implemented within seven (7) days after completion of the MDS. The interdisciplinary care team, which consists of the following staff members, has primary responsibility for the development of the care plan. This team consists of:

- Primary Care Physician – a physician experienced in gerontology and the clinical management of residents requiring respiratory care;
- Pulmonologist – an internal medicine specialist with training and experience in pulmonology;
- Registered Nurse – a professional responsible for the day-to-day care of the resident;
- Respiratory Therapist – a specialist responsible for ventilator management;
- Nursing Personnel – staff with specialty training in high technology as required;
- Speech Pathologist;
- Physical Therapist;
- Occupational Therapist;
- Recreation Therapist;

- Social Worker; and
- Registered Dietitian.

In addition, the resident and/or designated representatives are also “members” of the interdisciplinary care team.

This extensive range of specialists facilitates the integration of the ventilator-dependent unit into the overall continuum of services at the facility. All team members and the resident or designee participate in the evaluation and assessment of the resident’s status, the efficacy of the treatment program, the resident’s degree of dependence upon mechanical ventilation and all related activities. The dignity and self-worth of each individual are always in the forefront of the implementation of the resident’s comprehensive care plan. This plan directs the interdisciplinary care team to integrate the utilization of high technological equipment with the care plan activities to continuously improve each resident’s quality of life. The contribution of the resident or designee is critical in the development of strategies and measures for the achievement of desired outcomes.

The specialized staff of the interdisciplinary care team develops a plan of care for each individual resident in the ventilator program that satisfies both the intermediate and long-range goals that have been developed for the specific resident. The plan provides all of the interventions needed to ensure that the resident can achieve an acceptable level of functioning in a safe and secure environment. This generally requires that the team:

- Furnish state-of-the-art mechanical ventilator care;
- Administer respiratory therapy as required;
- Prescribe and dispense appropriate medications;
- Prepare and serve nutritious food;
- Provide physical and occupational therapy as needed;
- Render psycho-social counseling; and
- Develop and implement a plan for appropriate recreational activities for the residents.

All of these services are provided under the supervision of the physician and the registered nurse, who functions as the program manager. The plan of care for each individual resident is reviewed

quarterly and on a daily basis to identify significant changes. All required forms are completed in a time frame that is consistent with the regulations. When the routine assessment of the resident's condition necessitates revisions in the care plan or its components, changes are made and the plan is modified.

The care provided to ventilator-dependent residents is a coordinated effort among all of the staff specialists assigned to the program. For example:

- The attending physician regularly consults with the pulmonologist and all technical staff;
- The program manager has regular discussions with the physical and occupational therapists; and
- The physician and/or registered nurse have regular consultations with all members of the interdisciplinary care team to ensure that the care and treatment of each individual resident is coordinated among all of the specialists.

The Process for Weaning a Resident from Ventilator Dependency

The RHCF's overall philosophy is to provide superior care and improve the day-to-day quality of life. The operating philosophy of this unit is the achievement of independence from mechanical ventilation for as many residents as possible. The process for fulfillment of this goal includes:

- An evaluation, on admission, which identifies the potential for weaning the individual resident from the ventilator;
- The development of a component of the treatment plan that is compatible with the "weaning potential" assessment;
- The attending physician, the nurse, the respiratory therapist and the consulting pulmonologist undertake a continuous assessment of the individual's pulmonary system and tolerance for the weaning process;
- Daily adjustments in the weaning process that are made based upon the care team's assessment of the individual's status;
- Periodic assessment by the physician to evaluate the resident's cardiovascular and renal functions to identify any changes consequent to the weaning process;
- Continuous evaluation of the resident's central nervous system is undertaken by the physician

and the nurse, including sleeping patterns and the ability to preserve the airway;

- Periodic appraisal of the resident by the staff psychologist to ensure that the resident understands the weaning process and the expected benefits of a positive outcome;
- A determination by the nutrition specialist concerning the diet that is needed by the resident in order to be successful in the weaning process. The dietary plan is responsive to the resident's ability to consume food in a normal manner, as well as any cultural or religious restrictions;
- An evaluation by the social work department of the individual's psychological response to the weaning process. The social worker encourages the resident's family to provide emotional support. This staff is also responsible for the amalgamation and coordination of the goals and expected outcomes among the interdisciplinary team and the resident, the family, and where appropriate, the responsible party;
- An assessment by the speech pathologist of the resident's ability to swallow and communicate, including the use of the vocal cords and needed artificial enhancements; and
- Development by the recreation therapy staff of activities, which entertain the resident while helping to improve strength, mobility and coordination. Staff make adjustments in the recreation program in response to the changing needs of the individual resident.

The on-site interdisciplinary care team is supplemented by specialists such as otolaryngologists, mental health clinicians, physiatrists, dental practitioners and any other technical expertise that is required. The team arranges for access to any needed "high-tech" diagnostic equipment or laboratory tests that are identified during the continuous assessment process.

The resident does not, however, live a life of intensive exposure to technology and treatment. Every effort is made to maintain a home-like atmosphere in the unit. The individual's safety, comfort and quality of life are considered in all decisions concerning the weaning process. There is a careful integration of technology and home-like environment for the residents of this ventilator-dependent unit.

Description of Services

The entire continuum of services delivered in the ventilator-dependent unit is integrated with all services of the RHCF. The delivery of each component of the program is coordinated with similar activities in the general resident population.

Program Management

A program manager (RN) will continue to hold the responsibility for the day-to-day management of the proposed, expanded 36-bed ventilator-dependent program at the RHCF. The program manager has training and experience in the administration of ventilator programs. This nurse reports directly to the RHCF's Director of Nursing. The administrator of the facility also exercises general supervision over this expanded program. Although the rehabilitation and restoration program is an integral part of the entire facility, these services are particularly emphasized in the ventilator-dependent unit. The management of the sophisticated equipment and related maintenance issues are the responsibility of the unit program manager. The day-to-day management of the ventilator program requires the unique blending of high-tech equipment, sophisticated personal care and the home-like atmosphere that is critical in a good RHCF. The program manager is responsible for integrating these activities.

Medical Services

All medical services for this unit are delivered under the direction of the RHCF's Medical Director. There is physician coverage 365 days per year, 24 hours per day for the program. The Medical Director and all other physicians involved in the program have experience and proper training in the care and management of residents requiring ventilator services.

It is expected that each resident will have an "encounter" with a physician at least once per week, more in most cases, and each day when required. There is also available a consulting psychiatrist with the background in the treatment of ventilator-dependent residents, and a consulting pulmonologist. The physicians also participate in interdisciplinary team meetings, resident rounds, staff consultation and Quality Improvement activities.

Nursing Staff

The program manager is responsible for the ongoing management of the unit and supervises all nursing, technical and support staff in the implementation of the plan of care and treatment of each resident. Please note that the RN, LPN and CNA staff assigned to the ventilator-dependent unit at Pathways have no responsibilities except for this program and its ventilator-dependent residents.

The staffing in the ventilator-dependent unit is sufficient to satisfy the care needs of the residents.

The number of RNs on each shift who are assigned to care for the residents will be consistent with the regulations and with the State Health Department's staffing recommendations.

The registered nurses are responsible for the direct delivery of nursing care to the individual residents. Under the direction of the program manager, the nurses develop, implement, coordinate and evaluate the nursing regimen for each resident in the program. The professional nursing staff implements the plan developed by the interdisciplinary care team for each resident. These responsibilities include planning, distributing and discussing assignments with subordinate staff; delegating responsibilities; communicating with all team members, as well as the director of nursing; accepting and recording physicians' orders; and all other assignments related to the resident's care and the efficient operation of the program.

The care needs of ventilator-dependent residents are often intense. For example, these residents generally have high levels of need for feeding assistance, fluid administration, and "suctioning" (at least six (6) times per shift for most residents). The residents also have high levels of incontinence, take an average of 10 medications and require staff assistance with bed-to-chair transfers.

To assure that all of the resident's care needs are met, the program manager, with other nursing personnel, supervises subordinate staff and performs direct care as needed. Pursuant to the philosophy of the facility, all nursing staff encourage residents to attain their goals, increase independence and enjoy a satisfactory quality of life.

All staff receive training to help them develop the tools necessary to assist the residents in dealing with concerns about their quality of life in a "high-tech" atmosphere.

Respiratory Therapy Service

The respiratory therapy service is a critical element in the plan for the care and treatment of ventilator-dependent residents. This service is provided in a specially designated room or at the resident's bedside, which has access to oxygen and suctioning capabilities. Each resident is seen by a RRT a minimum of twice a day and more if clinically indicated.

The unit is staffed by registered respiratory therapists (RRT) in sufficient numbers to meet resident needs. The RRTs are a key component of the interdisciplinary care team and have the responsibility,

with the specialty physicians, for the determination of each resident's degree of need for ventilator assistance. These specialists also make a major contribution toward the development of a treatment plan for each individual resident in conjunction with the activities of the interdisciplinary care team.

The RRTs work closely with the nurse and physician to evaluate the resident's respiratory status, including weaning potential, and in establishing and implementing the treatment plan to achieve the respiratory-related goals. The RRTs report directly to the unit's program manager and will assist subordinate staff in all technical areas. This specialized staff brings to the care team an ability to understand each resident's respiratory problems and the resident's ability to progress from full-time reliance on the ventilator to a lesser dependence. The RRTs make recommendations to the interdisciplinary team and provide "hands-on" respiratory therapies.

The respiratory therapy services delivered in the ventilator-dependent program include: the therapeutic and diagnostic use of medical gases; gas administering devices; life-support services for the mechanically ventilated resident; postural drainage; bronchopulmonary hygiene; breathing exercises; chest physical therapy; respiratory rehabilitation; cardiopulmonary rehabilitation; natural and artificial airways; conducting evaluations and reporting of tests as an adjunct to diagnosis; the planning of treatment programs; collecting specimens of blood and other materials; pulmonary function testing; and teaching respiratory care procedures to the resident and to the family.

The registered respiratory therapists are also responsible for checking the ventilator settings in collaboration with the physician. The RRTs have expertise in the use of the ventilator equipment and are knowledgeable concerning the modes of ventilation. They respond to ventilator alarms and any other emergency situations (as do all staff). In accordance with State Health Department regulations, the unit's electrical power system is connected to an emergency generator to ensure an ongoing power supply to the ventilators, and other systems on the unit, and also already serves the 12 proposed additional ventilator-dependent beds.

The RRTs conduct in-service education programs and furnish on-the-job training to update nursing, technical and subordinate staff on the latest state-of-the-art ventilator equipment and respiratory therapy techniques.

Physical Therapy

The day-to-day operating principles at the RHCF emphasize the enhanced quality of life for each of the residents. The physical therapy service is a critical component in the overall scheme for the restoration of function to the resident population. The individuals participating in the ventilator-dependent program have different needs than the conventional nursing home population, as well as a different age distribution. It is, however, expected that the residents in the unit will need physical therapy. Experience indicates that the residents who are newly admitted to the RHCF require frequent physical therapy subsequent to admission, often each day.

A physical therapy regimen is undertaken to improve and maintain optimal functioning, muscle strength and endurance. The objectives of the physical therapy treatment program are to restore and strengthen functions and endurance needed for mobility, relieve pain, promote healing, prevent increased disability and, if required, encourage adaptation to permanent disability. Physical therapy also includes the use of heat, cold, hydrotherapy, massage, electrotherapy, ultrasound, therapeutic exercise, gait training and other appropriate techniques to improve the person's ability to handle the routine tasks of daily living.

The physical therapy component of the interdisciplinary care plan for the ventilator-dependent residents may involve two (2) to three (3) physical therapy staff members due to the nature of the equipment involved. Treatment sessions last approximately an hour when the resident is a ventilator-dependent resident, compared to 30 minutes for the traditional resident. The extensive equipment required to serve ventilator-dependent residents increases the treatment time. The physical therapist provides in-service training to all staff to enable them to support and reinforce the positive outcomes predicted as a result of physical therapy treatments.

Occupational Therapy

The occupational therapy program at the RHCF is designed to be responsive to both the physical and psychological problems of the residents. This principle is particularly important for the residents of the specialty unit, because of the significant emotional distress associated with ventilator dependence.

The physical condition of the residents in the ventilator-dependent unit is quite different than that of the residents in a typical geriatric unit. The primary difference is the continuing requirement for some assistance in breathing. Many residents in this unit also have other debilitating conditions

associated with the cause of their compromised health status, such as loss of mobility, due to accidents or disease.

In order to achieve the goal of greater independence and a more enjoyable quality of life, many of the RHCF's ventilator-dependent residents must develop some wheelchair mobility/seating skills, improve range of motion, learn the use of the portable ventilator, and other tasks that are necessary for long-term functioning. Positioning devices are particularly important to assist with the resident's respiratory capacity. Occupational therapy is involved in identifying the most appropriate device(s) for each resident. The occupational therapy service is also involved in the development of communication devices and wheelchairs adapted to resident needs.

Those residents who can participate in occupational therapy are identified and a program to maximize their functional capabilities is designed by the interdisciplinary care team. Individuals or their designee, when possible, are active participants in developing specific therapeutic tasks and activities for their comprehensive care plan.

Another goal of the occupational therapy program is to assist the resident in building the self-confidence needed to manage life and to become a productive citizen in the community. Some residents will, unfortunately, never return to their community. However, any degree of improvement in living skills and mobility through occupational therapy does, in turn, improve the resident's quality of life in the RHCF.

The majority of the residents in this program participate in occupational therapy five (5) days a week. The occupational therapy program staff provides instruction to other staff working with the program during in-service education activities, which allows them, in turn, to provide advice and encouragement to the residents, consistent with program goals.

Recreation Therapy

Ventilator-dependent residents need diversion and entertainment, perhaps more than the traditional RHCF resident. The recreation therapy program provides activities that entertain, stimulate and contribute to emotional stability for the resident. There are group activities such as crafts, board games and social games, some of which are created for use at the resident's bedside. The activities developed by the recreational therapist are geared to the age, medical and psychological condition of

each resident.

The recreational process is designed for the ventilator-dependent resident who has retained his/her cognitive abilities and has the capacity to participate in the program. The activities for this individual generally consume a greater portion of time than those conducted for the typical geriatric resident. This situation occurs for several reasons. Completion of a game may require assistance such as writing on a pad, lip talking/reading, or use of a communication alphabet board. Physical impairments often require that the resident be assisted with the activity, i.e., moving game pieces, assisting with craft projects or turning pages of a book. Finally, it may be necessary to interrupt the activity for treatments that the resident might need, such as suctioning.

Sensory Therapies

The diseases, accidents or other problems that lead to ventilator dependence also frequently impact one or more of the sensory therapies. The most common need of residents is for speech therapy.

Many residents who use the ventilator have swallowing problems. Their ability to swallow has an effect on their ability to chew and ingest food and on their verbal communication skills. The speech pathologist conducts a thorough assessment of each resident. The individual assessment includes input from the nursing and nutrition staff when required. When it is determined that this regimen will be efficacious, the residents are provided with speech therapy and training that improves their communication skills. There are a number of communication techniques and devices used in treatment, consistent with the resident's evaluation and needs. Some residents are trained in the use of mechanical speech aids.

The speech pathologist has experience with persons who are or have been ventilator-dependent. This service, generally provided once a day, five (5) times a week, is a typical part of the restorative care provided to the RHCF residents who need assistance with swallowing, speaking and communicating. The speech pathologist works with all program staff, through in-service education and training, to teach them to assist the resident in eating and swallowing techniques, and staff encourages the residents in pursuit of the goals established during therapy.

Hearing therapy and visual therapy are provided when the need is identified through the initial evaluation, or during the ongoing treatment of the resident. The physical deterioration resulting from

the aging process often causes problems in hearing and vision. In light of the fact that the residents are generally age 65 and older (approximately two-thirds of those in the program), there is a need for these therapies for many residents.

Social Work

The social worker is available to the resident and the family to respond to emotional or interpersonal problems relating to the impact of the ventilator, and in adjusting to the new environment and routines. A key task is working with the residents, and/or their designees, to coordinate discharge plans to a general RHCF bed either at Pathways or another RHCF or to the community, especially in the area of follow-up care. The case management function, and the need to help the resident and family adjust to either a temporary or permanent disability, are high priorities. Social work staff works closely with nursing staff in the case management function. The social worker must provide emotional support to the resident and/or family as they begin to comprehend the consequences of a life-long disability complicated by other trauma and the disease processes. The vagaries of the weaning process may contribute to emotional problems because people often must be weaned repeatedly, as they experience setbacks in their independence from the ventilator.

The social worker also: functions as an advocate for residents, including assisting in applying for and receiving benefits; develops opportunities for social action by the residents; and provides counseling and support of other staff members and 24-hour crisis intervention as a component of the facility-wide program.

Nutrition and Dietary Service

The nutrition and dietary service is one of the most important components of a residential health care facility and is even more important in the ventilator-dependent unit. It is important from both an organic perspective (providing the nutrition necessary for growth and healing) and a psychological perspective (providing stability, socialization and self confidence essential to the care of the elderly).

Nutrition becomes especially important on a ventilator-dependent unit because a large number of the people on the unit are fed through gastrostomy tubes or nasogastric tubes. In addition, many residents require total assistance with feeding. For those residents who are able to eat “regular” meals, the dietary staff develops appropriate diets in conformance with the care plan. As individuals age, mealtime becomes a very important event each day. The facility is committed to providing

nutritious, tasty, well-presented meals at all times. All meal plans and nutrition counseling include recognition of the food likes and dislikes of the individual resident and, to whatever extent possible, the ethnic and cultural background of that person. The professional staff assures that each resident's nutritional status is not compromised due to the resident's limitation in swallowing. For example, although the resident may be able to eat, swallowing problems may affect the quantity of food that is being consumed, necessitating supplemental feedings through alternative means, such as feeding tubes.

The unique disabilities of the residents in the ventilator-dependent unit (including the proximity of "high-tech" equipment) often require special arrangements for feeding and adapting meals to each resident's nutritional status and ability to swallow. This is usually accomplished by soft or finely ground foods and the use of feeding tubes. As indicated above, mealtime socialization is also important. The residents of the ventilator-dependent unit who are healthy and mobile enough to participate in group meals are encouraged to travel to the dining room.

Ancillary Services

Mental health services are available from the RHCF's consultant psychiatrist and psychologist. Personal care and grooming are provided on the unit, both in resident rooms and in a designated area, as appropriate. Pharmaceutical, laboratory and basic radiological services are provided in-house. Access to high-tech diagnostic and treatment services such as MRIs, sophisticated laboratory services, chronic renal dialysis, lithotripsy, linear accelerators, etc., are provided as needed.

Quality Improvement

Pathways Nursing and Rehabilitation Center's Quality Improvement (QI) Program is managed by the Director of Quality Improvement. The monitoring of the ventilator-dependent program includes all of the regular audit protocols, as well as those specialty activities unique to this program. The standards are applied in a manner designed to result in quality outcomes in the treatment scheme. Staff are trained to ensure that they are sensitive to the extraordinary needs of the ventilator-dependent population. An in-service education program and professional standards development are important components of the QI Program, which encompass all levels of staff and all disciplines providing care in the program. The abiding philosophy for this service and all activities in the RHCF's program is that each resident is entitled to the highest quality of care. The ventilator-dependent program's QI Program is operated in accordance with Part 415 of Title 10 New York

Codes, Rules and Regulations, including Section 415.38 and all regulations applying to ventilator-dependent programs and residents.

Associated Operating Principles

The following operating principles generally apply to all of the programs and services provided by Pathways Nursing and Rehabilitation Center, including the proposed, expanded 36-bed ventilator-dependent program.

Discharge and Transfer/Utilization Review and Monitoring

All residents in the ventilator-dependent program are routinely assessed to determine the practicability of discharge from the ventilator unit to another more traditional RHCF unit, to home or to a congregate living arrangement. Planning for discharge for all residents begins upon the individual's admission, when the potential for discharge is evaluated. As the resident's condition changes, the care plan is updated. The attending physician, nurse, social worker, respiratory therapist, occupational therapist, physical therapist, recreational therapist and other pertinent staff are involved in the discharge planning process. The meetings of the interdisciplinary team responsible for the care and treatment of the resident focus on the potential for discharge and play an important role in the process. The resident and the resident's designated representative are involved with the discharge planning, and, when appropriate, are trained in the handling of equipment and meeting other care needs.

When discharge is considered, it is essential that required supportive services are in place to ensure that the residents can make a smooth transition to the new setting. The discharge planning staff at the RHCF are experienced in arranging for home modifications, equipment and assistance for residents in their home setting and in documenting the resident's clinical record. Pathways has working relationships with appropriate certified home health agencies, rehabilitation facilities and primary care networks in order to ensure that needed services are available for discharged residents. Pathways also has transfer agreements with hospitals in order to facilitate transfer of residents in need of more sophisticated or acute treatment.

Recruitment and Retention of Staff

Pathways will adhere to the most up-to-date recruitment strategy. The continuous recruitment campaign includes the development of active relationships with professional associations, area

nursing agencies, nursing registries and other health care personnel agencies. The RHCF's personnel staff attends local health fairs, job training programs and other events to make the community aware of available jobs. Recruitment efforts also include advertising in local newspapers and other outlets. The RHCF offers attractive salary and benefit packages with the understanding that the expertise required for the ventilator-dependent program commands a higher level of compensation than that provided to traditional RHCF staff.

It is axiomatic that a superior retention program must accompany the recruitment effort. The RHCF's plan for retention includes providing an environment of the best possible working conditions, with appropriate working areas, modern equipment, technical and psycho/social support programs and adequate leisure-time space. Pathways has developed training and education programs to ensure that staff in the facility qualifies for promotion. Personnel and time/attendance policies at the RHCF allow employees the opportunity to attend job-related seminars and conferences and there are appropriate staff support groups available to all employees.

This recruitment and retention strategy allows Pathways to employ well-trained, sensitive staff that are capable of delivering quality service in the ventilator program.

Credentialing/Training Program for Staff

In accordance with its two (2) primary operating principles, that is, provision of the highest quality of care and the development of knowledgeable, skilled, sensitive employees, the RHCF provides a multitude of training opportunities particular to staff in the ventilator-dependent program. The training programs promote a high level of knowledge and understanding among the staff of this program concerning the physiological and psychological changes associated with ventilator dependency, the implications of this dependency and methods to encourage the functional independence of the residents. The unique needs of ventilator-dependent persons are highlighted during initial education sessions and emphasized in the in-service training activities. Management staff conducting these sessions utilize state-of-the-art techniques and teaching methods to instruct staff and assist in the achievement of the goals of independence in functional mobility, communication, feeding and other personal care activities.

One of the most important endeavors for the management of the expanded program is the development of a ventilator orientation program that must be completed before a professional can

work in the program. The orientation modules cover such topics as review of the respiratory system, parameters that measure respiratory efficiency, manifestations indicating mechanical ventilation, types of ventilators, modes of ventilation, Positive End Expiratory Pressure (PEEP) and Continuous Positive Airway Pressure (CPAP), review of the ventilator models used by the program, complications of mechanical ventilation, manual resuscitator bag suctioning, pulseoximetry, chest physical therapy, bronchodilators/nebulizers and medications. The program also includes familiarization with weaning indication/criteria, equipment and procedures, types of oxygen administration, respiratory emergency procedures, nursing and respiratory documentation, quality of life issues and the interdisciplinary team approach to care. There is instruction related to "do not resuscitate" (DNR) and advance directives in the training and orientation program.

In addition, the physicians serving residents in this program are credentialed in keeping with the RHCF's existing credentialing process, with additional emphasis placed on experience in treating the ventilator-dependent population.

LETTERS OF SUPPORT

ST PETER'S HEALTH PARTNERS

A Member of Trinity Health

315 South Manning Boulevard
Albany, New York 12208
ph 518.525.1111

sphp.com

1/19/26

To Whom It May Concern:

St. Peters and Samaritan Hospitals are acute care hospitals that serves as a major referral center for Upstate, New York. As part of our daily discharge planning process, our case management and social work teams work diligently to transition patients who no longer require acute hospital services to the appropriate post-acute level of care.

Over the past years, we have experienced a severe and worsening community-wide shortage of skilled nursing facility beds capable of accepting and managing mechanical ventilator-dependent patients. These patients are medically stable for SNF-level care but exceed the clinical capabilities and comfort level of nearly all traditional nursing homes in our service area. The proposed addition of ventilator-capable beds at Pathways Nursing and Rehabilitation Center will directly address the community deficit by creating accessible, appropriately staffed beds for some of the most complex patients we struggle to place today.

If not possible, patients will continue to wait in key ICU beds that backlog the community's needs, as well as referrals being sent over 2 hours away.

Sincerely,

Deb House

Clinical Executive, Integrated Care

ALBANY MED Health System

ALBANY MEDICAL CENTER

Department of Case Management and Utilization Review

December 1, 2025

To Whom It May Concern:

Albany Medical Center is a 766-bed acute care hospital that serves as a major referral center for nearly 30 counties and is the only academic medical center within a 150-mile radius of our main hospital campus. As part of our daily discharge planning process, our Case Management and Social Work teams work diligently to transition patients who no longer require acute hospital services to the appropriate post-acute level of care.

Over the past several years, we have experienced a severe and worsening community-wide shortage of skilled nursing facility beds capable of accepting and managing mechanical ventilator-dependent patients. These patients are stable for the skilled nursing facility level of care but exceed the clinical capabilities and comfort level of nearly all traditional nursing homes in our catchment area. Often, the only open beds for these patients are several hundred miles away and force residents of our community to be discharged far from home and their families.

In the absence of appropriate skilled nursing level of care beds for these ventilator dependent patients, they remain in the hospital ICU. As a result, the inability to transition these patients to an appropriate level of care impacts not only these individual patients but also may impede access to necessary critical care for additional patients in our community.

We believe the proposed addition of ventilator capable beds at Pathways Nursing and Rehabilitation Center will directly address this community deficit by creating accessible, appropriately staffed beds for some of the most complex patients we struggle to place in post-acute care today.

Thank you for your consideration.

Signed,

Alycia Gregory, LMSW

APPENDIX B

DRAFT BED CONVERSION PLAN

Pathways Nursing and Rehabilitation Center
1805 Providence Avenue, Niskayuna (Schenectady County), New York 12309
BED CONVERSION PLAN
Operating Certificate No. 4652302N; PFI No. 4092
DATE

Summary

Pathways Nursing and Rehabilitation Center (Pathways), a 110-bed residential health care facility (RHCF) located at 1805 Providence Avenue, Niskayuna (Schenectady County), New York 12309, is submitting this Bed Conversion Plan seeking New York State Department of Health (NYSDOH) approval to convert 12 general RHCF beds to 12 ventilator-dependent beds ("vent beds"). Pathways is not closing.

Under separate cover, Pathways has submitted an Administrative Review Certificate of Need (C.O.N.) Application (Project No. 261XXX) for the conversion of beds. The number of certified vent beds at the RHCF will increase from 24 to 36. The number of certified general RHCF beds will decrease from 16 to four (4). There will be no change to the total certified bed capacity of the RHCF.

1. **Evidence of verbal and written notification to the Regional Program Director at the time closure was contemplated.**

   Verbal notification was made to the Capital District Regional Office (CDRO) on DATE by Mr. William Wohltjen, Administrator at Pathways. Submission of this Bed Conversion Plan constitutes the written notification to CDRO.

2. **Confirmation that the facility contacted its Fiscal Intermediary to request a copy of the CMS-855A form that must be completed following the last resident's discharge.**

   Pathways is not closing. Pursuant to Project No. 261XXX, the RHCF is converting 12 general RHCF beds to 12 vent beds.

3. **Target closure date, facility capacity, and current census. The target closure date is not necessarily the date that the facility will be deemed by the Department to be closed. A full range of appropriate services for all patients/residents must be provided throughout the entire closure process.**

   The conversion date for the 12 RHCF beds is currently projected for DATE, pursuant to completion of C.O.N. Project No. 261XXX. There is no construction required for the bed conversion. As a result, the applicant expects to be able to complete the C.O.N. Application quickly upon receipt of final approval by the Department.

   As of February 6, 2026, the census of the facility was 108 residents, including 24 ventilator-dependent residents. Pathways will continue to provide a full range of services for residents in its general RHCF beds throughout the conversion process. The decrease in census down to four (4) general RHCF residents is expected to occur gradually through attrition as current general RHCF residents no longer in need of skilled nursing care are discharged back to their homes, as appropriate. Current general RHCF residents will be able to remain at Pathways for as long as they wish. No current residents will be transferred to other RHCFs (unless that is the resident's expressed desire).

4. **Name, title, telephone number, and email address of the individual designated as the provider's contact person throughout the closure process. The submitted closure plan must include sufficient detail to clearly identify the steps the facility will take, and the individual responsible for ensuring the steps are successfully carried out. Simply stating that the activity will be carried out consistent with statute and regulation will not be sufficient. Please clearly explain the details of the activity.**

   William Wohltjen
   Administrator
   (518) 530-9222
   wwohltjen@pathways-rehab.com

5. **Name, title, telephone # and email address of the individual responsible for coordinating closure, if different from the individual identified in #4. If more than one individual has been assigned to separate closure duties (e.g., discharge coordination, directing clinical care, media contacts, equipment disposal, medical record disposition etc.), all names and contact information must be included.**

   William Wohltjen
   Administrator
   (518) 530-9222
   wwohltjen@pathways-rehab.com

6. **A narrative description of the proposed plan to notify residents, patients, designated family members, sponsors, staff, physicians and Medicaid Managed Long Term Care providers of the closure plan. This should include written notification and meetings. Include dates and times of meetings, if available at the time of submission of the proposed plan, so that Department staff may attend. A copy of the sample letter to the resident, resident's representative, family and staff should be provided with the closure plan. Letters should include a contact name and phone number in the event questions should arise. It should indicate who will be signing the letter. Include a draft written notification for each party in an appendix. Please note that the final letters or notices, issued upon closure plan approval, must be provided to the Department upon release.**

   Upon approval of this Bed Conversion Plan by the Department, written notification of the conversion of 12 general RHCF beds to 12 ventilator-dependent beds will be provided to all current residents at Pathways, family members/next of kin, guardians, sponsors, and powers of attorney. A sample of the written notification is provided under **Appendix A** of this Bed Conversion Plan. The letter will be signed by William Wohltjen, Administrator at Pathways. Subsequent to the written notification, Pathways will hold a town hall meeting with residents to provide more information regarding the bed conversion and allow residents and families to ask questions or raise concerns.

Written notification will also be provided to the RHCF's staff upon the Department's approval of this Bed Conversion Plan. A sample of the written notification is included under **Appendix A**. Please note that Pathways anticipates no job losses as a result of the proposed conversion of beds.

Pathways is not closing. The facility will continue to operate with a new total of 36 vent beds and four (4) general RHCF beds (in addition to its 70 TBI/pediatric beds and two (2) respite beds). Therefore, no notification to Medicaid Managed Long Term Care providers is necessary.

7. **If the facility provides services for individuals other than nursing home residents, such as an Adult Day Health Care Program, clinics, Meals-on-Wheels, etc., a narrative description of the plan to discontinue those services. The plan should include referrals to alternate programs for registrants/customers.**

   Not Applicable.

8. **A description of the plan to manage media contacts initially and throughout the process. Media releases should be coordinated with the Department prior to release. No public announcements or potential closure information may be disclosed to the media until the Department's written approval of an orderly closure plan has been received.**

   Media contacts will be managed by William Wohltjen, Administrator at Pathways, throughout the conversion process. Any media releases will be coordinated with New York State Department of Health prior to release. No public announcements or potential conversion information will be disclosed to the media until the Department's written approval of the Bed Conversion Plan has been received.

9. **A description of the plan to involve the facility's Ombudsman. The plan shall include, at a minimum, ensuring the facility's Ombudsman is: aware of the closure; notified of and has the opportunity to attend the resident and family meetings; copied on all discharge notices; invited to participate, with authorization, in discharge planning conferences to advise and support the resident; able to advocate and consult on problems and suggest possible solutions; and invited to follow up with residents after having moved.**

   Written notification will be provided to Pathways' Ombudsperson upon approval of this Bed Conversion Plan by the Department. A copy of the notification letter is included under **Appendix A**. The Ombudsman will also be invited to the town hall meeting with residents regarding the bed conversion and any other subsequent town hall meetings. The Ombudsperson will be notified of all communications to residents and their families and will be provided regular updates on the status of the Bed Conversion Plan.

10. **A plan to notify local elected officials of the approved closure plan. Such notification must include the name and any affected program type/s, i.e., nursing home, adult day health care program, transitional care unit, etc.; and the name, title, telephone # and email**

address of the individual designated as the provider liaison throughout the closure process and their targeted closure date.

Written notification will be provided to local elected officials upon approval of this Bed Conversion Plan by the Department. A sample of the written notification is included under **Appendix B.**

11. **The plan to discontinue admissions. Ensure that the facility does not admit any new residents on or after the date on which such written notification (i.e., the closure plan) is submitted, consistent with 42 CFR § 483.70(k)(2). Include the plan to notify all referring institutions.**

    Pathways is not closing and there will be no impact on admissions as a result of the conversion of 12 general RHCF beds to 12 vent beds. The facility will continue to operate with a new total of 36 vent beds and four (4) general RHCF beds (in addition to its 70 TBI/pediatric beds and two (2) respite beds). The decrease in census down to four (4) general RHCF residents is expected to occur gradually through attrition as current general RHCF residents no longer in need of skilled nursing care are discharged back to their homes, as appropriate. Current general RHCF residents will be able to remain at Pathways for as long as they wish. No current residents will be transferred to other RHCFs (unless that is the resident's expressed desire).

    Pathways will provide written notification to referring institutions/providers regarding the conversion of beds to increase ventilator-dependent capacity at the RHCF. A sample of the notification is included under **Appendix A** of this Bed Conversion Plan. The written notification will be sent to referring institutions/providers upon approval of this Bed Conversion Plan by the Department.

12. **The plan to identify appropriate placement for current patients/residents, including:**
    - **The process to identify all residents who are interested in community placement and make a referral for them to the current Money Follows the Person contractor, New York Association on Independent Living (NYAIL).**
    - **The process to identify current patients/residents who are participants in Medicaid Managed Long Term Care (MLTC) and who their MLTC plans are. The MLTC plans must be included in identifying future placement options for residents/patients. The facility must develop a plan to involve the MLTC plan and to ensure patients/residents who participate in MLTC and their families are aware of all placement options and potential impact on relocation if, for example, the resident's MLTC plan does not have arrangements with a nursing home which the resident is considering.**
    - **The process for making determinations regarding bed availability at other area facilities, providing information about other facilities to patients/residents/families, ensuring that the wishes of current patients/residents/families are respected when placement decisions are made, and ensuring that concerns such as geographic**

location, availability of/access to public transportation, type of facility/provider, ability to meet the resident's medical and behavioral health needs, etc. are addressed in identifying future placement options for residents/patients.

Pathways is not closing and there will be no impact on admission as a result of the conversion of 12 general RHCF beds to 12 vent beds. The facility will continue to operate with a new total of 36 vent beds and four (4) general RHCF beds (in addition to its 70 TBI/pediatric beds and two (2) respite beds). The decrease in census down to four (4) general RHCF residents is expected to occur gradually through attrition as current general RHCF residents no longer in need of skilled nursing care are discharged back to their homes, as appropriate. Current general RHCF residents will be able to remain at Pathways for as long as they wish. No current residents will be transferred to other RHCFs (unless that is the resident's expressed desire).

13. **The plan to ensure that records including current assessments, care plans, medication and treatment records, histories, discharge summaries, identifying information, etc. are transferred in a secure manner with residents/patients who are being relocated.**

    As noted above, the decrease in census down to four (4) general RHCF residents is expected to occur gradually through attrition as current general RHCF residents no longer in need of skilled nursing care are discharged back to their homes, as appropriate. Current general RHCF residents will be able to remain at Pathways for as long as they wish. No current residents will be transferred to other RHCFs (unless that is the resident's expressed desire).

14. **The plan to ensure that resident/patient belongings will be secured and transferred.**

    As noted above, the decrease in census down to four (4) general RHCF residents is expected to occur gradually through attrition as current general RHCF residents no longer in need of skilled nursing care are discharged back to their homes, as appropriate. Current general RHCF residents will be able to remain at Pathways for as long as they wish. No current residents will be transferred to other RHCFs (unless that is the resident's expressed desire).

15. **The plan for allocation and security of resident and resident council funds. The facility must complete a full accounting of resident funds, on a resident-specific basis, prior to closure. The plan must include a signed attestation by the operator that the accounting is accurate. The plan should describe how resident funds are being protected.**

    Pathways is not closing and there are no resident council funds.

16. **The plan must also include a signed attestation that all resident funds are secure. The accounting should be sent to the Department Regional Office upon request. The attestations must be included in the closure plan submitted to the Department for review. Resident funds should be sent to the receiving facilities when residents are transferred.**

    Pathways is not closing and there are no resident council funds.

17. **The plan to determine the appropriate method of transport to be utilized for patients/residents.**

    As noted above, the decrease in census down to four (4) general RHCF residents is expected to occur gradually through attrition as current general RHCF residents no longer in need of skilled nursing care are discharged back to their homes, as appropriate. Current general RHCF residents will be able to remain at Pathways for as long as they wish. No current residents will be transferred to other RHCFs (unless that is the resident's expressed desire).

18. **Completion of the current (at the time of closure plan submission) resident roster template with unique initials for each resident. This will be used throughout the closure process and should be updated and shared with the Regional Office and Ombudsman not less than weekly.**

    Pathways will provide updated resident roster templates to the Regional Office and Ombudsman not less than weekly throughout the conversion process.

19. **The plan for follow-up after patients/residents are relocated. Follow-up should occur for a minimum of thirty (30) days after discharge and include follow up for relocation stress syndrome/transfer trauma. The plan should include communication with receiving facilities throughout the follow-up process.**

    As noted above, the decrease in census down to four (4) general RHCF residents is expected to occur gradually through attrition as current general RHCF residents no longer in need of skilled nursing care are discharged back to their homes, as appropriate. Current general RHCF residents will be able to remain at Pathways for as long as they wish. No current residents will be transferred to other RHCFs (unless that is the resident's expressed desire).

20. **The plan for disposition of the building and its contents following the discharge of all patients/residents.**

    Pathways is not closing. The facility will continue to operate with a new total of 36 ventilator-dependent beds and four (4) general RHCF beds (in addition to its 70 TBI/pediatric beds and two (2) respite beds).

21. **The plan to dispose of drugs, and biologicals, chemicals, radioactive materials.**

    Pathways is not closing. All supplies will be maintained at the facility for future use.

22. **The plan for appropriate record retention.**

    - **10 NYCRR § 401.3(i) requires Department approval of the plan for the maintenance, storage, and safekeeping of resident records. The plan should**

provide adequate safeguards for such records and provide ready access to residents and their physicians.

- **10 NYCRR § 415.22 mandates that clinical records shall be retained for six years from the date of discharge or death, or for residents who are minors, three years after the resident reaches the age of 18.**
- **10 NYCRR § 86-2.7 requires that all fiscal and statistical reports filed by the facility with the Department, including underlying books, records and documentation, be kept and maintained for at least six (6) years from the date of filing, or the date upon which they were to be filed, whichever is later. The plan should identify the location of record storage, the individual responsible for ensuring compliance with contact information, and a description of how former residents, designated representatives or other appropriate parties may request copies of records.**

Pathways is not closing. The RHCF will continue to maintain all clinical records for the statutorily required amount of time in 10 NYCRR Section 415.22. Clinical records, which are maintained in the facility's electronic clinical record, are stored in compliance with New York State law and are made available to residents (or their guardians) upon written request.

In compliance with 10 NYCRR § 86-2, all required fiscal and statistical reports will continue to be filed with the Department, including underlying books, records and documentation for the statutorily required amount of time. Financial and statistical reports, including underlying books, records and documentation are maintained in compliance with the facility's record retention policy, which includes the scanning of records into electronic format allow for retrieval of records, as needed, and copies made available to authorized parties and agencies upon written request.

23. The plan to ensure that appropriate documentation is available to staff related to payroll information, health insurance, recertification of CNAs etc.

- **See the guidance provided under 10 NYCRR § 86-2.7. This documentation must be kept and maintained for at least six (6) years from the date of filing, or the date upon which they were filed, whichever is later.**

Pathways is not closing. The facility will continue to operate with a new total of 36 ventilator-dependent beds and four (4) general RHCF beds (in addition to its 70 TBI/pediatric beds and two (2) respite beds). The facility does not anticipate any impact on existing staff as a result of the conversion of beds, including no job losses. In compliance with 10 NYCRR 86-2.7, Pathways maintains required staff information documentation for the statutorily required amount of time.

24. The plan should include very specific reference as to how the facility will establish and maintain ongoing communication with the Department, weekly at a minimum, throughout each step and milestone of the closure process.

Mr. William Wohltjen, Administrator at Pathways, will contact the NYSDOH Capital District Regional Office on a weekly basis, or more often, when necessary, to provide an executive summary of the week's events related to the conversion of beds, including meetings held with residents/designated representatives and Pathways staff, current census data, and staffing information. Mr. Wohltjen will ensure all aspects of the Bed Conversion Plan have been successfully completed. This communication process will continue for a mutually agreed upon timeframe following conversion of the 12 general RHCF beds to 12 ventilator-dependent beds.

25. The plan to ensure adequate staffing throughout the closure process, and to ensure that staff have information regarding other employment opportunities.

Pathways is not closing. The facility will continue to operate with a new total of 36 ventilator-dependent beds and four (4) general RHCF beds (in addition to its 70 TBI/pediatric beds and two (2) respite beds). The facility does not anticipate any impact on existing staff as a result of the conversion of beds, including no job losses.

Pathways strives to maintain the minimum daily staffing hours equal to 3.5 hours of care per resident day (HPRD) by a certified nurse aide, licensed practical nurse or registered nurse, as required in 10 NYCRR 415.13. In addition, Pathways has an emergency/contingency nurse staffing plan in place where daily staffing practices are used to evaluate the level of nurse staffing every eight (8) hours, or more often if needed based on patient census and acuity level, to meet the care needs of each resident. Pathways has nurse staffing agency contacts in place that will be leveraged to provide RN, LPN and CNA coverage, when needed. If necessary, Pathways will be prepared to utilize the facility's Emergency Management Plan should an issue that has the potential to impact the safety or well-being of residents, such as staffing, arise.

26. A summary of the facility's current financial condition and description of the assets available to the operator to maintain appropriate services during the closure period.

Pathways is not closing. The facility will continue to operate with a new total of 36 vent beds and four (4) general RHCF beds (in addition to its 70 TBI/pediatric beds and two (2) respite beds). Please find enclosed under **Appendix B** the facility's 2024 audited financial statement and a recent internal financial statement. As of June 30, 2025, the RHCF had positive revenue over expenses and positive working capital.

Appendix A

Draft Notification Letter

LETTER TO RESIDENTS

(RHCF Letterhead)

(Date)

Patient/Guardian Name and Address

Dear Residents and Families:

Throughout our history, Pathways Nursing and Rehabilitation Center (Pathways) has continuously evolved to meet the needs of New Yorkers and our community. We are pleased to announce that Pathways will be expanding our ventilator-dependent unit by 12 beds. This will be accomplished through conversion of 12 general residential health care facility (RHCF) beds. After the conversion of beds, Pathways will have 36 ventilator-dependent beds and four (4) general RHCF beds, in addition to our 70 TBI/pediatric beds and two (2) respite beds. There will be no change to the total number of beds at Pathways.

It should be noted that the decrease in census down to four (4) general RHCF residents is expected to occur gradually through attrition as current general RHCF residents no longer in need of skilled nursing care are discharged back to their homes, as appropriate. Current general RHCF residents will be able to remain at Pathways for as long as they wish. No current residents will be transferred to other RHCFs (unless that is the resident's expressed desire). Be assured that all residents will be given ample support and time to make decisions about relocation to another nursing home, if desired.

To provide you with more information about the planned closure, we will be hosting a town hall meeting for residents, families and loved ones on [date, time, location]. In the meantime, if you have any questions or concerns, please contact us at (518) 374-2212.

We wish to thank you for being a resident of Pathways and look forward to continuing to meet your health care needs in the future.

Sincerely,

William Wohltjen
Administrator

LETTER TO STAFF

(RHCF Letterhead)

Dear Colleagues:

Throughout our history, Pathways Nursing and Rehabilitation Center (Pathways) has continuously evolved to meet the needs of New Yorkers and our community. We are pleased to announce that Pathways will be expanding our ventilator-dependent unit by 12 beds. This will be accomplished through conversion of 12 general residential health care facility (RHCF) beds. After the conversion of beds, Pathways will have 36 ventilator-dependent beds and four (4) general RHCF beds, in addition to our 70 TBI/pediatric beds and two (2) respite beds. There will be no change to the total number of beds at Pathways.

It should be noted that the decrease in census down to four (4) general RHCF residents is expected to occur gradually through attrition as current general RHCF residents no longer in need of skilled nursing care are discharged back to their homes, as appropriate. Current general RHCF residents will be able to remain at Pathways for as long as they wish. No current residents will be transferred to other RHCFs (unless that is the resident's expressed desire).

Please note that Pathways anticipates no job losses as a result of the proposed conversion of beds. It is our goal to support you and keep you informed during this significant transition. We will be hosting staff town halls to share the most up-to-date information and provide an opportunity for you to ask questions. In the meantime, please know that you can reach out to me or our Human Resources team with any concerns.

Thank you for your cooperation and continued dedication to providing our residents, patients, and clients with outstanding care.

Sincerely,

William Wohltjen
Administrator

LETTER TO REFERRING PROVIDERS

(RHCF Letterhead)

(Date)

Provider/Institution Name and Address

Dear Provider:

Throughout our history, Pathways Nursing and Rehabilitation Center (Pathways) has continuously evolved to meet the needs of New Yorkers and our community. We are pleased to announce that Pathways will be expanding our ventilator-dependent unit by 12 beds. This will be accomplished through conversion of 12 general residential health care facility (RHCF) beds. After the conversion of beds, Pathways will have 36 ventilator-dependent beds and four (4) general RHCF beds, in addition to our 70 TBI/pediatric beds and two (2) respite beds. There will be no change to the total number of beds at Pathways.

If you have any questions or concerns, please contact us at (518) 374-2212.

Sincerely,

William Wohltjen
Administrator

LETTER TO ELECTED OFFICIALS

(RHCF Letterhead)

DATE

Dear Elected Representative:

In DATE 2026, Pathways Nursing and Rehabilitation Center (Pathways) filed a Certificate of Need Application and Closure/Bed Conversion Plan with the New York State Department of Health seeking approval to convert 12 general RHCF beds to 12 ventilator-dependent beds. There will be no change to the total certified bed capacity of the nursing home. After the conversion of beds, Pathways will have 36 ventilator-dependent beds and four (4) general RHCF beds, in addition to our 70 TBI/pediatric beds and two (2) respite beds. There will be no change to the total number of beds at Pathways. The proposed conversion of beds will enable Pathways to better meet the need for ventilator-dependent services, particularly in the Capital Region District, which like Upstate New York overall, is underserved for ventilator beds compared to Downstate.

It should be noted that the decrease in census down to four (4) general RHCF residents is expected to occur gradually through attrition as current general RHCF residents no longer in need of skilled nursing care are discharged back to their homes, as appropriate. Current general RHCF residents will be able to remain at Pathways for as long as they wish. No current residents will be transferred to other RHCFs (unless that is the resident's expressed desire).

Pathways anticipates no job losses as a result of the proposed conversion of beds.

Please feel free to contact me with any questions. Thank you.

Sincerely,

William Wohltjen
Administrator

LETTER TO OMBUDSMAN

(RHCF Letterhead)

(Date)

Dear _____:

Throughout our history, Pathways Nursing and Rehabilitation Center (Pathways) has continuously evolved to meet the needs of New Yorkers and our community. We are pleased to announce that Pathways will be expanding our ventilator-dependent unit by 12 beds. This will be accomplished through conversion of 12 general residential health care facility (RHCF) beds. After the conversion of beds, Pathways will have 36 ventilator-dependent beds and four (4) general RHCF beds, in addition to our 70 TBI/pediatric beds and two (2) respite beds. There will be no change to the total number of beds at Pathways.

It should be noted that the decrease in census down to four (4) general RHCF residents is expected to occur gradually through attrition as current general RHCF residents no longer in need of skilled nursing care are discharged back to their homes, as appropriate. Current general RHCF residents will be able to remain at Pathways for as long as they wish. No current residents will be transferred to other RHCFs (unless that is the resident's expressed desire). Be assured that all residents will be given ample support and time to make decisions about relocation to another nursing home, if desired.

To provide residents with more information about the planned closure of beds, we will be hosting a town hall meeting for residents, families and loved ones on [date, time, location]. In the meantime, please feel free to contact me if you have any questions or concerns.

Sincerely,

William Wohltjen
Administrator

Independent Auditors' Report

Member of
Niskayuna Operating Co., LLC
d/b/a Pathways Nursing and Rehabilitation Center

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Niskayuna Operating Co., LLC, which comprise the balance sheets as of December 31, 2024 and 2023, and the related statements of income and member's equity, and cash flows for the years then ended, and the related notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of Niskayuna Operating Co., LLC as of December 31, 2024 and 2023, and the results of its operations and cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Niskayuna Operating Co., LLC and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Niskayuna Operating Co., LLC's ability to continue as a going concern for one year after the date that the financial statements are issued or when applicable, one year after the date that the financial statements are available to be issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Niskayuna Operating Co., LLC's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Niskayuna Operating Co., LLC's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Supplementary Information

Our audits were conducted for the purpose of forming an opinion on the financial statements as a whole. The accompanying supplementary information is presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, except for the effect on the supplementary information of the patient day statistic and resultant cost per patient day, the information is fairly stated in all material respects in relation to the financial statements as a whole.

NOTES TO FINANCIAL STATEMENTS

As of and for the Years Ended December 31, 2024 and 2023

(1) **Nature of Operations** – Niskayuna Operating Co., LLC doing business as Pathways Nursing and Rehabilitation Center ("Pathways" or the "Facility" or the "Operator") is a New York State licensed 112-bed comprised of 16 nursing beds, 34 pediatric beds, 2 pediatric respite beds, 36 traumatic brain injury beds, and 24 vent unit beds. Revenues for services are provided by the Medicaid program, the Medicare program and from private and third-party payor fees. A majority of the Facility's revenues were funded by the Medicaid program.

(2) **Summary of Significant Accounting Policies** - The significant accounting policies followed by the Facility is summarized below:

Basis of Accounting - The Facility utilizes the accrual basis of accounting and reports accordingly.

Use of Estimates - The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Reclassifications - Certain prior period amounts have been reclassified to conform to the current period presentation. These reclassifications have no effect on previously reported net income.

Cash and Cash Equivalents - The Facility considers all highly liquid investments purchased with an original maturity of three months or less to be cash equivalents.

Accounts Receivable and Allowance for Doubtful Accounts - Accounts receivable consist primarily of amounts due from Medicare and Medicaid programs, private payors, and a variety of other third party payors, net of estimates for variable consideration. Accounts receivable are stated at the amount the Facility expects to collect. The Facility provides an allowance for doubtful accounts equal to the estimated uncollectible amounts. The Facility's estimate is based on historical collection experience and a review of the status of patient accounts receivable. It is reasonably possible that the Facility's estimate of the allowance for doubtful accounts will change.

Leasehold Improvements and Equipment - Leasehold Improvements and Equipment is recorded at cost and includes expenditures for additions and improvements that extend the useful lives of the building and equipment. Expenditures for maintenance and repairs are charged to expense as incurred. Upon retirement or disposal, the related costs and accumulated depreciation are reduced by the carrying amounts. Gains or losses on these transactions are included in income or expense as incurred. Major movable equipment is depreciated using the straight-line method over their estimated useful lives. Leasehold improvements are amortized using the straight-line method over the shorter of the estimated useful life of the asset or the term of the lease.

Goodwill – The Facility has classified as goodwill the excess of the purchase price over the fair value of the assets acquired. Goodwill is not amortized, rather it is tested for impairment on an annual basis. There were no impairments recorded during the years ended December 31, 2024 and 2023.

(2) Summary of Significant Accounting Policies (continued)

Long-Lived Assets – Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. If the sum of the future cash flows (undiscounted and without interest charges) expected to result from the use of the intangible asset and its eventual disposition is less than the carrying amount of the asset, an impairment loss is recognized to the extent the carrying amount of the asset exceeds its fair value.

Patient Funds – The Facility acts as a fiduciary for the funds of patients in the institution. These funds are kept in a separate interest-bearing account.

Revenue Recognition - The Facility's revenue is derived primarily from providing healthcare services to its patients. Revenues are recognized when control of the promised services are provided to the patients at the amount that reflects the consideration to which the Facility expects to be entitled from patients and third-party payors, including Medicaid, Medicare, private payors, and a variety of other third party payors, in exchange for providing patient care.

Performance obligations are determined based on the nature of the services provided. The healthcare services in skilled patient contracts include routine services in exchange for a contractual agreed-upon amount or rate. Routine services are treated as a single performance obligation satisfied over time as services are rendered. As such, patient care services represent a bundle of services that are not capable of being distinct. Additionally, there may be ancillary services which are not included in the daily rates for routine services, but instead are treated as separate performance obligations satisfied over time, if and when those services are rendered.

Revenue recognized from healthcare services are adjusted for estimates of variable consideration (implicit price concessions) to arrive at the transaction price. The Facility determines the transaction price based on contractually agreed-upon amounts as determined by Medicaid and Medicare programs rules and regulations or rate on a per day basis, adjusted for estimates of variable consideration. The Facility uses the expected value method in determining the variable component that should be used to arrive at the transaction price, using contractual agreements and historical reimbursement experience within each payor type. The amount of variable consideration which is included in the transaction price may be constrained, and is included in net revenue only to the extent that it is probable that a significant reversal in the amount of the cumulative revenue recognized will not occur in a future period. If actual amounts of consideration ultimately received differ from the Facility's estimates, the Facility adjusts these estimates, which would affect net patient revenues in the period such variances become known. Adjustments arising from a change in the transaction price were not significant for the years ended December 31, 2024 and 2023.

(2) Summary of Significant Accounting Policies (continued)

Revenue Recognition (continued)

The Facility disaggregates revenue from contracts with its patients by payors to depict how the nature, amount, timing and uncertainty of revenue and cash flows are affected by economic factors. Settlement with Medicare and Medicaid payors for retroactive adjustments due to audits and reviews are considered variable consideration and are included in the determination of the estimated transaction price. These settlements are estimated based on the terms of the payment agreement with the payor, correspondence from the payor and the Facility's historical settlement activity. Any changes to these revenue estimates are recorded in the period the change or adjustment becomes known based on final settlement. The Facility recorded adjustments to net patient revenues which were not material to the Facility's revenue or financial statements for the years ended December 31, 2024 and 2023.

Leases – Effective January 1, 2022, the Facility adopted the new lease accounting guidance in Accounting Standards Update No. 2016-02, *Leases (Topic 842)*. The Facility has elected the package of practical expedients permitted in ASC Topic 842. Accordingly, the Facility accounted for its existing operating leases as an operating lease under the new guidance, without reassessing (a) whether the contract contains a lease under ASC Topic 842, (b) whether classification of the operating lease would be different in accordance with ASC Topic 842, or (c) whether the unamortized initial direct costs before transition adjustments (as of December 31, 2021) would have met the definition of initial direct costs in ASC Topic 842 at lease commencement.

The Facility determines if an arrangement is a lease at the inception of the contract. The Facility's operating leases are included in right of use assets, current portion of long-term lease liability, long-term lease liability on the accompanying balance sheet. The operating right of use assets and operating lease liabilities are recognized based on the present value of future minimum lease payments over the lease term at the commencement date. As the Facility's leases do not provide an implicit interest rate, the Facility utilizes an estimated incremental borrowing rate based on information available at the commencement date in determining the estimated present value of future payments.

Fair Value of Financial Instruments - The fair value of current assets and liabilities approximate carrying value because of the short-term nature of these items. The recorded values of loans payable and leases liability approximate their fair values, as interest approximates market rates.

Income Taxes – No provision is made for income taxes in the financial statements. The Facility is a single member limited liability company, and as such the Facility's income or loss is passed through and included in the tax returns of the Facility's member.

Accounting for Uncertainty in Income Taxes – The Facility recognize the effect of income tax position only if those positions are more likely than not to be sustained. Management has determined that the Facility had no uncertain tax positions that would require financial statement recognition and/or disclosure. The Facility is no longer subject to examination by applicable taxing jurisdictions for periods prior to December 31, 2021.

(3) **Leasehold Improvements and Equipment** - Leasehold Improvements and Equipment consists of the following as of December 31:

Depreciation for the years ended December 31, 2024 and 2023 was [redacted] and [redacted], respectively.

(4) **Long Term Debt** – Long Term Debt consists of the following as of December 31:

On November 11, 2024, the Facility secured a loan from CNH Capital for [redacted] to purchase equipment. The loan is payable in 60 monthly installments of [redacted] (principal only), commenced on November 11, 2024. Interest expense for the years ended December 31, 2024 and 2023 was [redacted].

(5) **Related Party Transactions** – The sole member of the Facility also is a member of 1805 Providence Avenue LLC ("Realty"), the realty company that owns the land and building. The Facility is charged rental expense equal to the monthly debt service requirements plus a fixed annual supplemental amount (see note 6).

The Facility receives fiscal and other consulting services provided by Ventura Services, who the sole member of the Facility is also a member of. Fiscal and other consulting services for the years ended December 31, 2024 and 2023 was [redacted] and [redacted], respectively. No amounts were due to this related party as of December 31, 2024 and 2023.

The Facility also receives management services from Highview Management who is owned by the sole member of the Facility. Management services for the years ended December 31, 2024 and 2023 was [redacted]. No amounts were due to this related party as of December 31, 2024 and 2023.

(6) Commitments and Contingencies

Nursing Home Lease – The Facility leases its nursing home from 1805 Providence Avenue LLC (related party) under a 30-year non-cancelable operating lease agreement. The lease expires in July 2040. In the normal course of business, it is expected that this lease will be renewed. The annual rent is equal to the monthly debt service requirements of the Realty and additional monthly supplemental rent above the annual debt service. Also, the Facility is also responsible for the maintenance and repairs to the building at its own expense. Rent expense for the years ended December 31, 2024 and 2023 was [redacted] and [redacted], respectively.

Equipment Lease - The Facility leases office equipment under a 5-year non-cancelable operating lease agreement. The lease expires in September 2027. In the normal course of business, it is expected that this lease will be replaced by a lease on other equipment. Equipment operating lease expense for the years ended December 31, 2024 and 2023 was [redacted].

Included in equipment lease expense are leases that, at the commencement date, have a lease term of 12 months or less, are month-to-month, or are one-time rentals. Accordingly, these leases are not accounted for under ASC Topic 842. Equipment lease expense for these leases for the years ended December 31, 2024 and 2023 was [redacted] and [redacted] respectively.

Future minimum payments of non-cancelable operating leases as of December 31, 2024 are as follows:

	Nursing Home	Equipment	Total
2025	[redacted]		
2026			
2027			
2028			
2029			
Thereafter			
Total Future Minimum Lease Payments			
Less Amounts Representing Interest			
Present Value of Future Minimum Lease Payments			
Less Current Maturities			
Long-Term Portion			
Weighted-Average Remaining Lease Term			
Weighted-Average Discount Rate			

(6) Commitments and Contingencies (continued)

Contingencies - The amounts received from the Medicaid and Medicare Programs for the years ended December 31, 2024 and 2023 are subject to audit by the New York State Department of Health and the Facility's Medicare Intermediary. Amounts due to the Medicaid and Medicare Programs become payable when the audit adjustments, if any, are finalized.

Litigation – From time to time, the Facility may be subject to legal proceedings arising out of the ordinary course of business. Although management cannot predict the outcome of such proceedings, management does not consider such proceedings to result in a material adverse effect on its financial position or its results of operations or its cash flows.

(7) Employee Retention Credit – The Employee Retention Credit is a refundable tax credit against certain employment taxes equal to 50% of the qualified wages an eligible employer pays to employees after March 12, 2020, and before January 1, 2021. Eligible employers can get immediate access to the credit by reducing employment tax deposits they are otherwise required to make. Also, if the employer's employment tax deposits are not sufficient to cover the credit, the employer may get an advance payment from the IRS. For each employee, wages (including certain health plan costs) up to [redacted] can be counted to determine the amount of the 50% credit. Earned credits from the Employee Retention Credit for the years ended December 31, 2024 and 2023 was [redacted]. As of December 31, 2024 and 2023, included in prepaid expenses and other current assets is [redacted] for outstanding employee retention credits expected to be received.

(8) Concentration of Credit Risk - The Facility grants credit without collateral to its residents, most of whom are residents and are insured under third-party payor agreements. The mix of receivables from residents and third-party payors is as follows as of December 31:

	2024	2023
Medicaid	[redacted]	
Medicare		
Private Pay and Others		

For the years ended December 31, 2024 and 2023, the Facility had cash balances in major financial institutions which at times exceeded Federal Depository Insurance limits. These financial institutions have strong credit ratings and management believes that credit risk related to these deposits is minimal.

(9) **Non-Union Retirement Plan** – The Facility has a defined contribution retirement plan for employees not covered by the collective bargain agreement (see note 10). All full time non-union employees are eligible to participate in a retirement plan implemented under IRC Section 401(K). This plan provides for discretionary employer contributions of 50% of the employees' contributions up to a maximum of 3% of the employees' salary. Employer contributions to the non-union retirement plan for the years ended December 31, 2024 and 2023 was [redacted] and [redacted], respectively.

(10) **Union Pension Plan** – The Facility contributes to a multiemployer defined benefit pension plan under the terms of collective-bargaining agreements that cover its union-represented employees. The risks of participating in these multiemployer plans are different from single-employer plans in the following aspects:

a. Assets contributed to the multiemployer plan by one employer may be used to provide benefits to employees of other participating employers.

b. If a participating employer stop contributing to the plan, the unfunded obligations of the plan may be borne by the remaining participating employers.

c. If Entity A chooses to stop participating in some of its multiemployer plans, Entity A may be required to pay those plans an amount based on the underfunded status of the plan, referred to as a withdrawal liability.

The Facility's participation in this plan for the years ended December 31, 2024 and 2023, is outlined in table the below. The "EIN/Pension Plan Number" column provides the Employer Identification Number (EIN) and the three-digit plan number, if applicable. Unless otherwise noted, the most recent Pension Protection Act (PPA) zone status available in 2024 and 2023 is for the plan's year-end at December 31, 2023 and 2022, respectively. The zone status is based on information that the Facility received from the plan and is certified by the plan's actuary. Among other factors, plans in the red zone are generally less than 65 percent funded, plans in the yellow zone are less than 80 percent funded, and plans in the green zone are at least 80 percent funded. The "FIP/RP Status Pending/Implemented" column indicates plans for which a financial improvement plan (FIP) or a rehabilitation plan (RP) is either pending or has been implemented. The last column lists the expiration date of the collective-bargaining agreement to which the plans are subject. There have been no significant changes that affect the comparability of 2024 contributions.

(10) **Union Pension Plan (continued)** – Employer contributions to the union pension plan for the years ended December 31, 2024 and 2023 was [redacted] and [redacted], respectively.

Pension Fund	EIN/Pension Plan Number	Pension Protection Act Zone Status	FIP/RP Status Pending/ Implemented	Surcharge Imposed	Expiration of Collective Bargaining Agreement
1199 SEIU Greater New York Pension Fund	[redacted]				

(11) **Subsequent Events** – Management of the Facility has evaluated subsequent events through March 11, 2025, the date the financial statements were available to be issued. No significant events have been identified that would require adjustment to or disclosure in the accompanying financial statements.
